Contour Line Heart Drawing: Single-Line and Blind-Contour Practice

Topic reference / ordinary illustration

Ordinary topic reference. Hypothetical dimensions in the four tasks are supplied in their own text; this illustration is not their measured answer.

Contour Line Heart Drawing: Single-Line and Blind-Contour Practice

Worked example / complete source key

A student starts at the top dip of a heart outline, draws down the left lobe, around the bottom point, up the right lobe, and back to the dip without lifting the pencil. The line is continuous but the right lobe is slightly smaller than the left. Is this a valid single-line contour heart?

Answer: Yes. The line is continuous, closed, and describes the heart shape. Slight asymmetry is acceptable because hand-drawn contours vary. The key criteria are one unbroken line and a closed loop.
