How to Draw Mosquito — Free Practice Sheets

REFERENCE / CASE 1

mosquito: Trace the reference outline, then practise the contour independently. Compare with the separate full reference sheet.

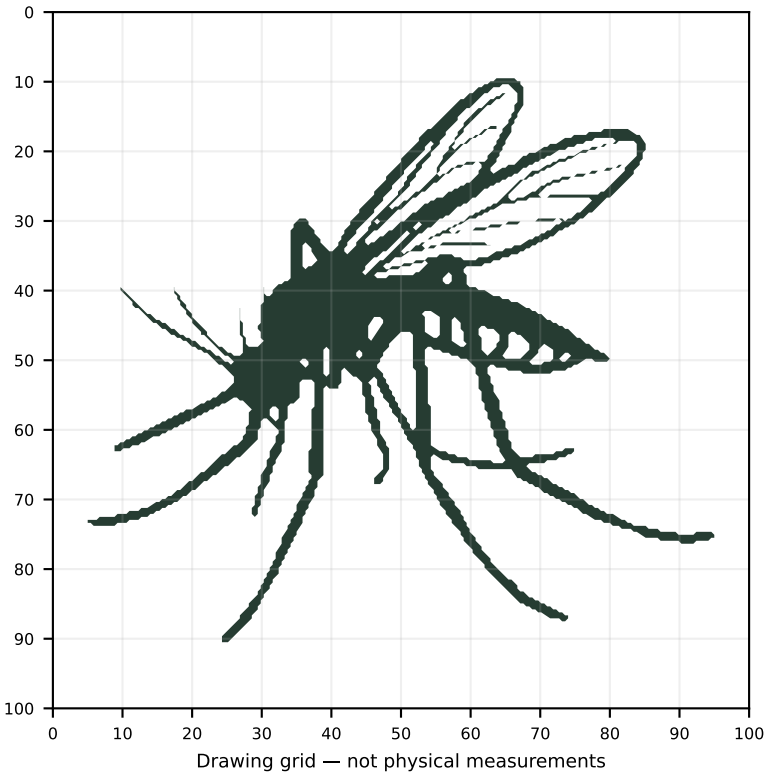

METHOD: Draw the elongated segmented abdomen as a tapered oval pointing to the right. Add the thorax as a rounded mass at the front of the abdomen and attach the head with a long thin proboscis and antennae. Draw two narrow wings with vein lines extending upward and back from the thorax. Attach six long thin legs to the thorax, bending them at joints and spreading them outward.
Use the separate practice sheet before checking the answer.

REFERENCE / CASE 2

mosquito: Copy the reference onto the blank grid, using matching grid intersections.
Compare with the separate full reference sheet.

