How to Draw Cicada — Free Practice Sheets

ANSWER / CASE 1

cicada: Trace the reference outline, then practise the contour independently. Compare with the separate full reference sheet.

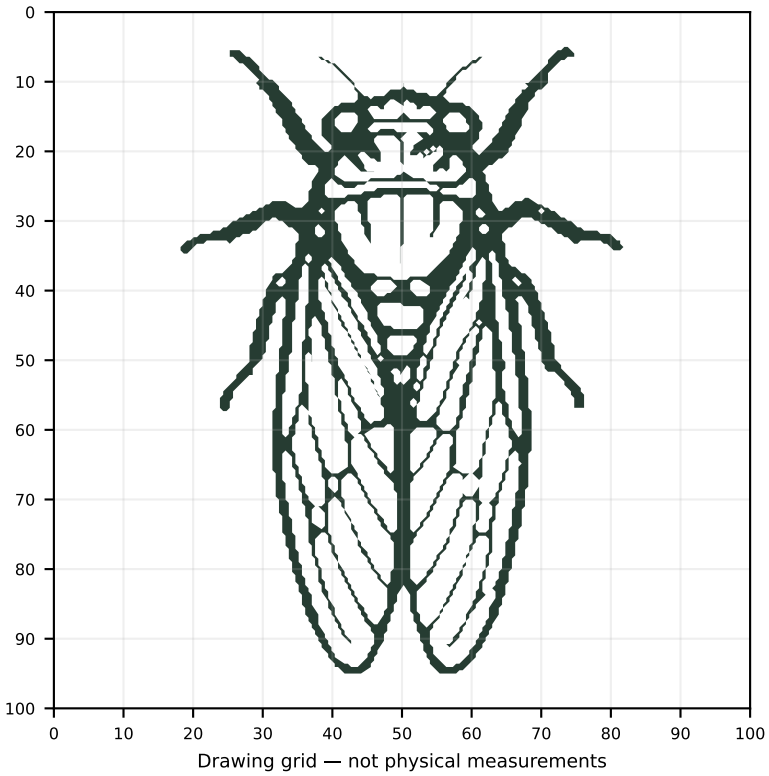

ANSWER: Example solution: preserve broad translucent wings folded over the back with visible vein lines, stout segmented body with a wide head and prominent round eyes, six legs attached to the thorax, with the front pair angled forward. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a vertical oval for the stout body and add a wide head with two round eyes on top.
2. Sketch the broad wings as two long, rounded shapes extending down from the thorax, overlapping slightly at the center.
3. Add vein lines inside the wings using a few curved longitudinal lines and cross-veins.
4. Draw six legs from the thorax: two front legs angled forward, two middle legs out to the sides, and two hind legs angled back.

How to Draw Cicada — Free Practice Sheets

ANSWER / CASE 2

cicada: Copy the reference onto the blank grid, using matching grid intersections. Compare with the separate full reference sheet.

