How to Draw Pterodactyl — Free Practice Sheets

ANSWER / CASE 1

pterodactyl: Trace the reference outline, then practise the contour independently. Compare with the separate full reference sheet.

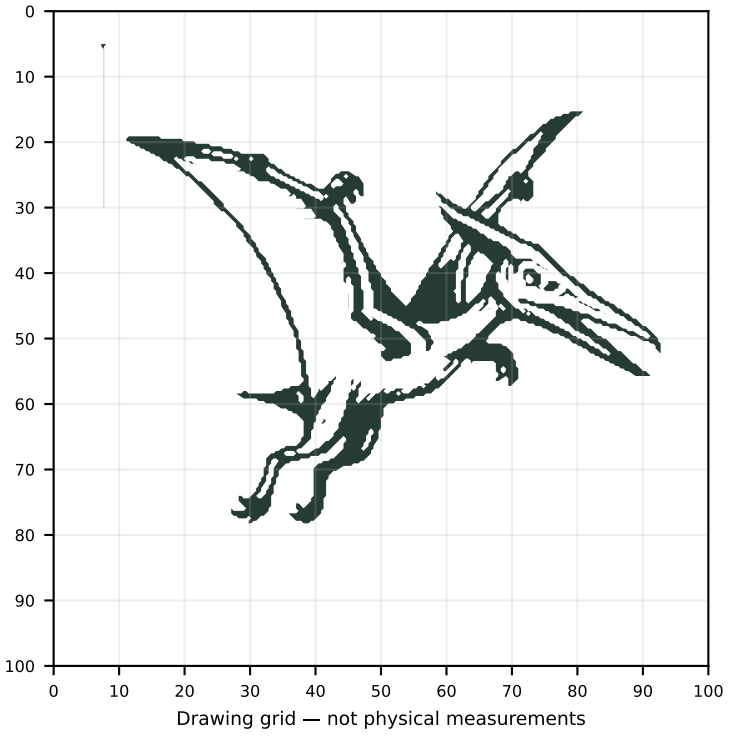

ANSWER: Example solution: preserve large membrane wings with visible finger/claw at the wing joint, long pointed beak with open mouth, head crest extending backward from the skull. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw the long pointed beak and skull, then add the backward-sweeping crest behind the head.
2. Sketch the body as a tapered oval connecting the neck to the tail.
3. Attach the large membrane wings to the upper back, drawing the wing-finger and claw at the leading edge.
4. Add two legs below the body with small clawed feet, then outline the tail and wing membranes.

How to Draw Pterodactyl — Free Practice Sheets

ANSWER / CASE 2

pterodactyl: Copy the reference onto the blank grid, using matching grid intersections. Compare with the separate full reference sheet.

