How to Draw Fly — Free Practice Sheets

ANSWER / CASE 1

fly: Trace the reference outline, then practise the contour independently. Compare with the separate full reference sheet.

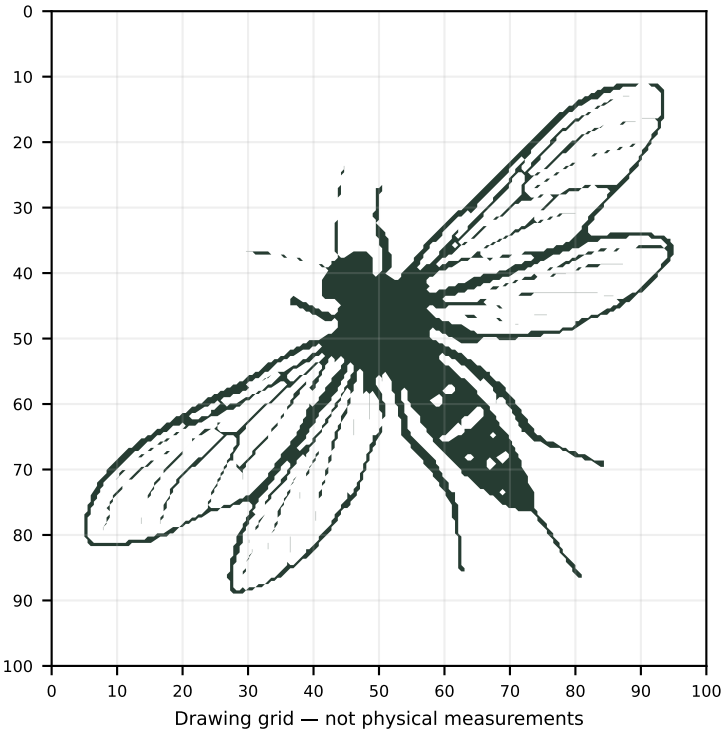

ANSWER: Example solution: preserve two large transparent wings with vein lines extending outward, dark rounded head with large compound eye area and short antennae, short segmented abdomen with visible banding and attached legs. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw the central body as a dark oval thorax with a smaller rounded head at the front and a tapered segmented abdomen behind.
2. Add two large wing shapes, one pair angled up-right and one pair angled down-left, and draw thin vein lines inside each wing.
3. Attach short, thin legs to the thorax/abdomen region, keeping the visible count to the natural set shown.
4. Outline the head with a large eye area and add short antennae, then darken the body while leaving the wings as line-only outlines.

ANSWER / CASE 2

fly: Copy the reference onto the blank grid, using matching grid intersections. Compare with the separate full reference sheet.

