How to Draw Pyroraptor — Free Practice Sheets

ANSWER / CASE 1

pyroraptor: Trace the reference outline, then practise the contour independently. Compare with the separate full reference sheet.

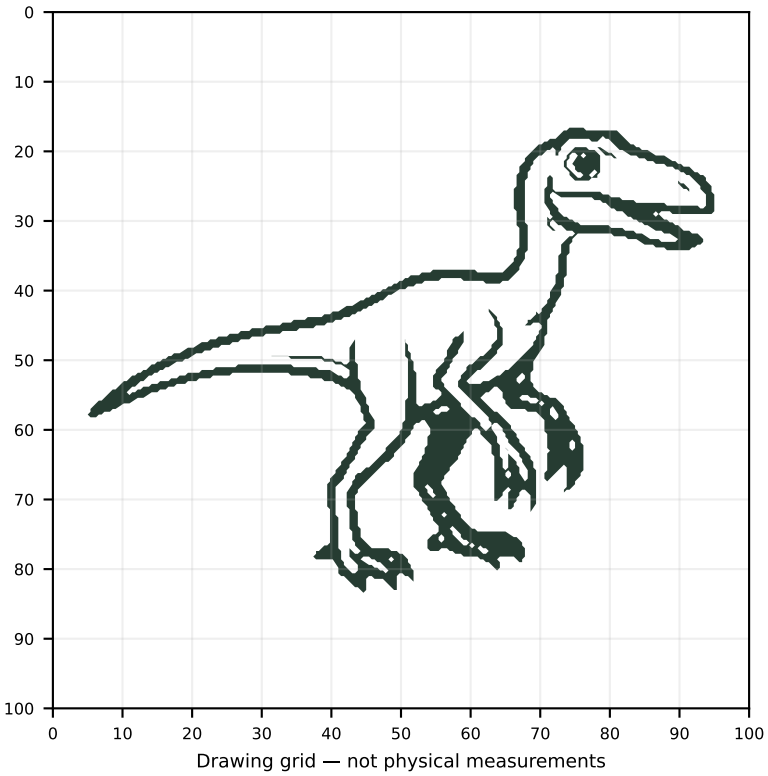

ANSWER: Example solution: preserve long balancing tail extending behind the body, feathered forelimbs with visible clawed fingers, sickle-shaped claw on the raised foot. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw the head as an elongated snout with an open mouth and large eye, then connect a curved neck to the torso.
2. Add a long tapering tail from the back of the torso, keeping it roughly horizontal for balance.
3. Sketch two feathered forelimbs with distinct clawed fingers hanging in front of the chest.
4. Draw the two hind legs, with one foot raised to show the sickle claw and the other planted on the ground.

How to Draw Pyroraptor — Free Practice Sheets

ANSWER / CASE 2

pyroraptor: Copy the reference onto the blank grid, using matching grid intersections. Compare with the separate full reference sheet.

