How to Draw Stag Beetle — Free Practice Sheets

ANSWER / CASE 1

stag beetle: Trace the reference outline, then practise the contour independently. Compare with the separate full reference sheet.

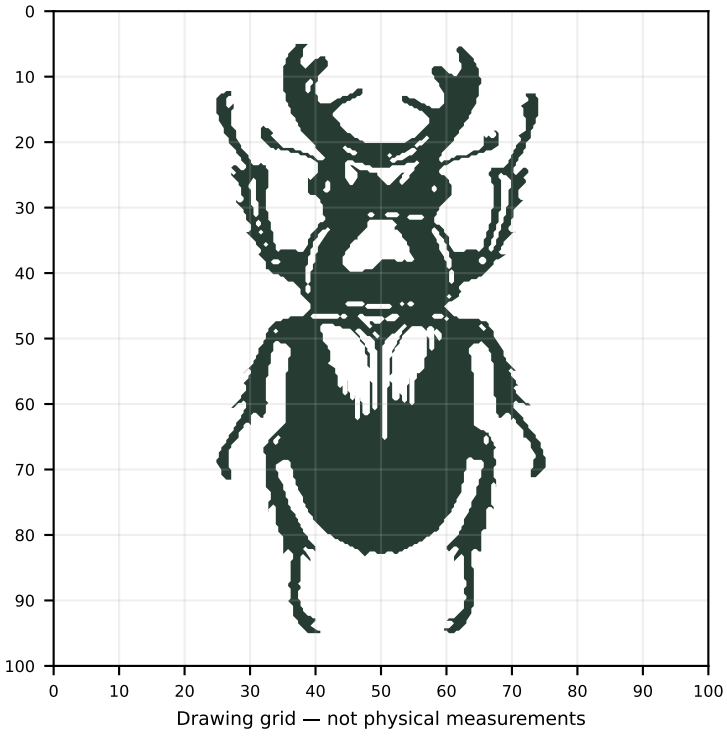

ANSWER: Example solution: preserve large branched mandibles at the head, segmented oval body with distinct head, thorax, and elytra, six jointed legs attached to the thorax. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw the head as a rounded trapezoid and add two large, curved mandibles with inner branches.
2. Sketch the thorax as a wide, rounded segment below the head, then draw the oval elytra with a vertical center line.
3. Attach three jointed legs to each side of the thorax, angling them outward and downward.
4. Outline the mandibles, body segments, and legs with clean lines, then add simple shading or line details to define the elytra and leg joints.

ANSWER / CASE 2

stag beetle: Copy the reference onto the blank grid, using matching grid intersections. Compare with the separate full reference sheet.

