Finding Missing Equivalent Fractions Worksheets

REFERENCE / CASE 1

Complete 1/3 = ?/6. Explain your multiplier.

1/3

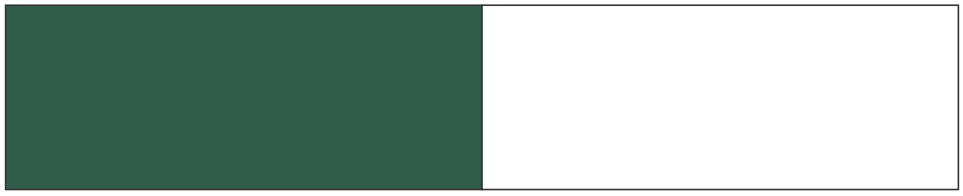

METHOD: The denominator is multiplied by 2. Multiply the numerator by the same factor: 1 x 2 = 2.
Use the separate practice sheet before checking the answer.

Finding Missing Equivalent Fractions Worksheets

REFERENCE / CASE 2

Complete 2/4 = ?/12. Explain your multiplier.

1/2

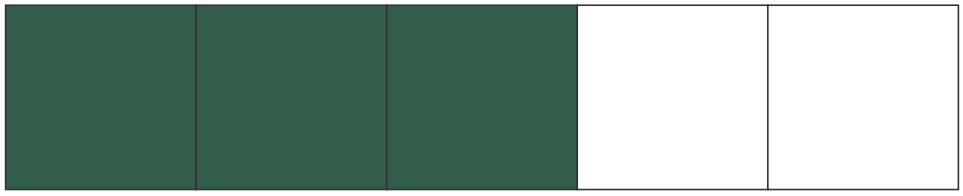

METHOD: The denominator is multiplied by 3. Multiply the numerator by the same factor: 2 x 3 = 6.
Use the separate practice sheet before checking the answer.

Finding Missing Equivalent Fractions Worksheets

REFERENCE / CASE 3

Complete 3/5 = ?/20. Explain your multiplier.

3/5

METHOD: The denominator is multiplied by 4. Multiply the numerator by the same factor: 3 x 4 = 12.
Use the separate practice sheet before checking the answer.

Finding Missing Equivalent Fractions Worksheets

REFERENCE / CASE 4

Complete 4/6 = ?/30. Explain your multiplier.

2/3

METHOD: The denominator is multiplied by 5. Multiply the numerator by the same factor: 4 x 5 = 20.
Use the separate practice sheet before checking the answer.
