How to Draw Marlin — Free Practice Sheets

ANSWER / CASE 1

marlin: Trace the reference outline, then practise the contour independently. Compare with the separate full reference sheet.

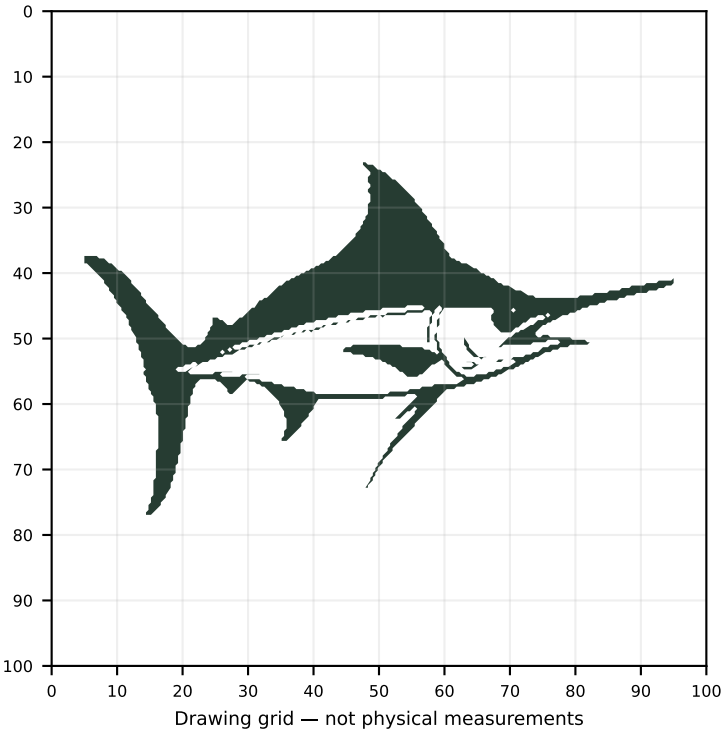

ANSWER: Example solution: preserve long pointed bill extending from the snout, tall pointed dorsal fin with visible fin rays, streamlined body with a forked tail and pectoral fin.
Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw the streamlined body outline as a long tapered oval, then add the long pointed bill at the front.
2. Add the tall triangular dorsal fin on top and the forked tail at the rear.
3. Place the pectoral fin on the side and the small anal fin near the tail base.
4. Outline the eye and mouth line, then add fin-ray lines inside the dorsal and tail fins.

ANSWER / CASE 2

marlin: Copy the reference onto the blank grid, using matching grid intersections. Compare with the separate full reference sheet.