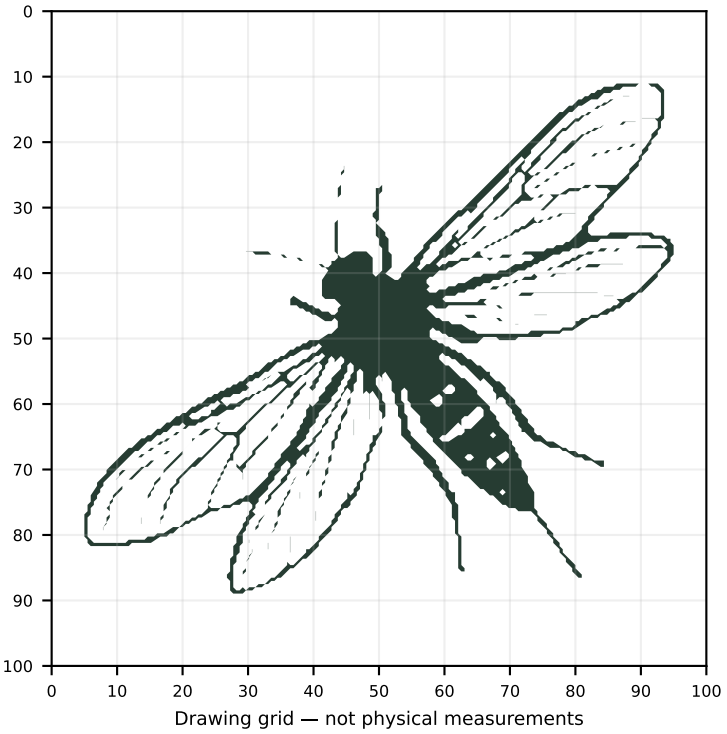

ANSWER: Example solution: preserve two large transparent wings with vein lines extending outward, dark rounded head with large compound eye area and short antennae, short segmented abdomen with visible banding and attached legs. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw the central body as a dark oval thorax with a smaller rounded head at the front and a tapered segmented abdomen behind.
2. Add two large wing shapes, one pair angled up-right and one pair angled down-left, and draw thin vein lines inside each wing.
3. Attach short, thin legs to the thorax/abdomen region, keeping the visible count to the natural set shown.
4. Outline the head with a large eye area and add short antennae, then darken the body while leaving the wings as line-only outlines.

ANSWER / CASE 3

fly: Use the bounding frame and center guide to place the silhouette, then add the identifying details. Compare with the separate full reference sheet.

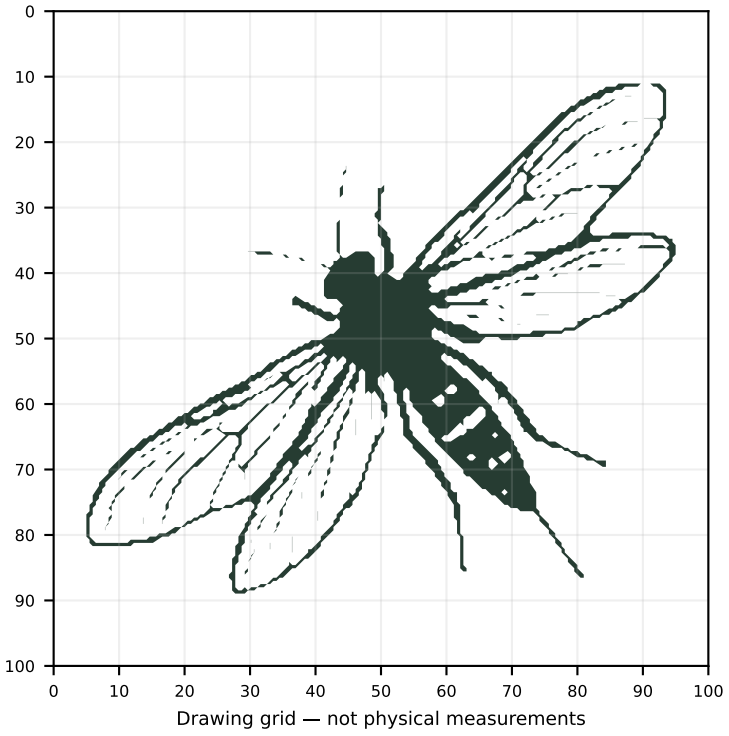

ANSWER: Example solution: preserve two large transparent wings with vein lines extending outward, dark rounded head with large compound eye area and short antennae, short segmented abdomen with visible banding and attached legs. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw the central body as a dark oval thorax with a smaller rounded head at the front and a tapered segmented abdomen behind.
2. Add two large wing shapes, one pair angled up-right and one pair angled down-left, and draw thin vein lines inside each wing.
3. Attach short, thin legs to the thorax/abdomen region, keeping the visible count to the natural set shown.
4. Outline the head with a large eye area and add short antennae, then darken the body while leaving the wings as line-only outlines.

How to Draw Fly — Free Practice Sheets

ANSWER / CASE 4

fly: Complete the blank right-hand portion using the full reference. Compare with the separate full reference sheet.

ANSWER: Example solution: preserve two large transparent wings with vein lines extending outward, dark rounded head with large compound eye area and short antennae, short segmented abdomen with visible banding and attached legs. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw the central body as a dark oval thorax with a smaller rounded head at the front and a tapered segmented abdomen behind.
2. Add two large wing shapes, one pair angled up-right and one pair angled down-left, and draw thin vein lines inside each wing.
3. Attach short, thin legs to the thorax/abdomen region, keeping the visible count to the natural set shown.
4. Outline the head with a large eye area and add short antennae, then darken the body while leaving the wings as line-only outlines.