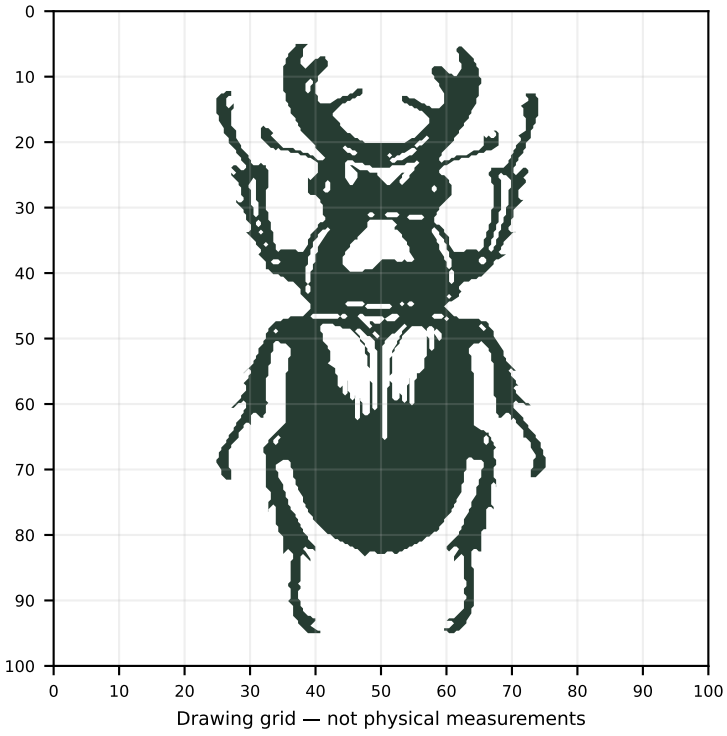

ANSWER: Example solution: preserve large branched mandibles at the head, segmented oval body with distinct head, thorax, and elytra, six jointed legs attached to the thorax. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw the head as a rounded trapezoid and add two large, curved mandibles with inner branches.
2. Sketch the thorax as a wide, rounded segment below the head, then draw the oval elytra with a vertical center line.
3. Attach three jointed legs to each side of the thorax, angling them outward and downward.
4. Outline the mandibles, body segments, and legs with clean lines, then add simple shading or line details to define the elytra and leg joints.

ANSWER / CASE 3

stag beetle: Use the bounding frame and center guide to place the silhouette, then add the identifying details. Compare with the separate full reference sheet.

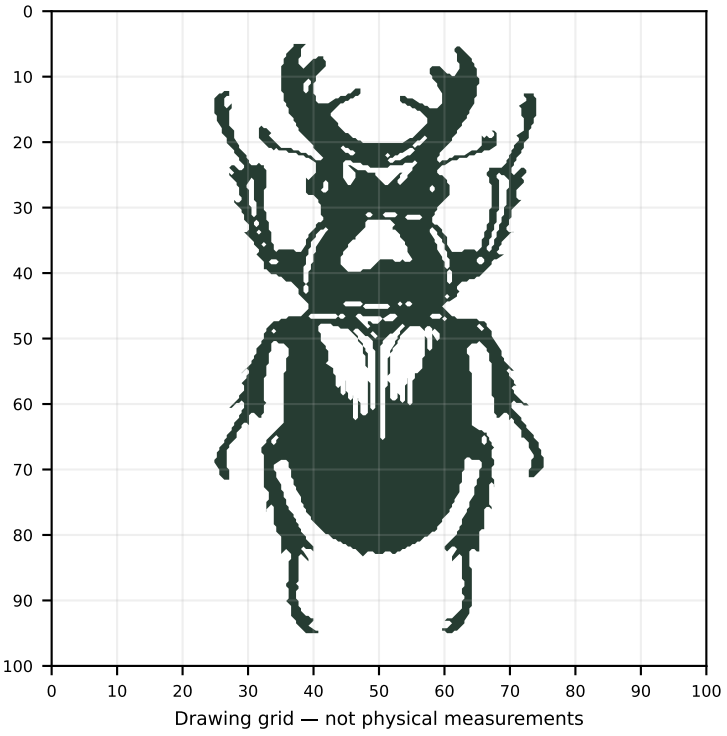

ANSWER: Example solution: preserve large branched mandibles at the head, segmented oval body with distinct head, thorax, and elytra, six jointed legs attached to the thorax. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw the head as a rounded trapezoid and add two large, curved mandibles with inner branches.
2. Sketch the thorax as a wide, rounded segment below the head, then draw the oval elytra with a vertical center line.
3. Attach three jointed legs to each side of the thorax, angling them outward and downward.
4. Outline the mandibles, body segments, and legs with clean lines, then add simple shading or line details to define the elytra and leg joints.

How to Draw Stag Beetle — Free Practice Sheets

ANSWER / CASE 4

stag beetle: Complete the blank right-hand portion using the full reference. Compare with the separate full reference sheet.

ANSWER: Example solution: preserve large branched mandibles at the head, segmented oval body with distinct head, thorax, and elytra, six jointed legs attached to the thorax. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw the head as a rounded trapezoid and add two large, curved mandibles with inner branches.
2. Sketch the thorax as a wide, rounded segment below the head, then draw the oval elytra with a vertical center line.
3. Attach three jointed legs to each side of the thorax, angling them outward and downward.
4. Outline the mandibles, body segments, and legs with clean lines, then add simple shading or line details to define the elytra and leg joints.
