How to Draw Monarch Caterpillar — Free Practice Sheets

ANSWER / CASE 1

monarch caterpillar: Trace the reference outline, then practise the contour independently. Compare with the separate full reference sheet.

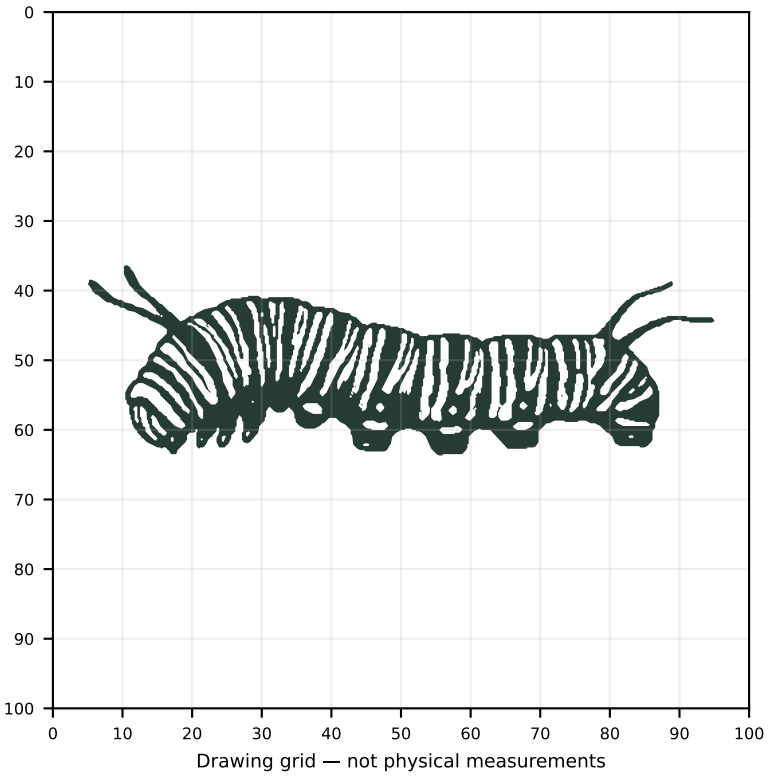

ANSWER: Example solution: preserve segmented body with alternating dark and light bands, two pairs of antenna-like filaments, one at the head and one at the rear, small prolegs visible along the underside. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a long, slightly arched body outline with a rounded head at the left and a tapered rear at the right.
2. Add two pairs of thin antenna-like filaments: one pair extending from the head and one pair from the rear.
3. Divide the body into segments using curved vertical lines that follow the body contour.
4. Add small prolegs along the underside and fill the band pattern with alternating dark and light stripes.

How to Draw Monarch Caterpillar — Free Practice Sheets

ANSWER / CASE 2

monarch caterpillar: Copy the reference onto the blank grid, using matching grid intersections. Compare with the separate full reference sheet.

