Long Division with Remainders Worksheets

REFERENCE / CASE 1

Divide 125 by 4. Give a whole-number quotient and remainder, then check by multiplication.

Dividend	Divisor	Quotient	Remainder
125	4	?	?

METHOD: 4 x 31 = 124. 125 - 124 = 1; the remainder is less than 4.
Use the separate practice sheet before checking the answer.

Long Division with Remainders Worksheets

REFERENCE / CASE 2

Divide 148 by 5. Give a whole-number quotient and remainder, then check by multiplication.

Dividend	Divisor	Quotient	Remainder
148	5	?	?

METHOD: 5 x 29 = 145. 148 - 145 = 3; the remainder is less than 5.
Use the separate practice sheet before checking the answer.

Long Division with Remainders Worksheets

REFERENCE / CASE 3

Divide 171 by 6. Give a whole-number quotient and remainder, then check by multiplication.

Dividend	Divisor	Quotient	Remainder
171	6	?	?

METHOD: 6 x 28 = 168. 171 - 168 = 3; the remainder is less than 6.
Use the separate practice sheet before checking the answer.

Long Division with Remainders Worksheets

REFERENCE / CASE 4

Divide 194 by 7. Give a whole-number quotient and remainder, then check by multiplication.

Dividend	Divisor	Quotient	Remainder
194	7	?	?

METHOD: 7 x 27 = 189. 194 - 189 = 5; the remainder is less than 7.
Use the separate practice sheet before checking the answer.