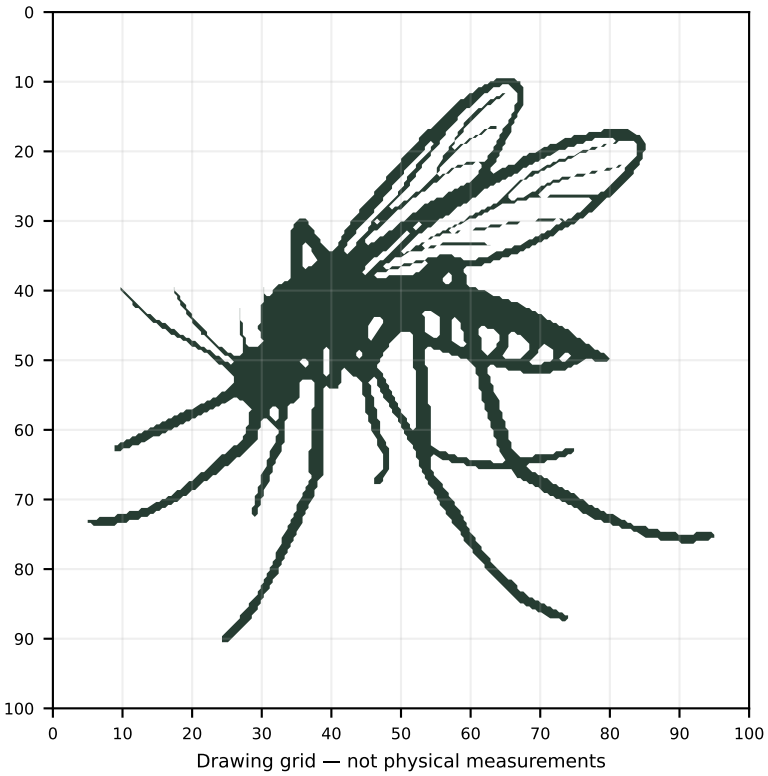

METHOD: Draw the elongated segmented abdomen as a tapered oval pointing to the right. Add the thorax as a rounded mass at the front of the abdomen and attach the head with a long thin proboscis and antennae. Draw two narrow wings with vein lines extending upward and back from the thorax. Attach six long thin legs to the thorax, bending them at joints and spreading them outward.
Use the separate practice sheet before checking the answer.

How to Draw Mosquito — Free Practice Sheets

REFERENCE / CASE 3

mosquito: Use the bounding frame and center guide to place the silhouette, then add the identifying details. Compare with the separate full reference sheet.

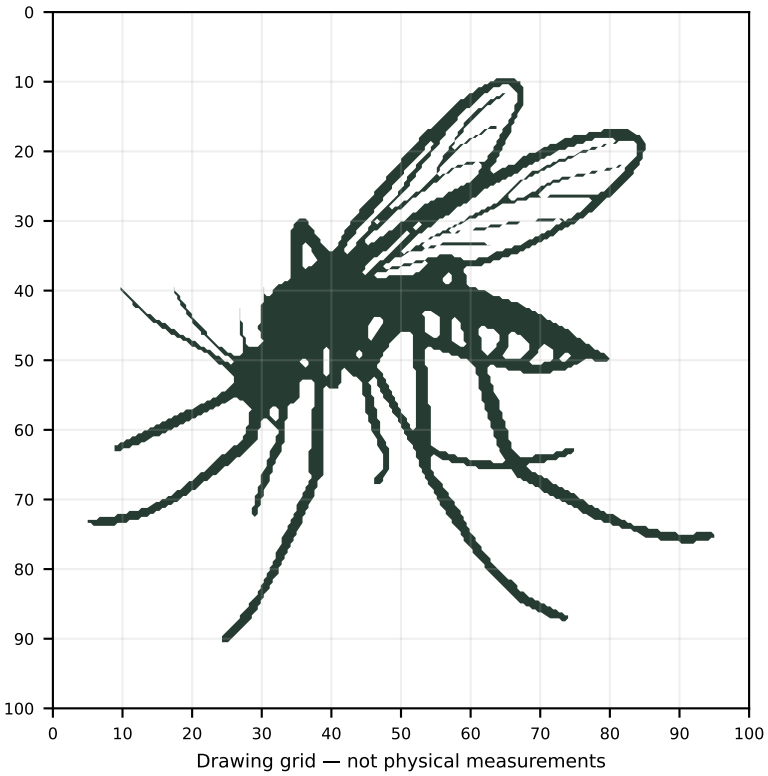

METHOD: Draw the elongated segmented abdomen as a tapered oval pointing to the right. Add the thorax as a rounded mass at the front of the abdomen and attach the head with a long thin proboscis and antennae. Draw two narrow wings with vein lines extending upward and back from the thorax. Attach six long thin legs to the thorax, bending them at joints and spreading them outward.
Use the separate practice sheet before checking the answer.

How to Draw Mosquito — Free Practice Sheets

REFERENCE / CASE 4

mosquito: Complete the blank right-hand portion using the full reference. Compare with the separate full reference sheet.

METHOD: Draw the elongated segmented abdomen as a tapered oval pointing to the right. Add the thorax as a rounded mass at the front of the abdomen and attach the head with a long thin proboscis and antennae. Draw two narrow wings with vein lines extending upward and back from the thorax. Attach six long thin legs to the thorax, bending them at joints and spreading them outward.
Use the separate practice sheet before checking the answer.