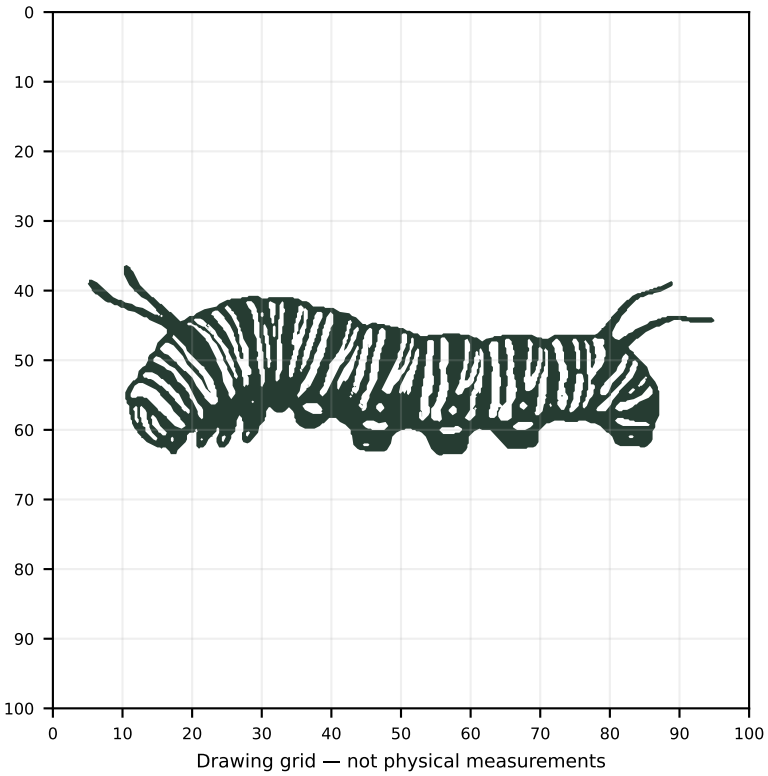

ANSWER: Example solution: preserve segmented body with alternating dark and light bands, two pairs of antenna-like filaments, one at the head and one at the rear, small prolegs visible along the underside. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a long, slightly arched body outline with a rounded head at the left and a tapered rear at the right.
2. Add two pairs of thin antenna-like filaments: one pair extending from the head and one pair from the rear.
3. Divide the body into segments using curved vertical lines that follow the body contour.
4. Add small prolegs along the underside and fill the band pattern with alternating dark and light stripes.

ANSWER / CASE 3

monarch caterpillar: Use the bounding frame and center guide to place the silhouette, then add the identifying details. Compare with the separate full reference sheet.

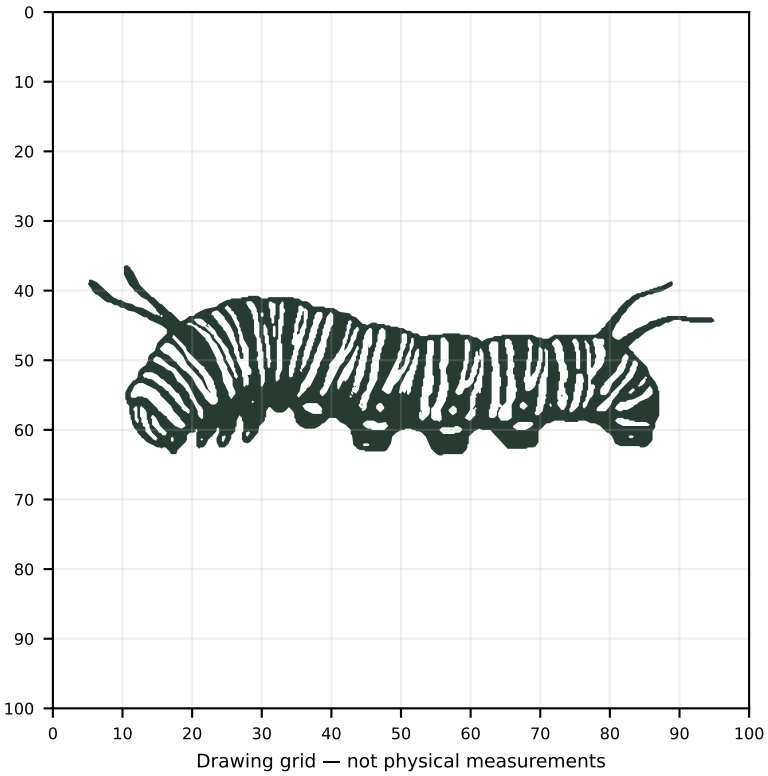

ANSWER: Example solution: preserve segmented body with alternating dark and light bands, two pairs of antenna-like filaments, one at the head and one at the rear, small prolegs visible along the underside. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a long, slightly arched body outline with a rounded head at the left and a tapered rear at the right.
2. Add two pairs of thin antenna-like filaments: one pair extending from the head and one pair from the rear.
3. Divide the body into segments using curved vertical lines that follow the body contour.
4. Add small prolegs along the underside and fill the band pattern with alternating dark and light stripes.

How to Draw Monarch Caterpillar — Free Practice Sheets

ANSWER / CASE 4

monarch caterpillar: Complete the blank right-hand portion using the full reference. Compare with the separate full reference sheet.

ANSWER: Example solution: preserve segmented body with alternating dark and light bands, two pairs of antenna-like filaments, one at the head and one at the rear, small prolegs visible along the underside. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a long, slightly arched body outline with a rounded head at the left and a tapered rear at the right.
2. Add two pairs of thin antenna-like filaments: one pair extending from the head and one pair from the rear.
3. Divide the body into segments using curved vertical lines that follow the body contour.
4. Add small prolegs along the underside and fill the band pattern with alternating dark and light stripes.
