How to Draw Lanternfly — Free Practice Sheets

ANSWER / CASE 1

lanternfly: Trace the reference outline, then practise the contour independently. Compare with the separate full reference sheet.

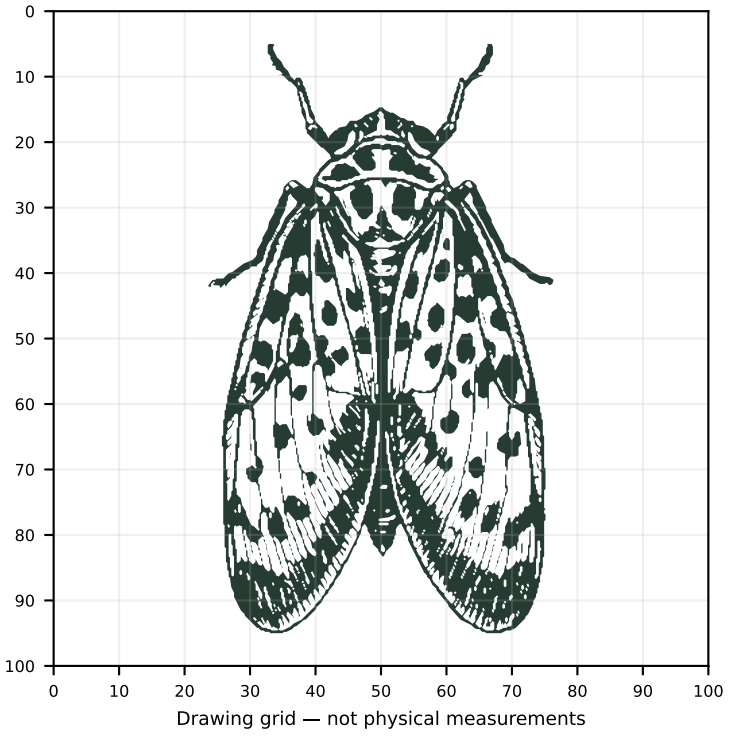

ANSWER: Example solution: preserve spotted forewings with dark spots on a pale field, wings held in a folded tent-like posture over the body, bright hindwing patches suggested by patterned lower wing areas. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a vertical central axis and sketch the head, thorax, and abdomen as stacked ovals.
2. Add the folded tent-like forewings as two long, rounded shapes meeting along the midline.
3. Place dark spots across the forewings and add patterned patches near the lower hindwing areas.
4. Attach three legs per side to the thorax and add antennae from the head.

How to Draw Lanternfly — Free Practice Sheets

ANSWER / CASE 2

lanternfly: Copy the reference onto the blank grid, using matching grid intersections. Compare with the separate full reference sheet.