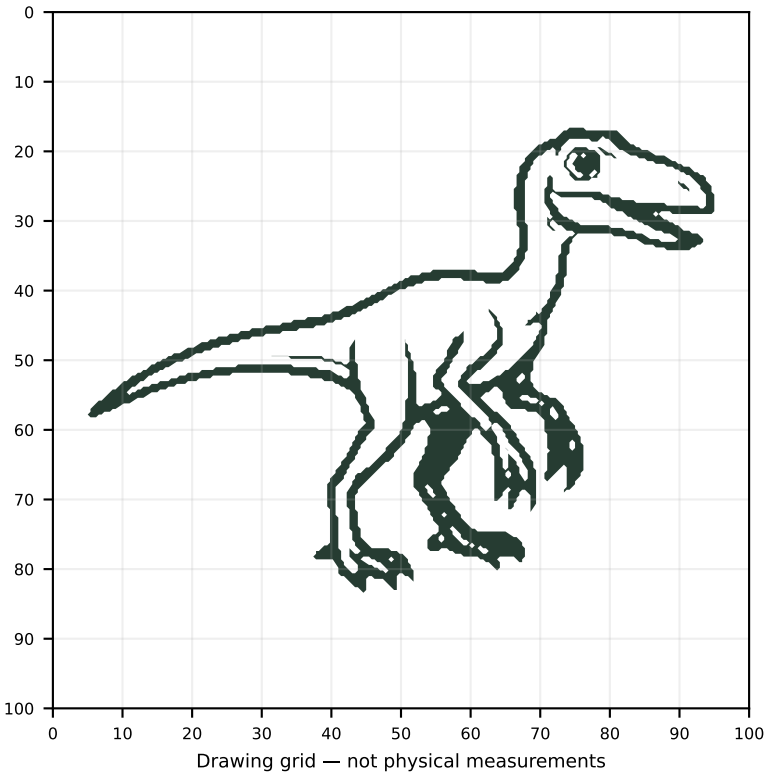

ANSWER: Example solution: preserve long balancing tail extending behind the body, feathered forelimbs with visible clawed fingers, sickle-shaped claw on the raised foot. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw the head as an elongated snout with an open mouth and large eye, then connect a curved neck to the torso.
2. Add a long tapering tail from the back of the torso, keeping it roughly horizontal for balance.
3. Sketch two feathered forelimbs with distinct clawed fingers hanging in front of the chest.
4. Draw the two hind legs, with one foot raised to show the sickle claw and the other planted on the ground.

ANSWER / CASE 3

pyroraptor: Use the bounding frame and center guide to place the silhouette, then add the identifying details. Compare with the separate full reference sheet.

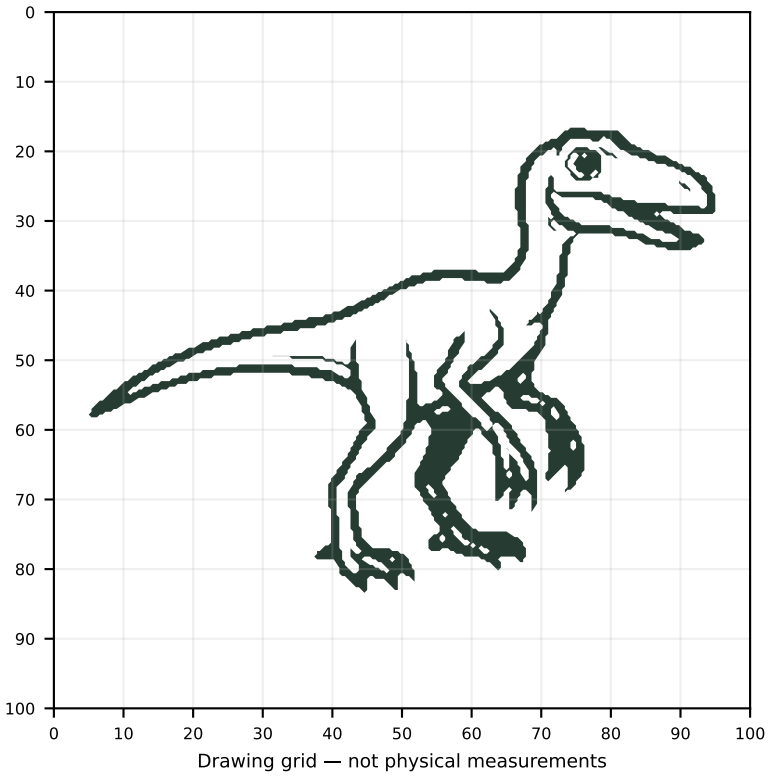

ANSWER: Example solution: preserve long balancing tail extending behind the body, feathered forelimbs with visible clawed fingers, sickle-shaped claw on the raised foot. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw the head as an elongated snout with an open mouth and large eye, then connect a curved neck to the torso.
2. Add a long tapering tail from the back of the torso, keeping it roughly horizontal for balance.
3. Sketch two feathered forelimbs with distinct clawed fingers hanging in front of the chest.
4. Draw the two hind legs, with one foot raised to show the sickle claw and the other planted on the ground.

How to Draw Pyroraptor — Free Practice Sheets

ANSWER / CASE 4

pyroraptor: Complete the blank right-hand portion using the full reference. Compare with the separate full reference sheet.

ANSWER: Example solution: preserve long balancing tail extending behind the body, feathered forelimbs with visible clawed fingers, sickle-shaped claw on the raised foot. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw the head as an elongated snout with an open mouth and large eye, then connect a curved neck to the torso.
2. Add a long tapering tail from the back of the torso, keeping it roughly horizontal for balance.
3. Sketch two feathered forelimbs with distinct clawed fingers hanging in front of the chest.
4. Draw the two hind legs, with one foot raised to show the sickle claw and the other planted on the ground.
