Draw a One-Leg Hanging Pose: Grip, Gravity, and Sway Cues

Original worked example / unchanged complete key

Prompt: A figure hangs by the left leg from a horizontal bar. The grip cross is at the top center. The supporting leg hooks over the bar with a visible return line. The torso hangs below the hip, tilted slightly right of the gravity line, and two sway arrows show a small swing. Redraw this pose in a blank frame and label the grip point and sway direction.

Answer: The redraw shows a grip cross at top center, a gravity line straight down, and a supporting leg crossing the bar with a return line under it. The torso oval hangs below the hip, tilted slightly right, with the free leg and arms dropping downward. Two curved arrows near the hips show swing and return. Labels mark the grip point and sway direction. The pose reads as hanging because the grip is active, the body hangs below the cross, and the sway is small and labeled.
