Blind Contour Room Drawing: Edge-Only Line Practice

Original worked example / unchanged complete key

Prompt: From a seat facing a corner, trace three edges: wall-to-wall junction, tabletop front edge, and chair back edge. Do one blind pass, then one slow-contour comparison of the tabletop edge in a separate box. Count lines and skips.

Answer: Blind pass: three continuous lines, one skip (hidden chair leg). Comparison box: one continuous line for the tabletop edge. Labels placed below the drawing between baseline and midline. Count: 3 edges traced, 3 lines, 1 skip. Rubric score: edge selection 2, continuity 2, blind behavior 2, labels 2, no added perspective or shading 2, total 10.
