How to Draw Basilosaurus — Free Practice Sheets

ANSWER / CASE 1

basilosaurus: Trace the reference outline, then practise the contour independently. Compare with the separate full reference sheet.

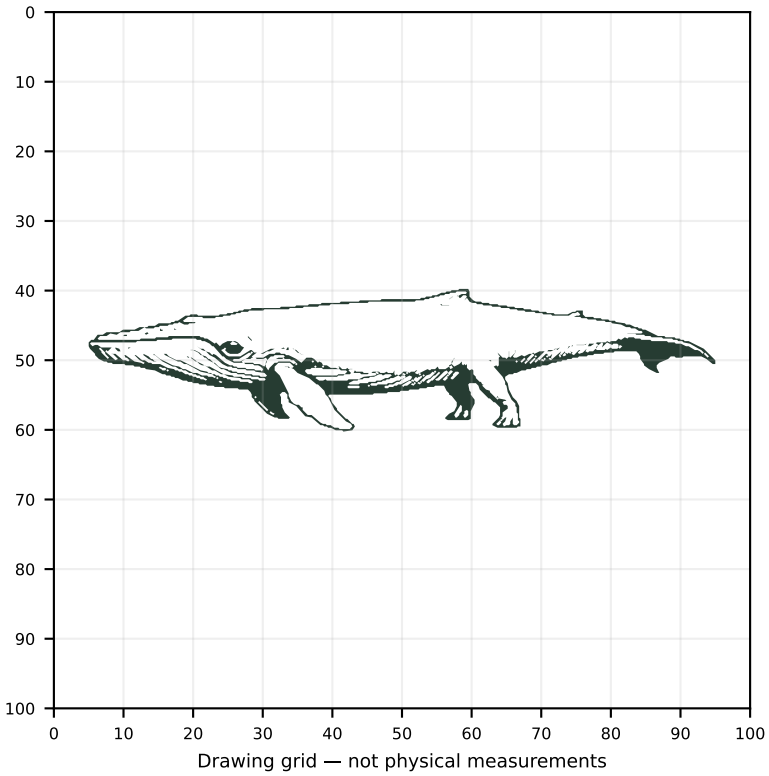

ANSWER: Example solution: preserve long serpentine whale body with a dorsal fin and tapering tail, narrow elongated skull with visible eye and mouth line, small hind limbs positioned near the tail base. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a long horizontal body outline that tapers at both ends, adding a small dorsal fin and tail fluke.
2. Sketch the narrow elongated skull at the left end, marking the eye and mouth line.
3. Add the front flippers below the body behind the head.
4. Draw the small hind limbs near the tail base, then add line details for skin folds and shading.

ANSWER / CASE 2

basilosaurus: Copy the reference onto the blank grid, using matching grid intersections. Compare with the separate full reference sheet.

