Redwood Forest Negative Space Drawing: Gaps and Canopy Shapes

Topic reference / ordinary illustration

Ordinary topic reference. Hypothetical dimensions in the four tasks are supplied in their own text; this illustration is not their measured answer.

Redwood Forest Negative Space Drawing: Gaps and Canopy Shapes

Worked example / complete source key

A reference shows a widest trunk gap of 6 cm and a narrowest gap of 2 cm. Your drawing has a widest gap of 9 cm. What narrowest gap preserves the reference ratio?

Answer: 3 cm. Reference ratio is 6 divided by 2 equals 3. Your widest gap is 9 cm, so narrowest equals 9 divided by 3 equals 3 cm.