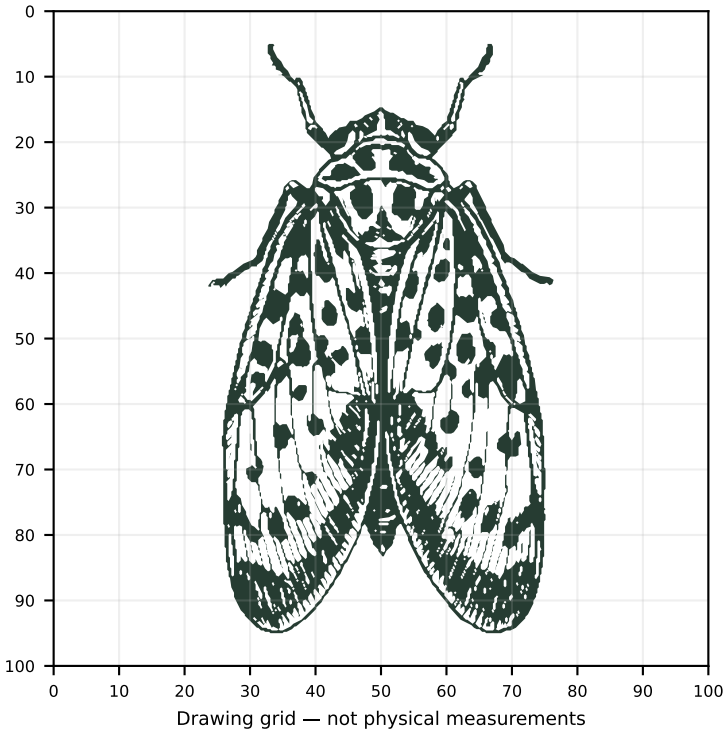

ANSWER: Example solution: preserve spotted forewings with dark spots on a pale field, wings held in a folded tent-like posture over the body, bright hindwing patches suggested by patterned lower wing areas. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a vertical central axis and sketch the head, thorax, and abdomen as stacked ovals.
2. Add the folded tent-like forewings as two long, rounded shapes meeting along the midline.
3. Place dark spots across the forewings and add patterned patches near the lower hindwing areas.
4. Attach three legs per side to the thorax and add antennae from the head.

ANSWER / CASE 3

lanternfly: Use the bounding frame and center guide to place the silhouette, then add the identifying details. Compare with the separate full reference sheet.

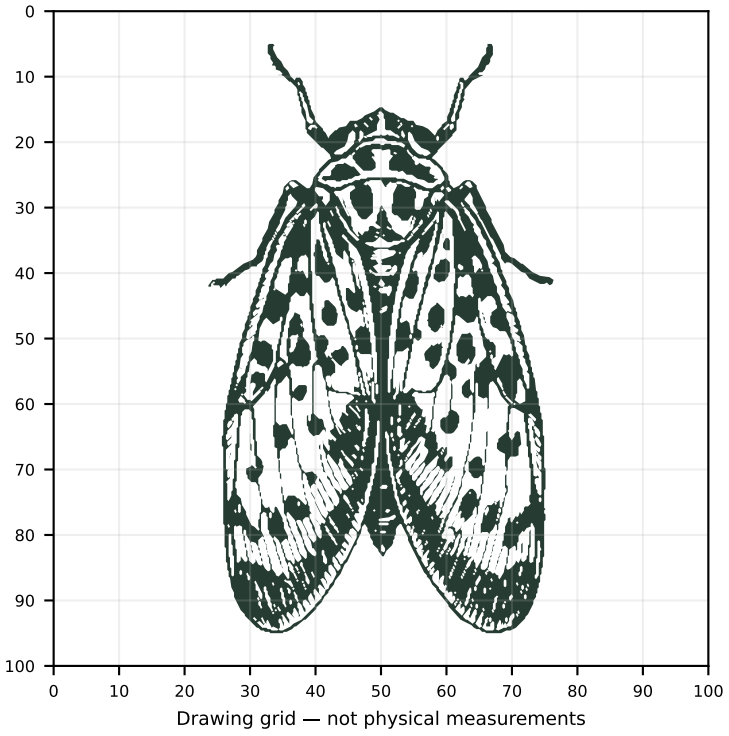

ANSWER: Example solution: preserve spotted forewings with dark spots on a pale field, wings held in a folded tent-like posture over the body, bright hindwing patches suggested by patterned lower wing areas. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a vertical central axis and sketch the head, thorax, and abdomen as stacked ovals.
2. Add the folded tent-like forewings as two long, rounded shapes meeting along the midline.
3. Place dark spots across the forewings and add patterned patches near the lower hindwing areas.
4. Attach three legs per side to the thorax and add antennae from the head.

How to Draw Lanternfly — Free Practice Sheets

ANSWER / CASE 4

lanternfly: Complete the blank right-hand portion using the full reference. Compare with the separate full reference sheet.

ANSWER: Example solution: preserve spotted forewings with dark spots on a pale field, wings held in a folded tent-like posture over the body, bright hindwing patches suggested by patterned lower wing areas. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a vertical central axis and sketch the head, thorax, and abdomen as stacked ovals.
2. Add the folded tent-like forewings as two long, rounded shapes meeting along the midline.
3. Place dark spots across the forewings and add patterned patches near the lower hindwing areas.
4. Attach three legs per side to the thorax and add antennae from the head.