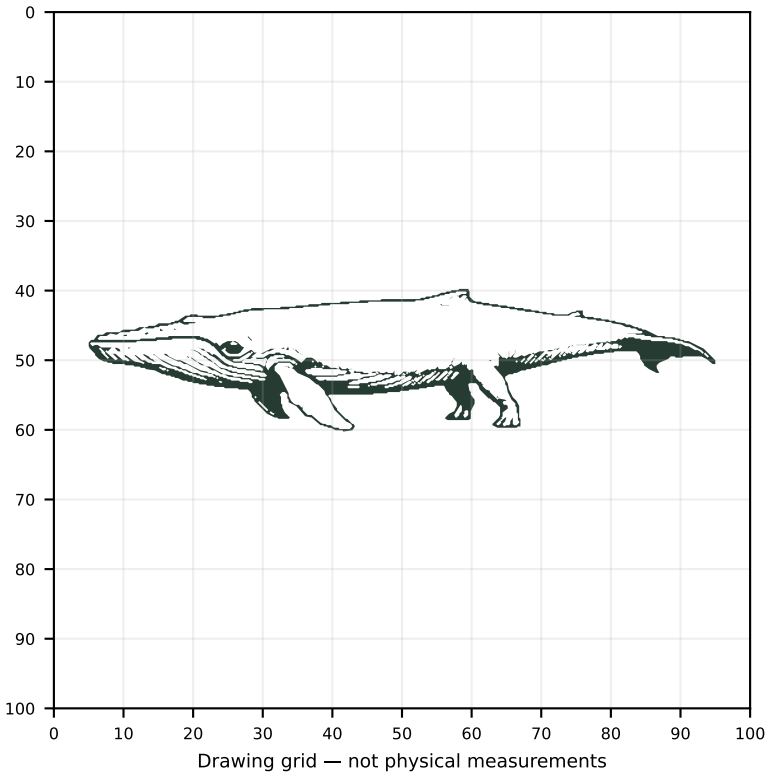

ANSWER: Example solution: preserve long serpentine whale body with a dorsal fin and tapering tail, narrow elongated skull with visible eye and mouth line, small hind limbs positioned near the tail base. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a long horizontal body outline that tapers at both ends, adding a small dorsal fin and tail fluke.
2. Sketch the narrow elongated skull at the left end, marking the eye and mouth line.
3. Add the front flippers below the body behind the head.
4. Draw the small hind limbs near the tail base, then add line details for skin folds and shading.

ANSWER / CASE 3

basilosaurus: Use the bounding frame and center guide to place the silhouette, then add the identifying details. Compare with the separate full reference sheet.

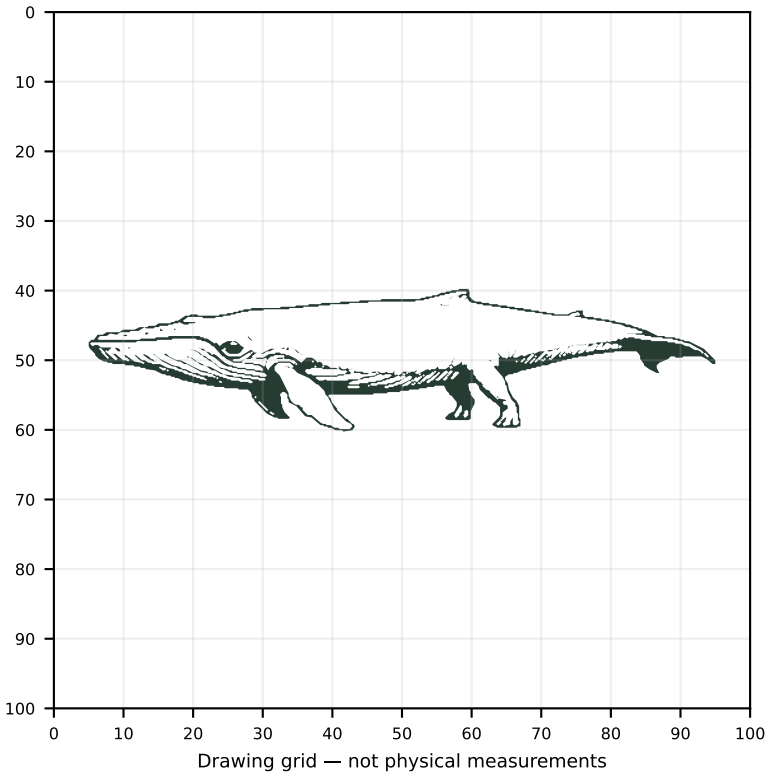

ANSWER: Example solution: preserve long serpentine whale body with a dorsal fin and tapering tail, narrow elongated skull with visible eye and mouth line, small hind limbs positioned near the tail base. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a long horizontal body outline that tapers at both ends, adding a small dorsal fin and tail fluke.
2. Sketch the narrow elongated skull at the left end, marking the eye and mouth line.
3. Add the front flippers below the body behind the head.
4. Draw the small hind limbs near the tail base, then add line details for skin folds and shading.

How to Draw Basilosaurus — Free Practice Sheets

ANSWER / CASE 4

basilosaurus: Complete the blank right-hand portion using the full reference. Compare with the separate full reference sheet.

ANSWER: Example solution: preserve long serpentine whale body with a dorsal fin and tapering tail, narrow elongated skull with visible eye and mouth line, small hind limbs positioned near the tail base. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a long horizontal body outline that tapers at both ends, adding a small dorsal fin and tail fluke.
2. Sketch the narrow elongated skull at the left end, marking the eye and mouth line.
3. Add the front flippers below the body behind the head.
4. Draw the small hind limbs near the tail base, then add line details for skin folds and shading.
