How to Draw Flounder — Free Practice Sheets

ANSWER / CASE 1

flounder: Trace the reference outline, then practise the contour independently. Compare with the separate full reference sheet.

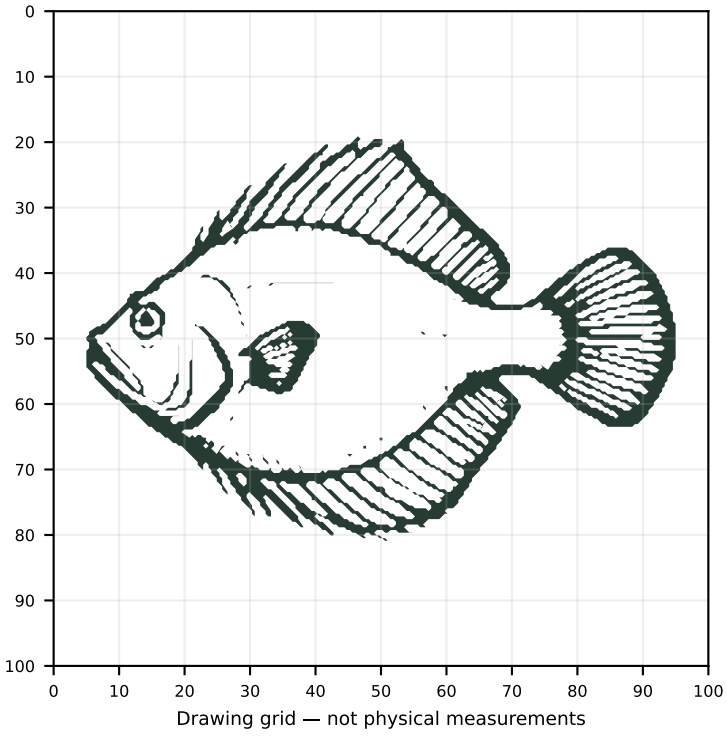

ANSWER: Example solution: preserve flat oval body, both eyes on one side of the head, fanned dorsal, anal, and caudal fins. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a large flattened oval for the body, tapering toward the tail.
2. Add a rounded head at the left with both eyes placed on the visible upper side.
3. Attach a long fanned dorsal fin along the top and a matching fanned anal fin along the bottom.
4. Draw a fan-shaped caudal fin at the rear and a small pectoral fin on the side near the gills.

ANSWER / CASE 2

flounder: Copy the reference onto the blank grid, using matching grid intersections. Compare with the separate full reference sheet.

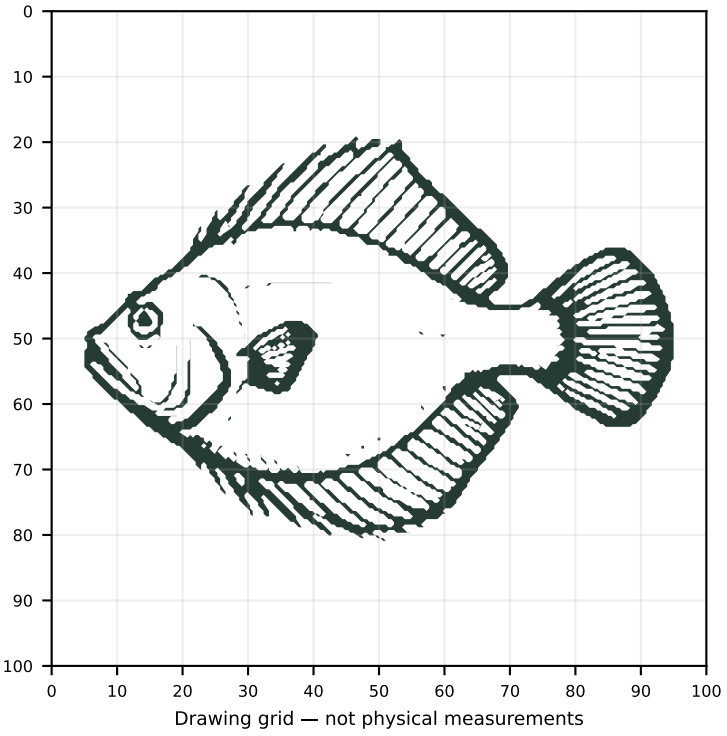

ANSWER: Example solution: preserve flat oval body, both eyes on one side of the head, fanned dorsal, anal, and caudal fins. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a large flattened oval for the body, tapering toward the tail.
2. Add a rounded head at the left with both eyes placed on the visible upper side.
3. Attach a long fanned dorsal fin along the top and a matching fanned anal fin along the bottom.
4. Draw a fan-shaped caudal fin at the rear and a small pectoral fin on the side near the gills.

ANSWER / CASE 3

flounder: Use the bounding frame and center guide to place the silhouette, then add the identifying details. Compare with the separate full reference sheet.

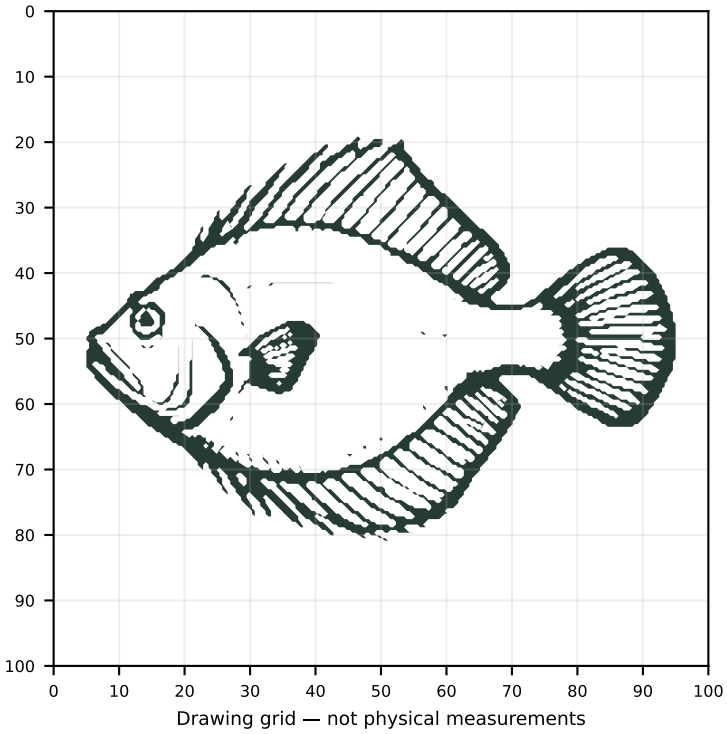

ANSWER: Example solution: preserve flat oval body, both eyes on one side of the head, fanned dorsal, anal, and caudal fins. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a large flattened oval for the body, tapering toward the tail.
2. Add a rounded head at the left with both eyes placed on the visible upper side.
3. Attach a long fanned dorsal fin along the top and a matching fanned anal fin along the bottom.
4. Draw a fan-shaped caudal fin at the rear and a small pectoral fin on the side near the gills.

How to Draw Flounder — Free Practice Sheets

ANSWER / CASE 4

flounder: Complete the blank right-hand portion using the full reference. Compare with the separate full reference sheet.

ANSWER: Example solution: preserve flat oval body, both eyes on one side of the head, fanned dorsal, anal, and caudal fins. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a large flattened oval for the body, tapering toward the tail.
2. Add a rounded head at the left with both eyes placed on the visible upper side.
3. Attach a long fanned dorsal fin along the top and a matching fanned anal fin along the bottom.
4. Draw a fan-shaped caudal fin at the rear and a small pectoral fin on the side near the gills.
