How to Draw Weevil — Free Practice Sheets

ANSWER / CASE 1

weevil: Trace the reference outline, then practise the contour independently. Compare with the separate full reference sheet.

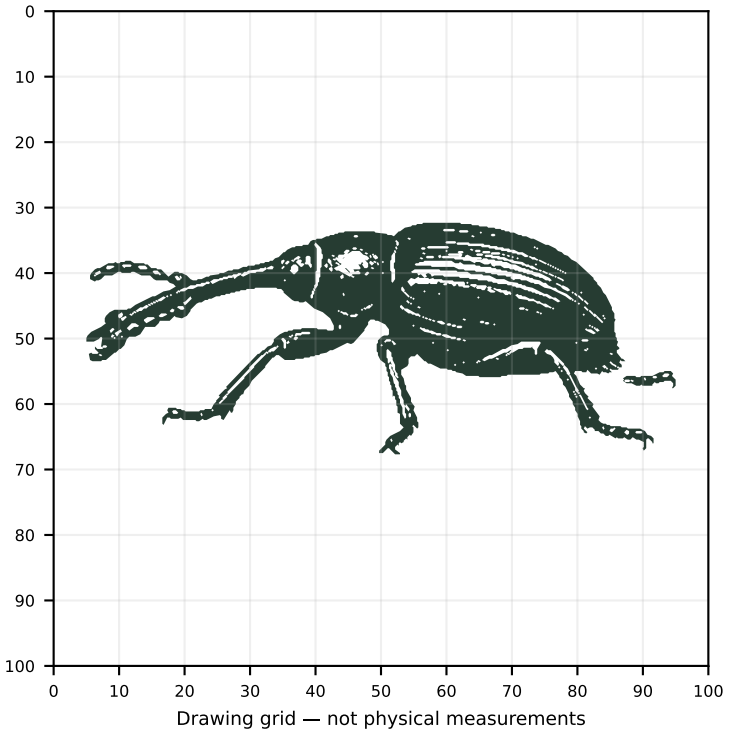

ANSWER: Example solution: preserve long downward-curving snout, oval body with longitudinal ridges/segments, elbowed antennae extending from the snout. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw the elongated, downward-curving snout as the leftmost feature.
2. Attach the oval, ridged body behind the head, with the pronotum separated from the abdomen.
3. Add the elbowed antennae extending from the snout, showing the bend.
4. Draw the legs attached to the underside of the body, keeping the visible count consistent.
