How to Draw Hammerhead Shark — Free Practice Sheets

ANSWER / CASE 1

hammerhead shark: Trace the reference outline, then practise the contour independently. Compare with the separate full reference sheet.

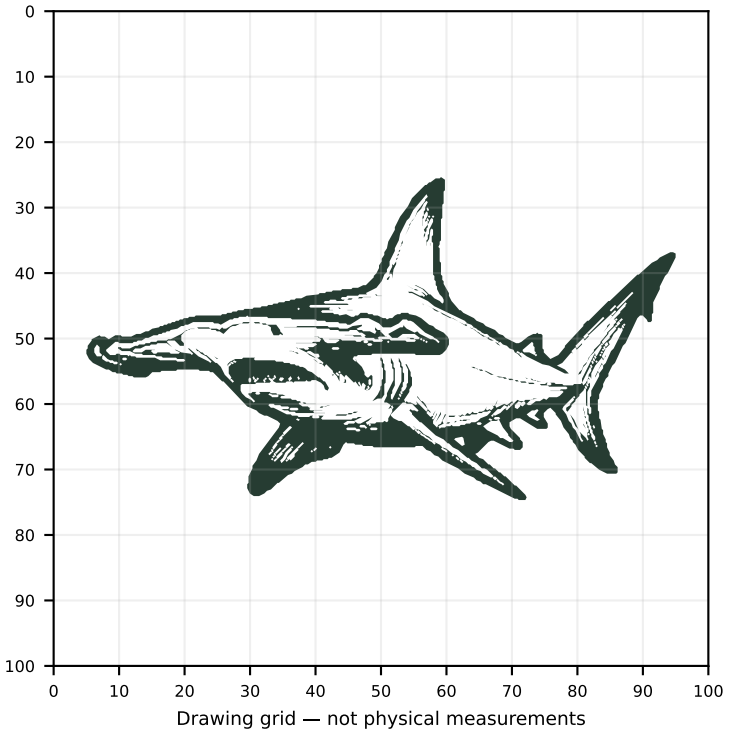

ANSWER: Example solution: preserve wide, laterally expanded hammer-shaped head with eye at the outer tip, tall triangular dorsal fin on the back, torpedo-shaped body with visible gill slits behind the head. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw the elongated torpedo body as a tapered oval, then extend the head sideways into a wide hammer shape with rounded lobes.
2. Add the tall triangular dorsal fin on top of the back and the large pectoral fins below the body.
3. Sketch the tail fin at the rear with a larger upper lobe and smaller lower lobe.
4. Draw the mouth line under the hammer head, add gill slits on the side behind the head, and outline the eye at the head tip.

ANSWER / CASE 2

hammerhead shark: Copy the reference onto the blank grid, using matching grid intersections. Compare with the separate full reference sheet.

