Order of Operations with Fractions Worksheets

REFERENCE / CASE 1

Evaluate 1/2 + (1/3) x (3/4). Show the multiplication before the addition.

Step	Expression
Multiply	1/3 x 3/4
Then add	1/2 + previous result

METHOD: Multiply the fractions first. Then add 1/2 using a common denominator.
Use the separate practice sheet before checking the answer.

Order of Operations with Fractions Worksheets

REFERENCE / CASE 2

Evaluate 1/2 + (2/3) x (3/4). Show the multiplication before the addition.

Step	Expression
Multiply	2/3 x 3/4
Then add	1/2 + previous result

METHOD: Multiply the fractions first. Then add 1/2 using a common denominator.
Use the separate practice sheet before checking the answer.

Order of Operations with Fractions Worksheets

REFERENCE / CASE 3

Evaluate 1/2 + (3/3) x (3/4). Show the multiplication before the addition.

Step	Expression
Multiply	3/3 x 3/4
Then add	1/2 + previous result

METHOD: Multiply the fractions first. Then add 1/2 using a common denominator.
Use the separate practice sheet before checking the answer.

Order of Operations with Fractions Worksheets

REFERENCE / CASE 4

Evaluate 1/2 + (4/3) x (3/4). Show the multiplication before the addition.

Step	Expression
Multiply	4/3 x 3/4
Then add	1/2 + previous result

METHOD: Multiply the fractions first. Then add 1/2 using a common denominator.
Use the separate practice sheet before checking the answer.
