How to Draw Iguana — Free Practice Sheets

ANSWER / CASE 1

iguana: Trace the reference outline, then practise the contour independently. Compare with the separate full reference sheet.

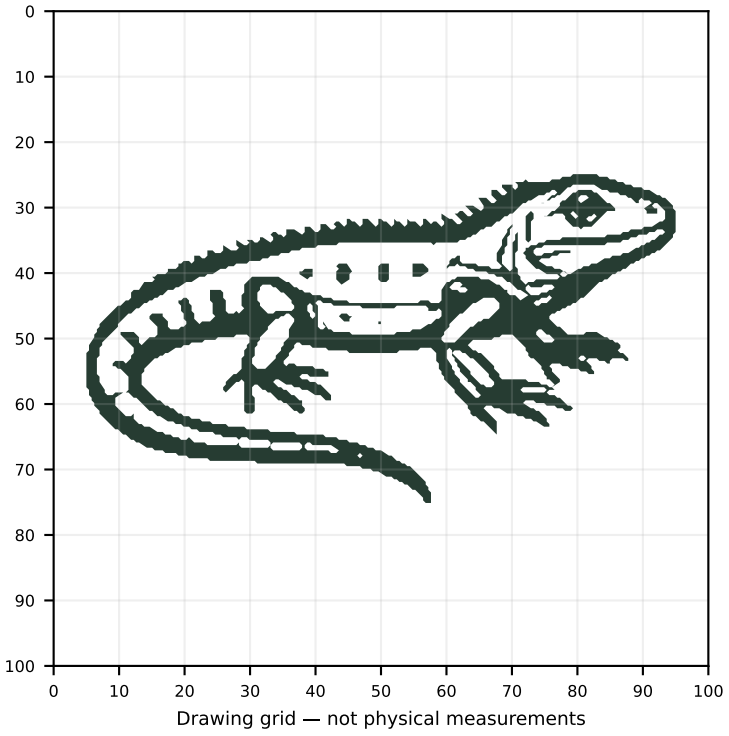

ANSWER: Example solution: preserve dorsal crest spines running along the back, long tapering tail that curves downward, stocky lizard body with four visible legs and clawed feet. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw the stocky body outline with a rounded head and a long tail tapering to a point.
2. Add the dorsal crest as a row of small triangular spines along the top of the back and neck.
3. Sketch the four legs with clawed toes, positioning the front and rear limbs on each side.
4. Add facial details including the eye, mouth line, and side markings to complete the iguana silhouette.
