How to Draw Crested Gecko — Free Practice Sheets

ANSWER / CASE 1

crested gecko: Trace the reference outline, then practise the contour independently. Compare with the separate full reference sheet.

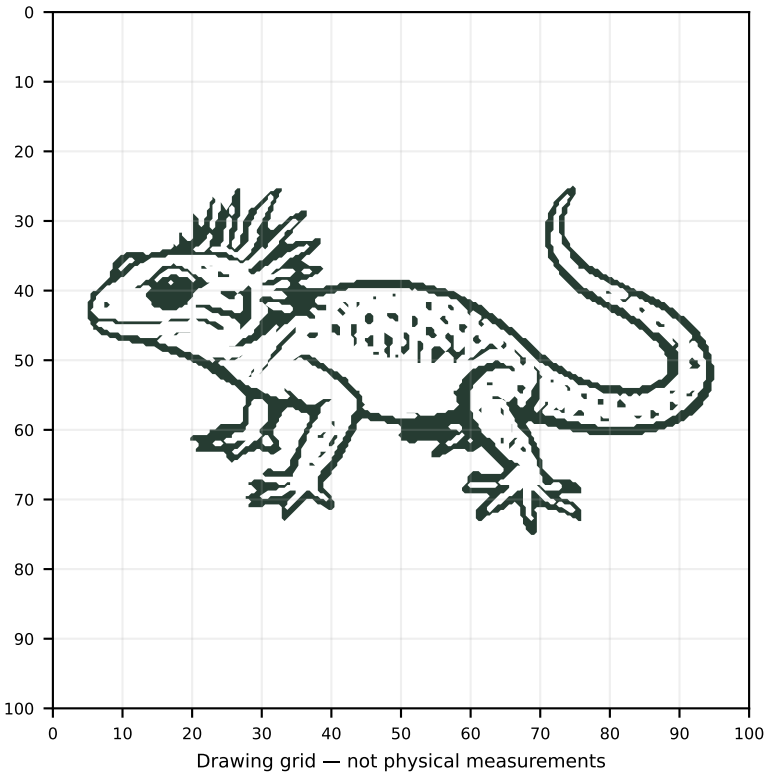

ANSWER: Example solution: preserve triangular head with spiky crest ridges running from above the eye to the neck, sticky toe pads visible as widened, fan-like tips on the toes, tapered prehensile tail that curls upward at the end. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw the triangular head with a rounded snout and large eye, then add the spiky crest ridges along the top of the head and neck.
2. Sketch the elongated body outline with a spotted back, connecting the neck to the base of the tail.
3. Add four legs with widened toe pads, positioning the front and rear limbs under the body.
4. Draw the long tapered tail curving upward and add small spots along the tail and body.
