Contour Line Rooster Drawing: Edge-Only Study

Topic reference / ordinary illustration

Ordinary topic reference. Hypothetical dimensions in the four tasks are supplied in their own text; this illustration is not their measured answer.

Contour Line Rooster Drawing: Edge-Only Study

Worked example / complete source key

A rooster reference shows a comb with three peaks, a tail with two outer arcs sweeping right, and a body outline that closes at the tail-back junction. Draw a continuous-line contour using one line for the head-comb and one for the body-tail, with a gap at the junction. Describe the sequence and one check.

Answer: Start at the comb's top peak, draw down to the first valley, up to the second peak, down to the second valley, up to the third peak, then down the back of the head and around the neck into the breast. Continue under the body to the legs, up the back, and draw two outer tail arcs sweeping right. Stop at the tail-back junction and lift. Check: count three comb peaks and two tail arcs; confirm the body outline closes at the junction.
