How to Draw Lizard — Free Practice Sheets

ANSWER / CASE 1

lizard: Trace the reference outline, then practise the contour independently. Compare with the separate full reference sheet.

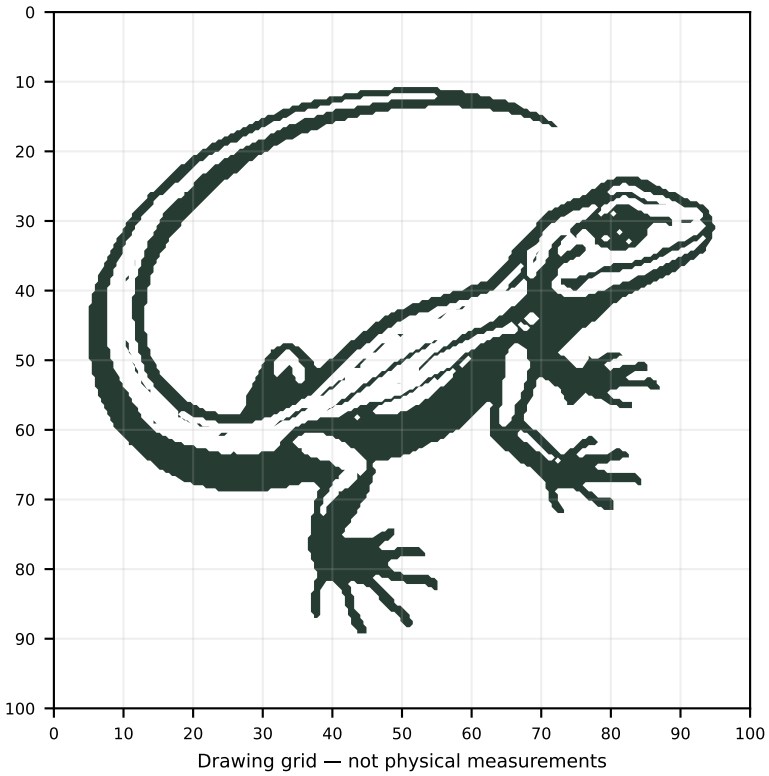

ANSWER: Example solution: preserve long curved tail sweeping up and to the left, elongated head with a visible eye and mouth line, four splayed legs with distinct toes, two on each side of the body. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw the elongated head with the eye and mouth line, then extend a curved neck into the body.
2. Add the long tail as a sweeping curve that arcs up and to the left from the rear of the body.
3. Draw the four splayed legs with spread toes, attaching the front pair near the shoulders and the rear pair near the hips.
4. Outline the body with a dark border and add a lighter dorsal stripe running from the head down the back.
