# How to Draw Snow Crab — Free Practice Sheets

### ANSWER / CASE 1

snow crab: Trace the reference outline, then practise the contour independently. Compare with the separate full reference sheet.

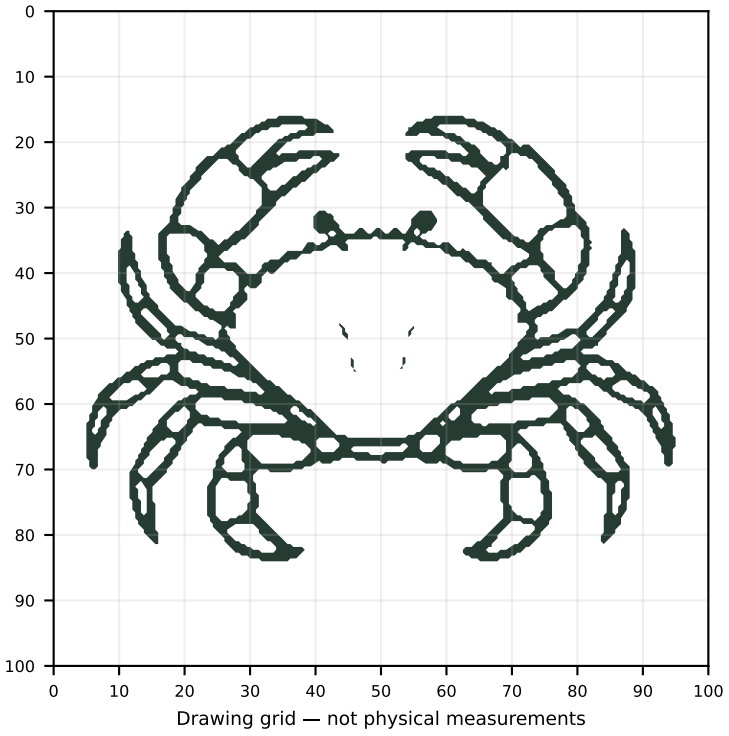

ANSWER: Example solution: preserve flat, wide, roughly heart-shaped shell with a bumpy top edge, two large front claws with segmented arms raised symmetrically, multiple long, spindly, segmented walking legs extending from the sides. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a wide, flat shell shape with a slightly bumpy top edge and two small eye stalks.
2. Add the two large front claws on either side, using segmented lines for the arm and pincer.
3. Draw the walking legs extending outward from the sides of the body, keeping them long and spindly with visible joints.
4. Add simple interior lines on the shell for texture and finalize the outline.

### ANSWER / CASE 2

snow crab: Copy the reference onto the blank grid, using matching grid intersections. Compare with the separate full reference sheet.