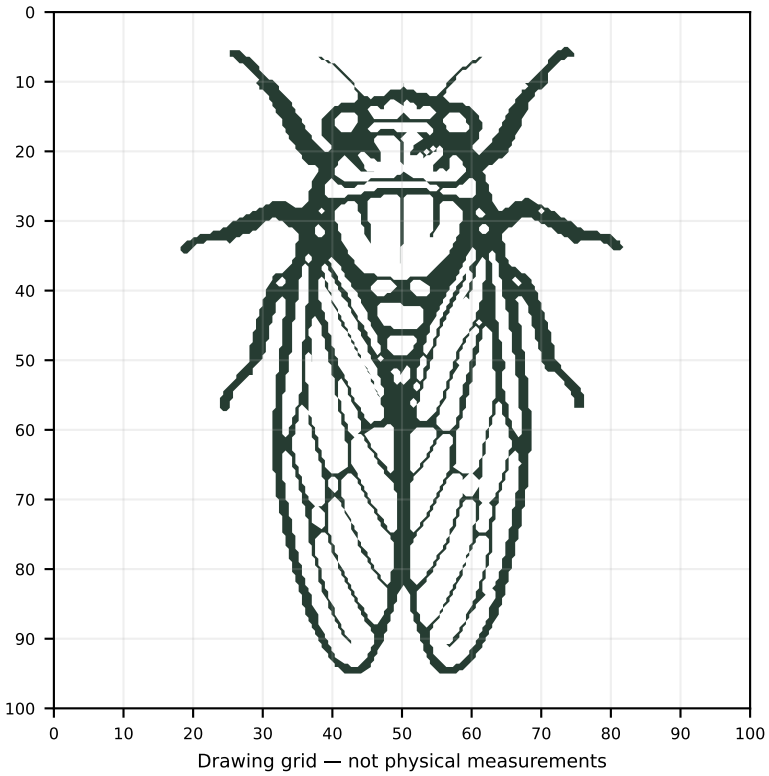

ANSWER: Example solution: preserve broad translucent wings folded over the back with visible vein lines, stout segmented body with a wide head and prominent round eyes, six legs attached to the thorax, with the front pair angled forward. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a vertical oval for the stout body and add a wide head with two round eyes on top.
2. Sketch the broad wings as two long, rounded shapes extending down from the thorax, overlapping slightly at the center.
3. Add vein lines inside the wings using a few curved longitudinal lines and cross-veins.
4. Draw six legs from the thorax: two front legs angled forward, two middle legs out to the sides, and two hind legs angled back.

How to Draw Cicada — Free Practice Sheets

ANSWER / CASE 3

cicada: Use the bounding frame and center guide to place the silhouette, then add the identifying details. Compare with the separate full reference sheet.

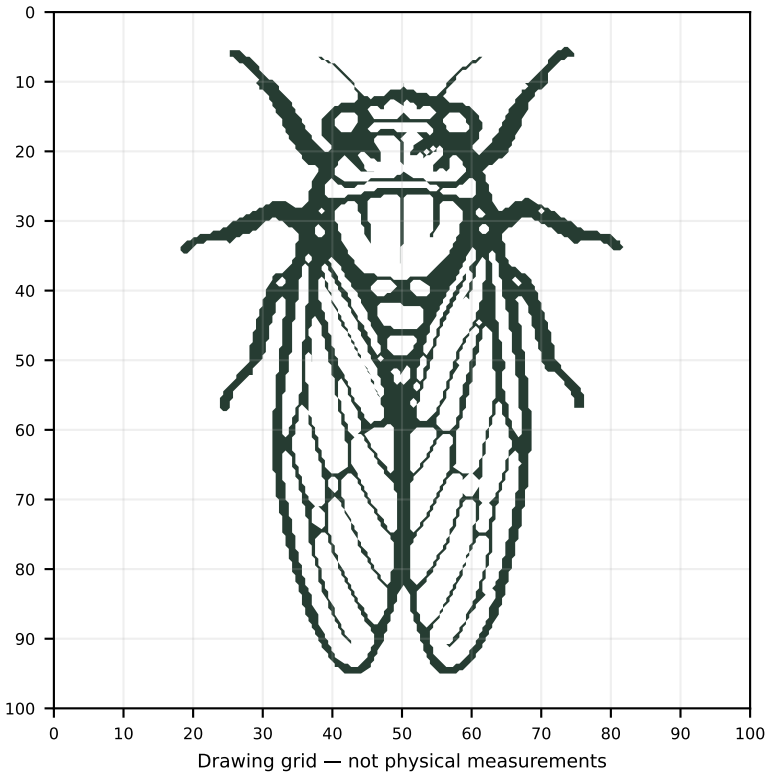

ANSWER: Example solution: preserve broad translucent wings folded over the back with visible vein lines, stout segmented body with a wide head and prominent round eyes, six legs attached to the thorax, with the front pair angled forward. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a vertical oval for the stout body and add a wide head with two round eyes on top.
2. Sketch the broad wings as two long, rounded shapes extending down from the thorax, overlapping slightly at the center.
3. Add vein lines inside the wings using a few curved longitudinal lines and cross-veins.
4. Draw six legs from the thorax: two front legs angled forward, two middle legs out to the sides, and two hind legs angled back.

How to Draw Cicada — Free Practice Sheets

ANSWER / CASE 4

cicada: Complete the blank right-hand portion using the full reference. Compare with the separate full reference sheet.

ANSWER: Example solution: preserve broad translucent wings folded over the back with visible vein lines, stout segmented body with a wide head and prominent round eyes, six legs attached to the thorax, with the front pair angled forward. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a vertical oval for the stout body and add a wide head with two round eyes on top.
2. Sketch the broad wings as two long, rounded shapes extending down from the thorax, overlapping slightly at the center.
3. Add vein lines inside the wings using a few curved longitudinal lines and cross-veins.
4. Draw six legs from the thorax: two front legs angled forward, two middle legs out to the sides, and two hind legs angled back.
