How to Draw Flamingo — Free Practice Sheets

ANSWER / CASE 1

flamingo: Trace the reference outline, then practise the contour independently. Compare with the separate full reference sheet.

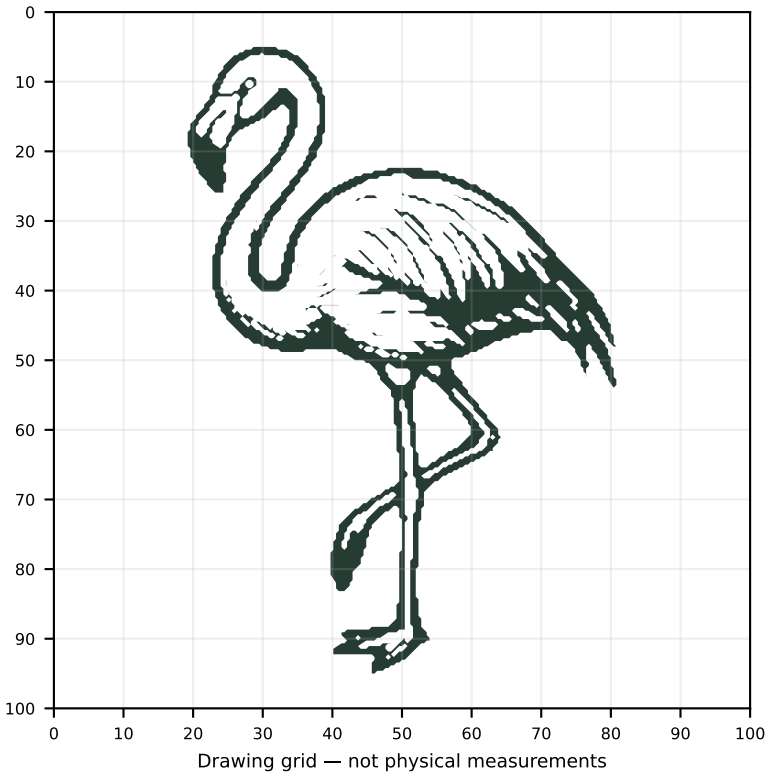

ANSWER: Example solution: preserve long S-curved neck, hooked downward-pointing beak, thin legs with one raised and bent. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw the oval body tilted slightly upward toward the tail.
2. Add the long neck as a smooth S-curve rising from the front of the body.
3. Attach the head with a hooked beak at the top of the neck.
4. Draw two thin legs from the lower body, bending one leg up and keeping the other straight down to the foot.

How to Draw Flamingo — Free Practice Sheets

ANSWER / CASE 2

flamingo: Copy the reference onto the blank grid, using matching grid intersections. Compare with the separate full reference sheet.

