How to Draw Cricket — Free Practice Sheets

ANSWER / CASE 1

cricket: Trace the reference outline, then practise the contour independently. Compare with the separate full reference sheet.

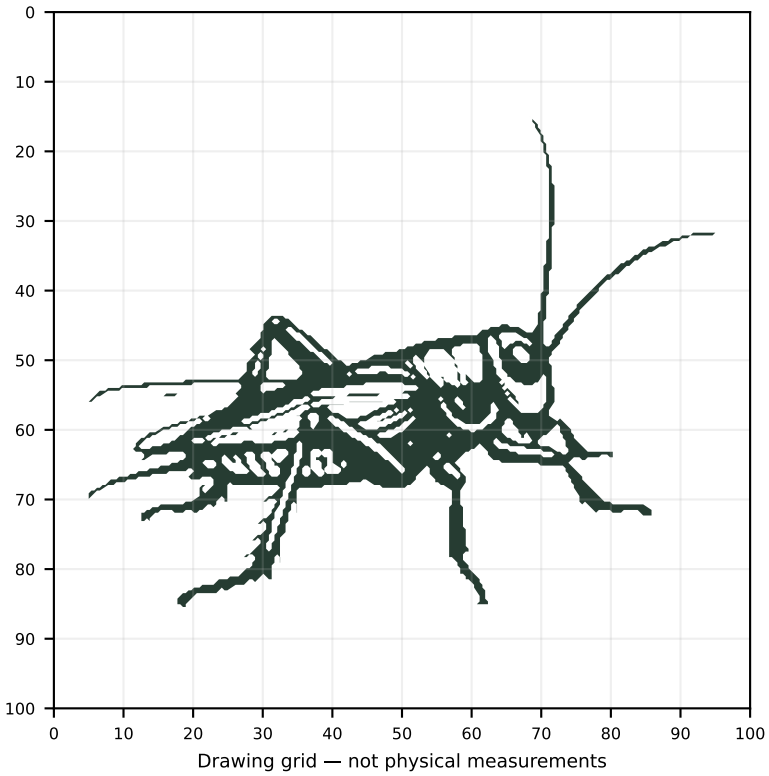

ANSWER: Example solution: preserve long hind legs with spiny tibiae, two long antennae extending from the head, folded wings lying flat over the abdomen. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw the elongated oval body with a distinct head, pronotum, and abdomen, then add the folded wing shape over the back.
2. Add two long antennae from the head and the large eye.
3. Draw the six legs: two short front legs, two middle legs, and two long hind legs with visible spines.
4. Outline the leg segments and body with clean lines, then add simple shading to define the wing veins and body segments.

ANSWER / CASE 3

cricket: Use the bounding frame and center guide to place the silhouette, then add the identifying details. Compare with the separate full reference sheet.

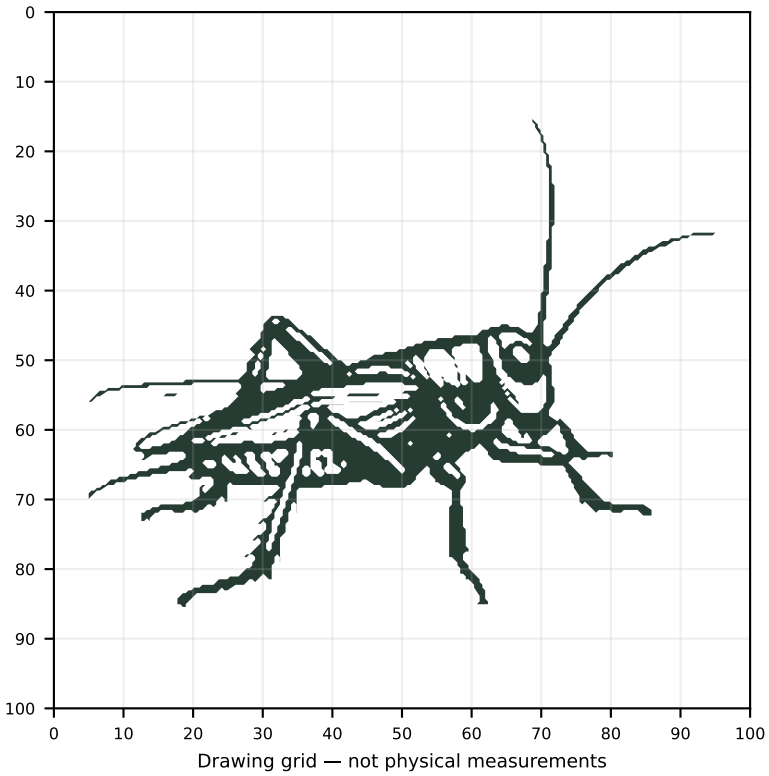

ANSWER: Example solution: preserve long hind legs with spiny tibiae, two long antennae extending from the head, folded wings lying flat over the abdomen. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw the elongated oval body with a distinct head, pronotum, and abdomen, then add the folded wing shape over the back.
2. Add two long antennae from the head and the large eye.
3. Draw the six legs: two short front legs, two middle legs, and two long hind legs with visible spines.
4. Outline the leg segments and body with clean lines, then add simple shading to define the wing veins and body segments.

How to Draw Cricket — Free Practice Sheets

ANSWER / CASE 4

cricket: Complete the blank right-hand portion using the full reference. Compare with the separate full reference sheet.

ANSWER: Example solution: preserve long hind legs with spiny tibiae, two long antennae extending from the head, folded wings lying flat over the abdomen. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw the elongated oval body with a distinct head, pronotum, and abdomen, then add the folded wing shape over the back.
2. Add two long antennae from the head and the large eye.
3. Draw the six legs: two short front legs, two middle legs, and two long hind legs with visible spines.
4. Outline the leg segments and body with clean lines, then add simple shading to define the wing veins and body segments.