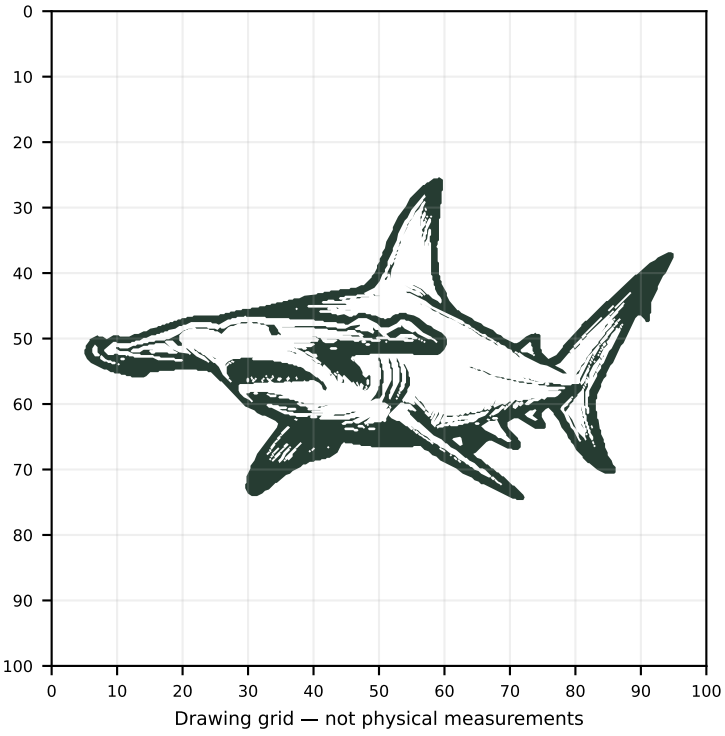

ANSWER: Example solution: preserve wide, laterally expanded hammer-shaped head with eye at the outer tip, tall triangular dorsal fin on the back, torpedo-shaped body with visible gill slits behind the head. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw the elongated torpedo body as a tapered oval, then extend the head sideways into a wide hammer shape with rounded lobes.
2. Add the tall triangular dorsal fin on top of the back and the large pectoral fins below the body.
3. Sketch the tail fin at the rear with a larger upper lobe and smaller lower lobe.
4. Draw the mouth line under the hammer head, add gill slits on the side behind the head, and outline the eye at the head tip.

ANSWER / CASE 3

hammerhead shark: Use the bounding frame and center guide to place the silhouette, then add the identifying details. Compare with the separate full reference sheet.

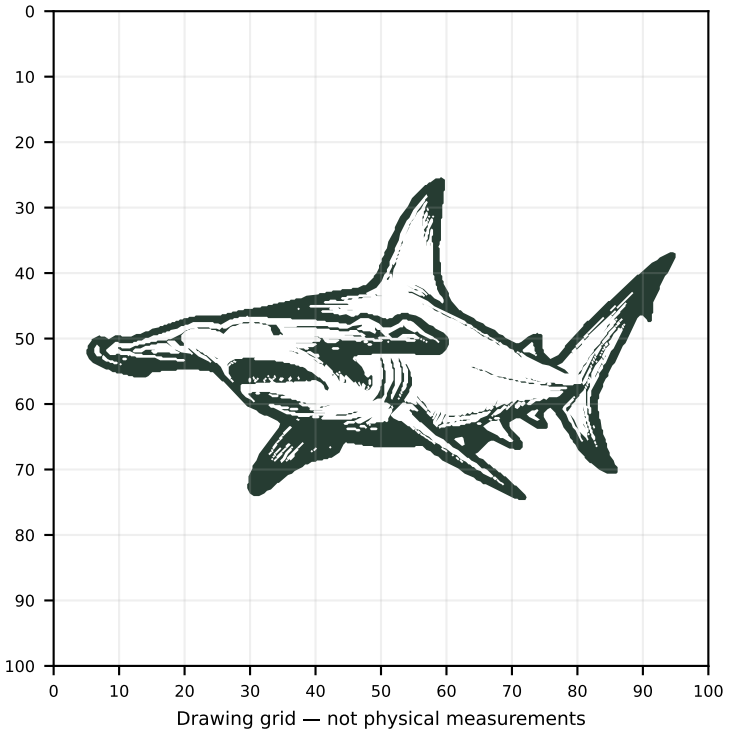

ANSWER: Example solution: preserve wide, laterally expanded hammer-shaped head with eye at the outer tip, tall triangular dorsal fin on the back, torpedo-shaped body with visible gill slits behind the head. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw the elongated torpedo body as a tapered oval, then extend the head sideways into a wide hammer shape with rounded lobes.
2. Add the tall triangular dorsal fin on top of the back and the large pectoral fins below the body.
3. Sketch the tail fin at the rear with a larger upper lobe and smaller lower lobe.
4. Draw the mouth line under the hammer head, add gill slits on the side behind the head, and outline the eye at the head tip.

How to Draw Hammerhead Shark — Free Practice Sheets

ANSWER / CASE 4

hammerhead shark: Complete the blank right-hand portion using the full reference.
Compare with the separate full reference sheet.

ANSWER: Example solution: preserve wide, laterally expanded hammer-shaped head with eye at the outer tip, tall triangular dorsal fin on the back, torpedo-shaped body with visible gill slits behind the head. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw the elongated torpedo body as a tapered oval, then extend the head sideways into a wide hammer shape with rounded lobes.
2. Add the tall triangular dorsal fin on top of the back and the large pectoral fins below the body.
3. Sketch the tail fin at the rear with a larger upper lobe and smaller lower lobe.
4. Draw the mouth line under the hammer head, add gill slits on the side behind the head, and outline the eye at the head tip.