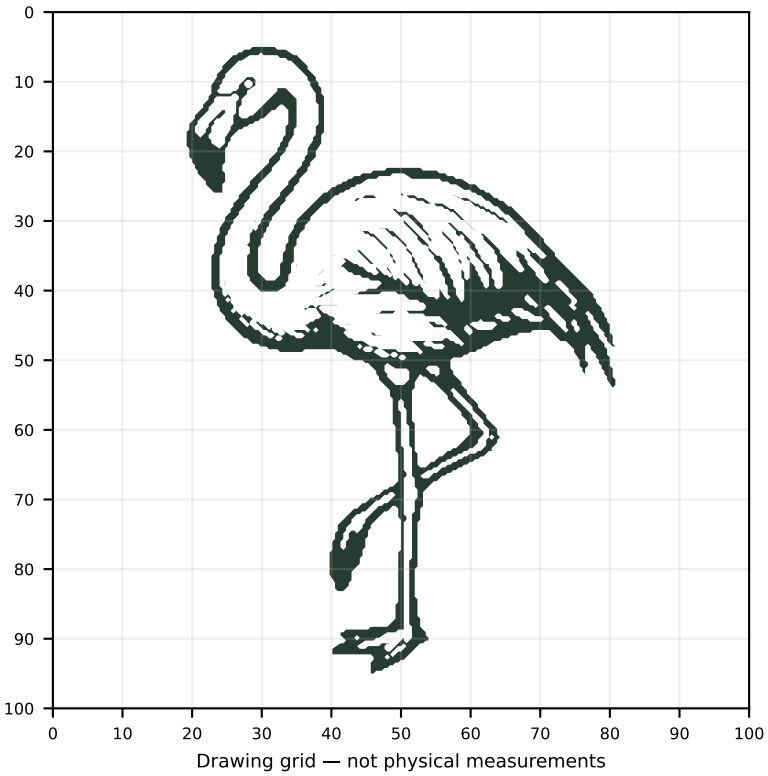

ANSWER: Example solution: preserve long S-curved neck, hooked downward-pointing beak, thin legs with one raised and bent. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw the oval body tilted slightly upward toward the tail.
2. Add the long neck as a smooth S-curve rising from the front of the body.
3. Attach the head with a hooked beak at the top of the neck.
4. Draw two thin legs from the lower body, bending one leg up and keeping the other straight down to the foot.

How to Draw Flamingo — Free Practice Sheets

ANSWER / CASE 3

flamingo: Use the bounding frame and center guide to place the silhouette, then add the identifying details. Compare with the separate full reference sheet.

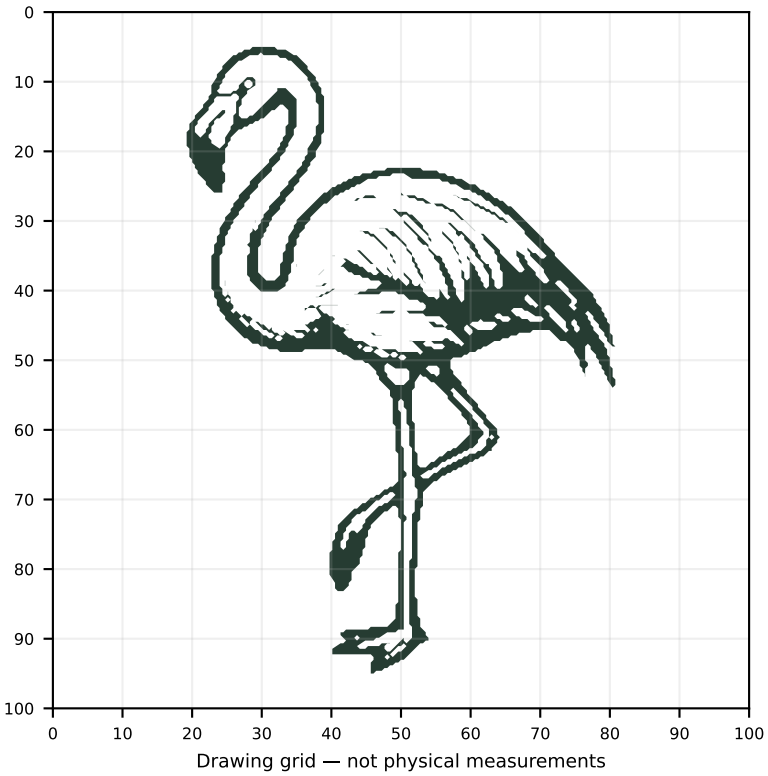

ANSWER: Example solution: preserve long S-curved neck, hooked downward-pointing beak, thin legs with one raised and bent. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw the oval body tilted slightly upward toward the tail.
2. Add the long neck as a smooth S-curve rising from the front of the body.
3. Attach the head with a hooked beak at the top of the neck.
4. Draw two thin legs from the lower body, bending one leg up and keeping the other straight down to the foot.

How to Draw Flamingo — Free Practice Sheets

ANSWER / CASE 4

flamingo: Complete the blank right-hand portion using the full reference. Compare with the separate full reference sheet.

ANSWER: Example solution: preserve long S-curved neck, hooked downward-pointing beak, thin legs with one raised and bent. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw the oval body tilted slightly upward toward the tail.
2. Add the long neck as a smooth S-curve rising from the front of the body.
3. Attach the head with a hooked beak at the top of the neck.
4. Draw two thin legs from the lower body, bending one leg up and keeping the other straight down to the foot.