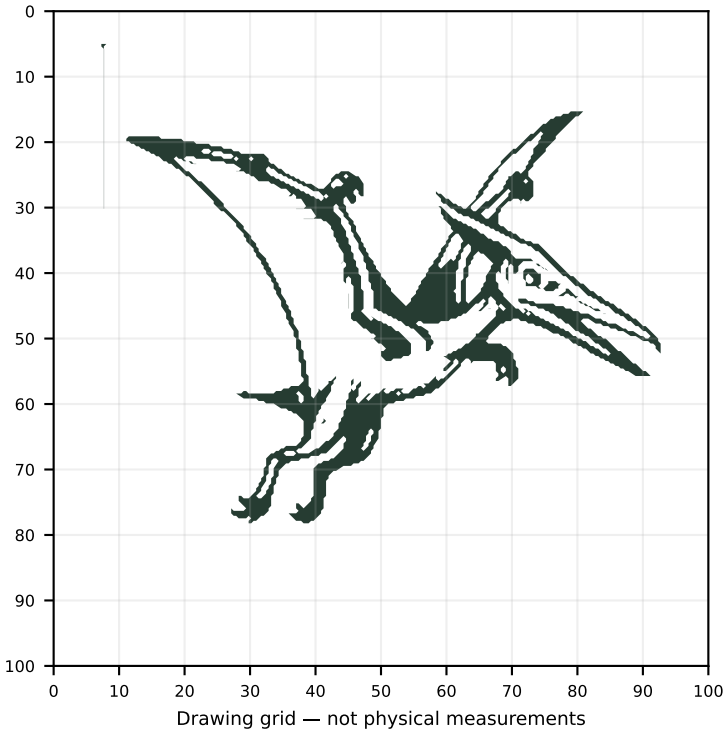

ANSWER: Example solution: preserve large membrane wings with visible finger/claw at the wing joint, long pointed beak with open mouth, head crest extending backward from the skull. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw the long pointed beak and skull, then add the backward-sweeping crest behind the head.
2. Sketch the body as a tapered oval connecting the neck to the tail.
3. Attach the large membrane wings to the upper back, drawing the wing-finger and claw at the leading edge.
4. Add two legs below the body with small clawed feet, then outline the tail and wing membranes.

ANSWER / CASE 3

pterodactyl: Use the bounding frame and center guide to place the silhouette, then add the identifying details. Compare with the separate full reference sheet.

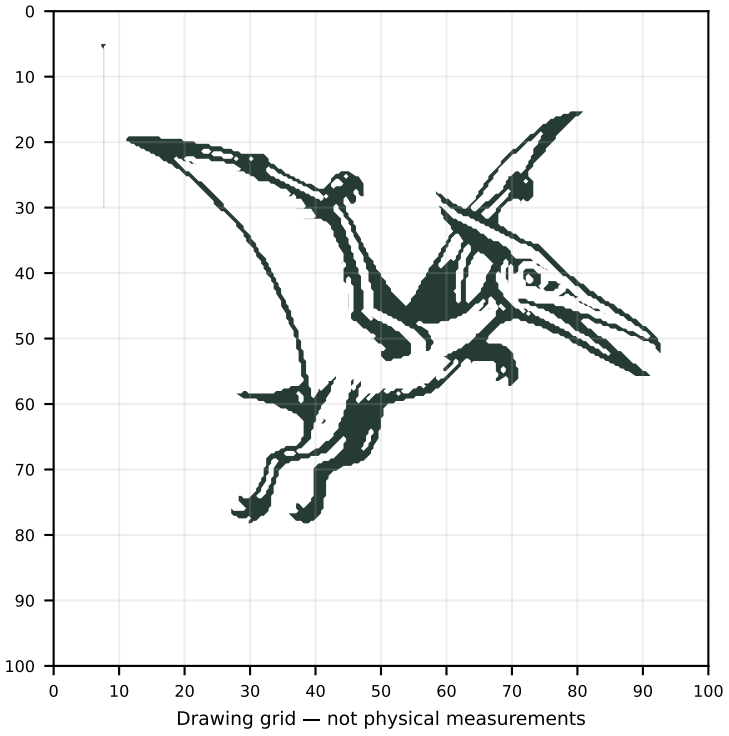

ANSWER: Example solution: preserve large membrane wings with visible finger/claw at the wing joint, long pointed beak with open mouth, head crest extending backward from the skull. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw the long pointed beak and skull, then add the backward-sweeping crest behind the head.
2. Sketch the body as a tapered oval connecting the neck to the tail.
3. Attach the large membrane wings to the upper back, drawing the wing-finger and claw at the leading edge.
4. Add two legs below the body with small clawed feet, then outline the tail and wing membranes.

How to Draw Pterodactyl — Free Practice Sheets

ANSWER / CASE 4

pterodactyl: Complete the blank right-hand portion using the full reference. Compare with the separate full reference sheet.

ANSWER: Example solution: preserve large membrane wings with visible finger/claw at the wing joint, long pointed beak with open mouth, head crest extending backward from the skull. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw the long pointed beak and skull, then add the backward-sweeping crest behind the head.
2. Sketch the body as a tapered oval connecting the neck to the tail.
3. Attach the large membrane wings to the upper back, drawing the wing-finger and claw at the leading edge.
4. Add two legs below the body with small clawed feet, then outline the tail and wing membranes.
