Mountain Ridge Contour Drawing: Two-Outline Line-Following Practice

Topic reference / ordinary illustration

Ordinary topic reference. Hypothetical dimensions in the four tasks are supplied in their own text; this illustration is not their measured answer.

Mountain Ridge Contour Drawing: Two-Outline Line-Following Practice

Worked example / complete source key

A reference Ridge A shows three turns: a gentle rise, a short flat, and a gentle fall. Redraw it in a blank panel using the convention, then check it.

Answer: Draw one continuous outline starting at the left edge: rise gently, hold a short flat, then fall gently, marking one arrow at each of the three direction changes. The redraw should show three turns in the same order and a similar overall height. Check by counting turns (three), confirming order left to right, and verifying the line is continuous with even weight.
