How to Draw Starfish — Free Practice Sheets

ANSWER / CASE 1

starfish: Trace the reference outline, then practise the contour independently. Compare with the separate full reference sheet.

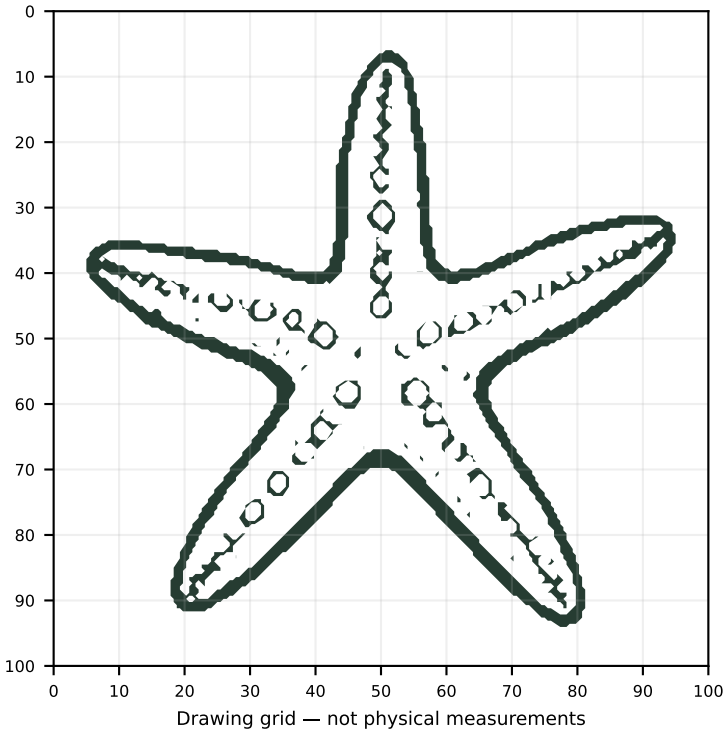

ANSWER: Example solution: preserve five distinct arms radiating from a central body, radial symmetry with arms spaced evenly around the center, textured surface shown by rows of small circles and dotted lines along each arm. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a small central pentagon or circle to mark the body center.
2. Draw five tapering arms radiating outward from the center at roughly equal angles.
3. Outline each arm with a thick border and add a row of small circles down the middle of each arm.
4. Add dotted lines and small marks along the sides of the arms to suggest the textured surface.

How to Draw Starfish — Free Practice Sheets

ANSWER / CASE 2

starfish: Copy the reference onto the blank grid, using matching grid intersections. Compare with the separate full reference sheet.