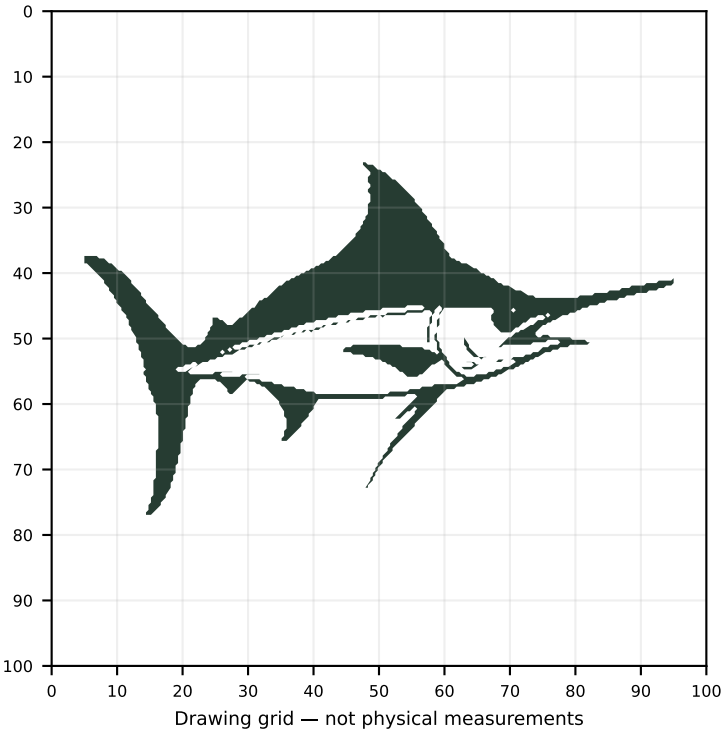

ANSWER: Example solution: preserve long pointed bill extending from the snout, tall pointed dorsal fin with visible fin rays, streamlined body with a forked tail and pectoral fin. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw the streamlined body outline as a long tapered oval, then add the long pointed bill at the front.
2. Add the tall triangular dorsal fin on top and the forked tail at the rear.
3. Place the pectoral fin on the side and the small anal fin near the tail base.
4. Outline the eye and mouth line, then add fin-ray lines inside the dorsal and tail fins.

ANSWER / CASE 3

marlin: Use the bounding frame and center guide to place the silhouette, then add the identifying details. Compare with the separate full reference sheet.

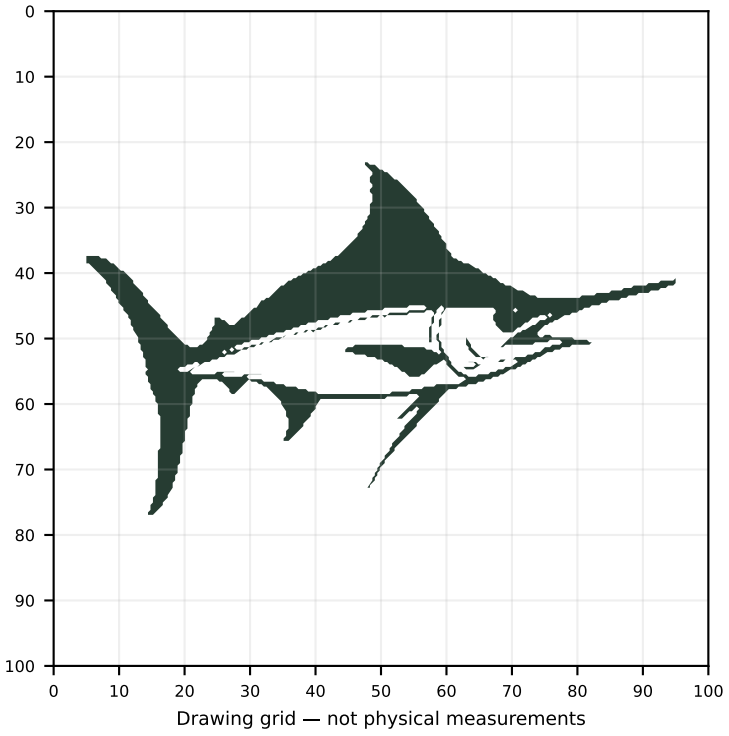

ANSWER: Example solution: preserve long pointed bill extending from the snout, tall pointed dorsal fin with visible fin rays, streamlined body with a forked tail and pectoral fin.
Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw the streamlined body outline as a long tapered oval, then add the long pointed bill at the front.
2. Add the tall triangular dorsal fin on top and the forked tail at the rear.
3. Place the pectoral fin on the side and the small anal fin near the tail base.
4. Outline the eye and mouth line, then add fin-ray lines inside the dorsal and tail fins.

How to Draw Marlin — Free Practice Sheets

ANSWER / CASE 4

marlin: Complete the blank right-hand portion using the full reference. Compare with the separate full reference sheet.

ANSWER: Example solution: preserve long pointed bill extending from the snout, tall pointed dorsal fin with visible fin rays, streamlined body with a forked tail and pectoral fin.
Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw the streamlined body outline as a long tapered oval, then add the long pointed bill at the front.
2. Add the tall triangular dorsal fin on top and the forked tail at the rear.
3. Place the pectoral fin on the side and the small anal fin near the tail base.
4. Outline the eye and mouth line, then add fin-ray lines inside the dorsal and tail fins.
