How to Draw Dragonfly — Free Practice Sheets

ANSWER / CASE 1

dragonfly: Trace the reference outline, then practise the contour independently. Compare with the separate full reference sheet.

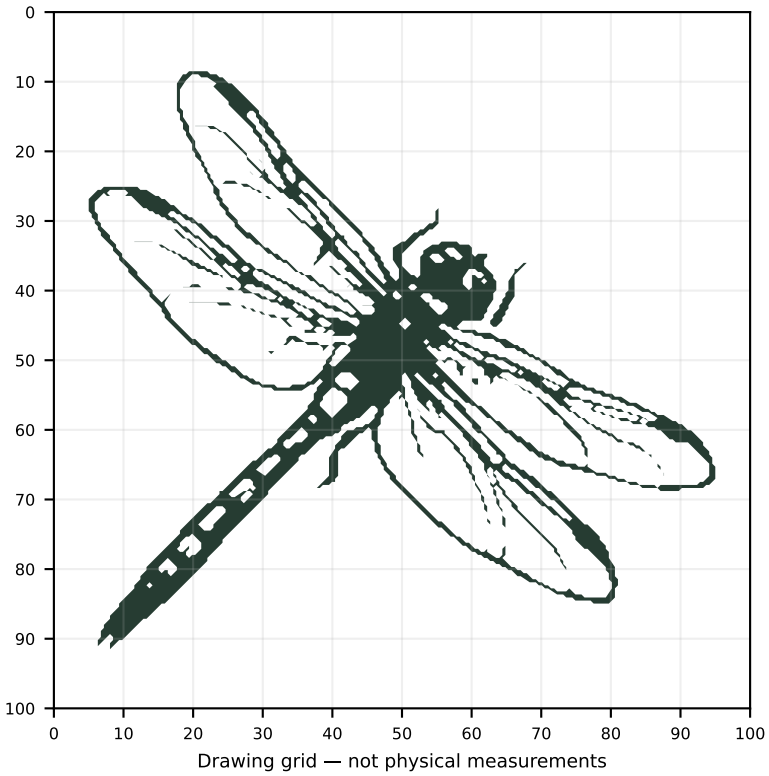

ANSWER: Example solution: preserve four long wings with dark wingtips, thin segmented body with striped abdomen, large compound eyes on a rounded head. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw the central axis: a small rounded head, a thicker thorax, and a long segmented abdomen tapering to a point.
2. Attach four elongated wings to the thorax, two on each side, with rounded tips and dark end spots.
3. Add the large compound eyes on the head and the thin legs extending from the thorax.
4. Outline the wing veins and segment markings on the abdomen to complete the line drawing.
