Equal Groups and Repeated Addition Worksheets

ANSWER / CASE 1

There are 3 groups with 2 counters in each. Write repeated addition and multiplication sentences for the total.

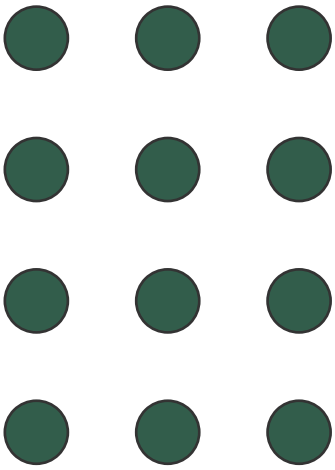

ANSWER: 2 + 2 + 2 = 6; 3 x 2 = 6.
1. Each group must contain the same number.
2. The number of groups multiplied by the group size gives the total.

Equal Groups and Repeated Addition Worksheets

ANSWER / CASE 2

There are 4 groups with 3 counters in each. Write repeated addition and multiplication sentences for the total.

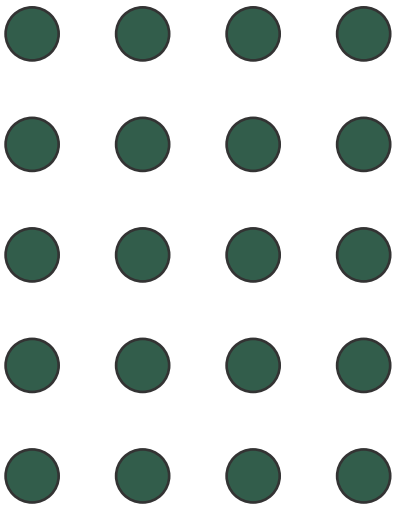

ANSWER: 3 + 3 + 3 + 3 = 12; 4 x 3 = 12.
1. Each group must contain the same number.
2. The number of groups multiplied by the group size gives the total.

Equal Groups and Repeated Addition Worksheets

ANSWER / CASE 3

There are 5 groups with 4 counters in each. Write repeated addition and multiplication sentences for the total.

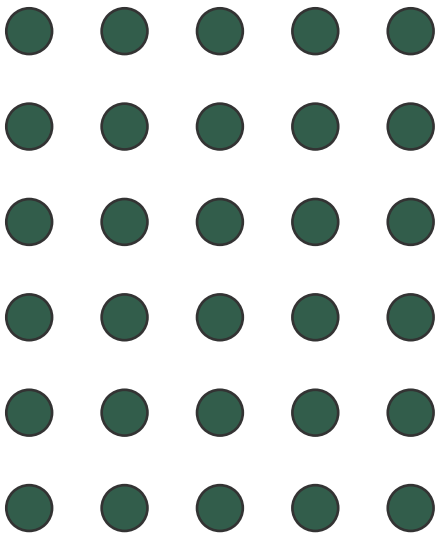

ANSWER: 4 + 4 + 4 + 4 + 4 = 20; 5 x 4 = 20.
1. Each group must contain the same number.
2. The number of groups multiplied by the group size gives the total.

Equal Groups and Repeated Addition Worksheets

ANSWER / CASE 4

There are 6 groups with 5 counters in each. Write repeated addition and multiplication sentences for the total.

ANSWER: 5 + 5 + 5 + 5 + 5 + 5 = 30; 6 x 5 = 30.
1. Each group must contain the same number.
2. The number of groups multiplied by the group size gives the total.