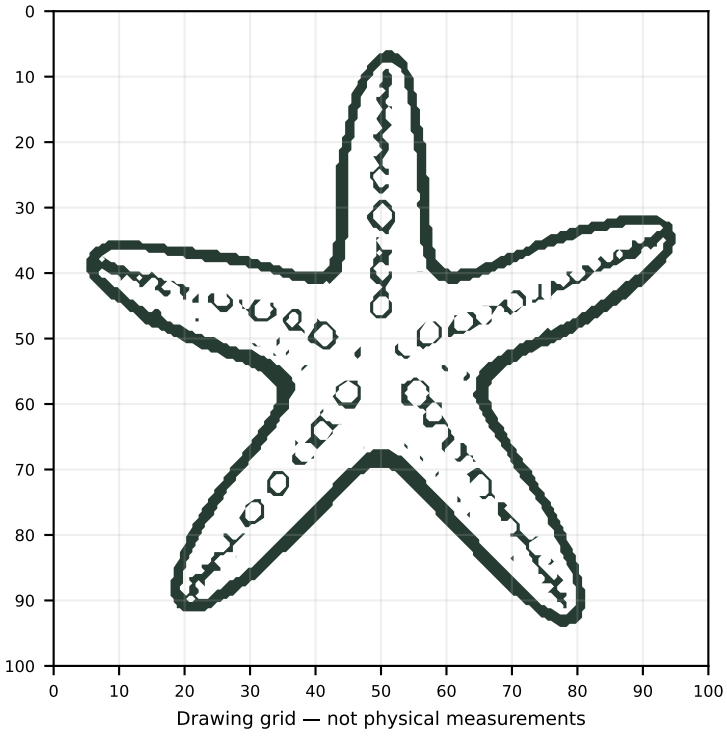

ANSWER: Example solution: preserve five distinct arms radiating from a central body, radial symmetry with arms spaced evenly around the center, textured surface shown by rows of small circles and dotted lines along each arm. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a small central pentagon or circle to mark the body center.
2. Draw five tapering arms radiating outward from the center at roughly equal angles.
3. Outline each arm with a thick border and add a row of small circles down the middle of each arm.
4. Add dotted lines and small marks along the sides of the arms to suggest the textured surface.

ANSWER / CASE 3

starfish: Use the bounding frame and center guide to place the silhouette, then add the identifying details. Compare with the separate full reference sheet.

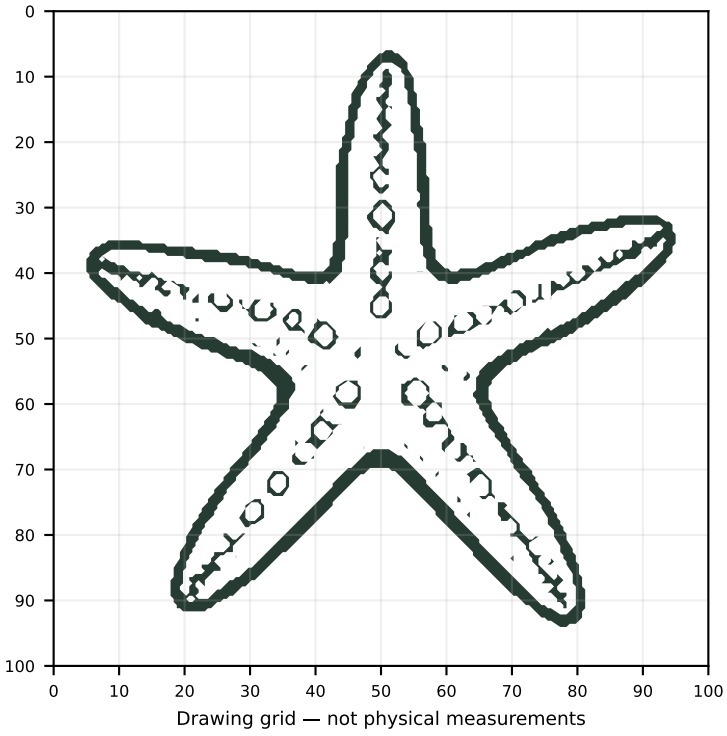

ANSWER: Example solution: preserve five distinct arms radiating from a central body, radial symmetry with arms spaced evenly around the center, textured surface shown by rows of small circles and dotted lines along each arm. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a small central pentagon or circle to mark the body center.
2. Draw five tapering arms radiating outward from the center at roughly equal angles.
3. Outline each arm with a thick border and add a row of small circles down the middle of each arm.
4. Add dotted lines and small marks along the sides of the arms to suggest the textured surface.

How to Draw Starfish — Free Practice Sheets

ANSWER / CASE 4

starfish: Complete the blank right-hand portion using the full reference. Compare with the separate full reference sheet.

ANSWER: Example solution: preserve five distinct arms radiating from a central body, radial symmetry with arms spaced evenly around the center, textured surface shown by rows of small circles and dotted lines along each arm. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a small central pentagon or circle to mark the body center.
2. Draw five tapering arms radiating outward from the center at roughly equal angles.
3. Outline each arm with a thick border and add a row of small circles down the middle of each arm.
4. Add dotted lines and small marks along the sides of the arms to suggest the textured surface.
