How to Draw Lanternfish — Free Practice Sheets

ANSWER / CASE 1

lanternfish: Trace the reference outline, then practise the contour independently. Compare with the separate full reference sheet.

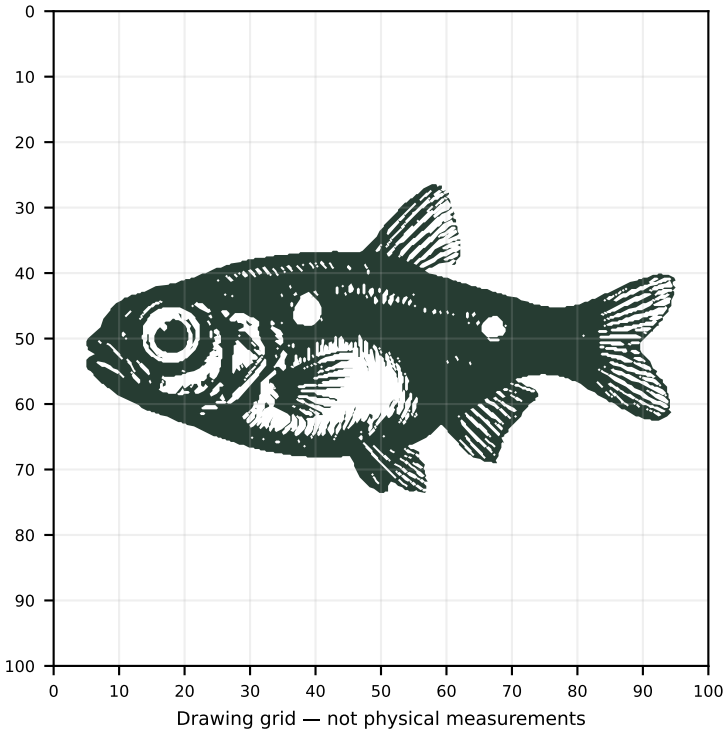

ANSWER: Example solution: preserve large round eye, compact deep body with small fins, glowing photophores along the belly and flank. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw the compact, deep oval body outline with a rounded head and tapering tail.
2. Add the large circular eye near the front of the head and the small mouth.
3. Sketch the small dorsal, pectoral, pelvic, anal, and caudal fins attached to the body.
4. Mark the round photophores along the lower belly and flank, then add line shading for the dark body.

ANSWER / CASE 2

lanternfish: Copy the reference onto the blank grid, using matching grid intersections. Compare with the separate full reference sheet.

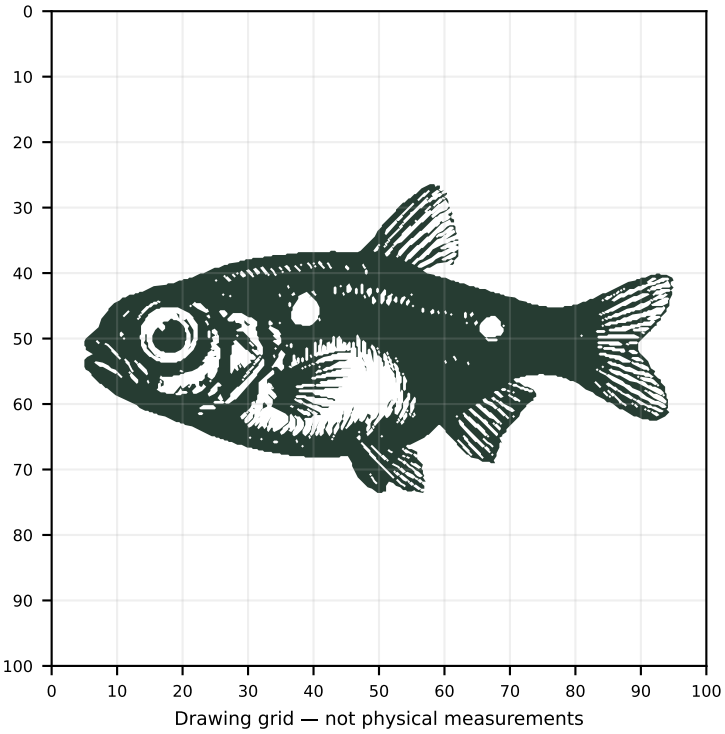

Drawing grid — not physical measurements

ANSWER: Example solution: preserve large round eye, compact deep body with small fins, glowing photophores along the belly and flank. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw the compact, deep oval body outline with a rounded head and tapering tail.
2. Add the large circular eye near the front of the head and the small mouth.
3. Sketch the small dorsal, pectoral, pelvic, anal, and caudal fins attached to the body.
4. Mark the round photophores along the lower belly and flank, then add line shading for the dark body.

ANSWER / CASE 3

lanternfish: Use the bounding frame and center guide to place the silhouette, then add the identifying details. Compare with the separate full reference sheet.

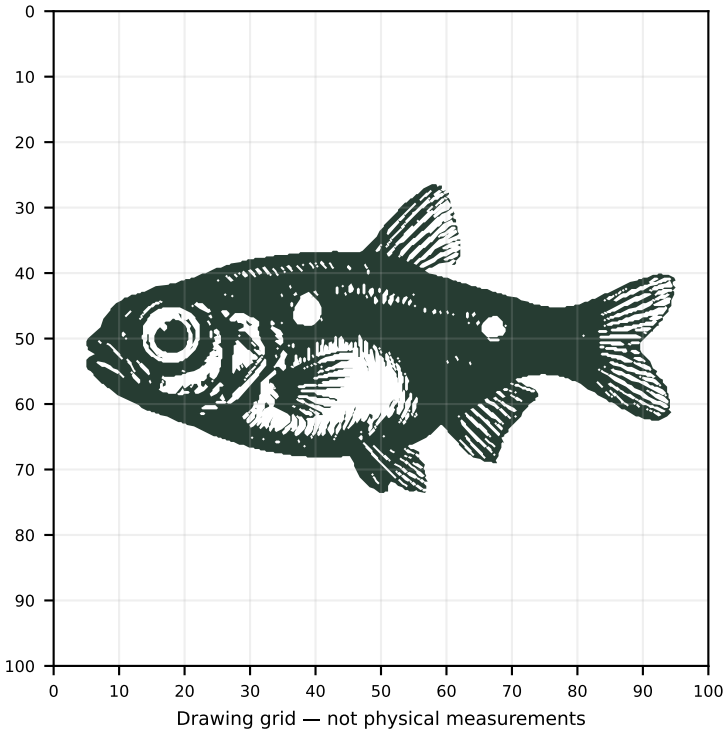

ANSWER: Example solution: preserve large round eye, compact deep body with small fins, glowing photophores along the belly and flank. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw the compact, deep oval body outline with a rounded head and tapering tail.
2. Add the large circular eye near the front of the head and the small mouth.
3. Sketch the small dorsal, pectoral, pelvic, anal, and caudal fins attached to the body.
4. Mark the round photophores along the lower belly and flank, then add line shading for the dark body.

How to Draw Lanternfish — Free Practice Sheets

ANSWER / CASE 4

lanternfish: Complete the blank right-hand portion using the full reference. Compare with the separate full reference sheet.

ANSWER: Example solution: preserve large round eye, compact deep body with small fins, glowing photophores along the belly and flank. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw the compact, deep oval body outline with a rounded head and tapering tail.
2. Add the large circular eye near the front of the head and the small mouth.
3. Sketch the small dorsal, pectoral, pelvic, anal, and caudal fins attached to the body.
4. Mark the round photophores along the lower belly and flank, then add line shading for the dark body.