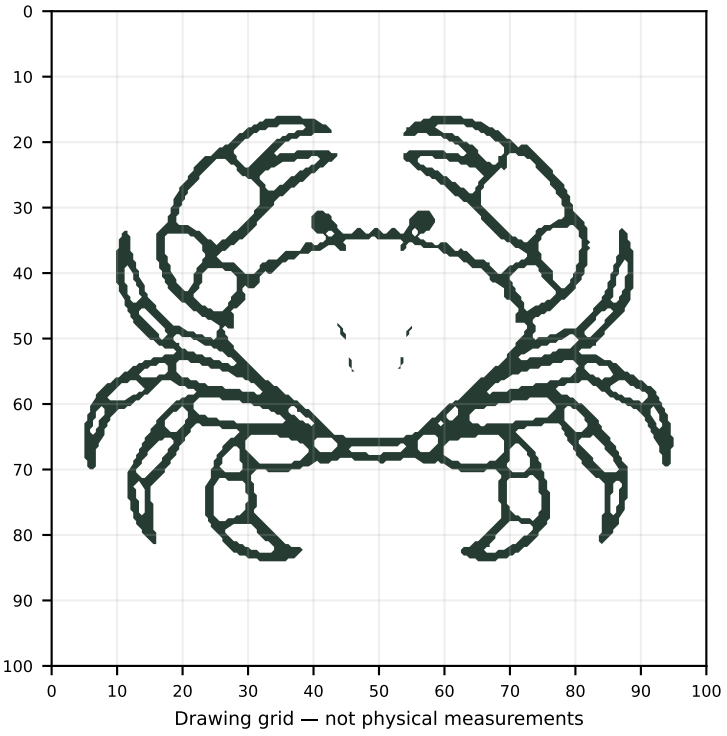

ANSWER: Example solution: preserve flat, wide, roughly heart-shaped shell with a bumpy top edge, two large front claws with segmented arms raised symmetrically, multiple long, spindly, segmented walking legs extending from the sides. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a wide, flat shell shape with a slightly bumpy top edge and two small eye stalks.
2. Add the two large front claws on either side, using segmented lines for the arm and pincer.
3. Draw the walking legs extending outward from the sides of the body, keeping them long and spindly with visible joints.
4. Add simple interior lines on the shell for texture and finalize the outline.

### ANSWER / CASE 3

snow crab: Use the bounding frame and center guide to place the silhouette, then add the identifying details. Compare with the separate full reference sheet.

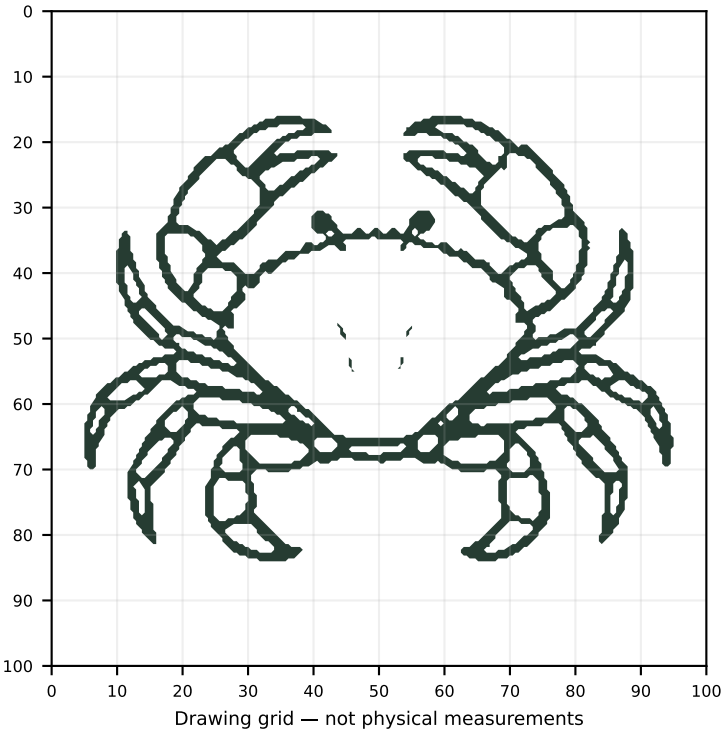

ANSWER: Example solution: preserve flat, wide, roughly heart-shaped shell with a bumpy top edge, two large front claws with segmented arms raised symmetrically, multiple long, spindly, segmented walking legs extending from the sides. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a wide, flat shell shape with a slightly bumpy top edge and two small eye stalks.
2. Add the two large front claws on either side, using segmented lines for the arm and pincer.
3. Draw the walking legs extending outward from the sides of the body, keeping them long and spindly with visible joints.
4. Add simple interior lines on the shell for texture and finalize the outline.

### ANSWER / CASE 4

snow crab: Complete the blank right-hand portion using the full reference. Compare with the separate full reference sheet.

ANSWER: Example solution: preserve flat, wide, roughly heart-shaped shell with a bumpy top edge, two large front claws with segmented arms raised symmetrically, multiple long, spindly, segmented walking legs extending from the sides. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a wide, flat shell shape with a slightly bumpy top edge and two small eye stalks.
2. Add the two large front claws on either side, using segmented lines for the arm and pincer.
3. Draw the walking legs extending outward from the sides of the body, keeping them long and spindly with visible joints.
4. Add simple interior lines on the shell for texture and finalize the outline.
