How to Draw Crocodile — Free Practice Sheets

ANSWER / CASE 1

crocodile: Trace the reference outline, then practise the contour independently. Compare with the separate full reference sheet.

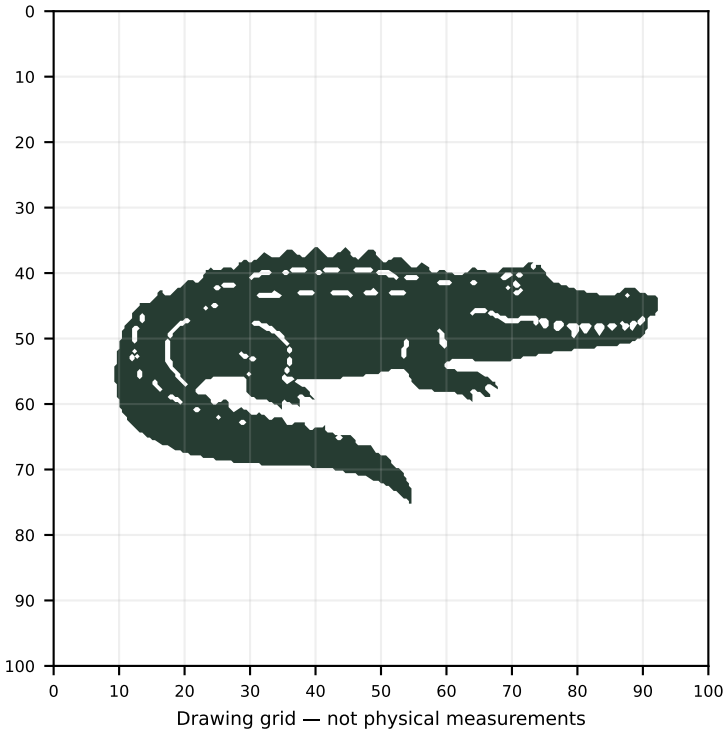

ANSWER: Example solution: preserve long snout with visible teeth along the jaw, scaly ridged back with triangular scutes, long tapering tail curving downward. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw the long horizontal body and snout outline, then add the open mouth line with small triangular teeth.
2. Add the eye and nostril bumps on the head, then draw the ridged back as a row of triangular scutes.
3. Draw the long tail curving down and back from the rear of the body, tapering to a point.
4. Add the four short legs with clawed feet beneath the body, then fill the body black and add white outline accents for the scutes and belly.
