Draw a Mouse Snout in Perspective: Foreshortening Practice

Original task 1 / independent drawing and calculation

Task 1

Draw a near-profile mouse snout with x-height 5 pencil widths and B–N 5 pencil widths. Mark the far cheek as a short stub.

Keep the original task measurements. Use the full drawing sheet in this PDF for a response needing more room; use the stated paper size when a task specifies larger paper.

Draw a Mouse Snout in Perspective: Foreshortening Practice

Original task 2 / independent drawing and calculation

Task 2

Draw a three-quarter mouse snout with x-height 6 pencil widths and B–N 4 pencil widths. Make the near cheek 5 widths and the far cheek 3 widths.

Keep the original task measurements. Use the full drawing sheet in this PDF for a response needing more room; use the stated paper size when a task specifies larger paper.

Draw a Mouse Snout in Perspective: Foreshortening Practice

Original task 3 / independent drawing and calculation

Task 3

Draw a near-front mouse snout with x-height 6 pencil widths and B–N 2 pencil widths. Widen the muzzle so the near cheek is 6 widths and the far cheek 4 widths.

Keep the original task measurements. Use the full drawing sheet in this PDF for a response needing more room; use the stated paper size when a task specifies larger paper.

Draw a Mouse Snout in Perspective: Foreshortening Practice

Original task 4 / independent drawing and calculation

Task 4

A drawing has x-height 8 millimetres, B–N 3 millimetres, near cheek 7 millimetres, and far cheek 6 millimetres. State whether it reads as near-front and give one fix if not.

Keep the original task measurements. Use the full drawing sheet in this PDF for a response needing more room; use the stated paper size when a task specifies larger paper.

Full drawing sheet / reusable blank workspace

Reusable full drawing sheet for Tasks 1 to 4. Print another copy when needed. Keep all original task measurements; if a task specifies larger paper, use that paper size.
