How to Draw Parrot — Free Practice Sheets

ANSWER / CASE 1

parrot: Trace the reference outline, then practise the contour independently. Compare with the separate full reference sheet.

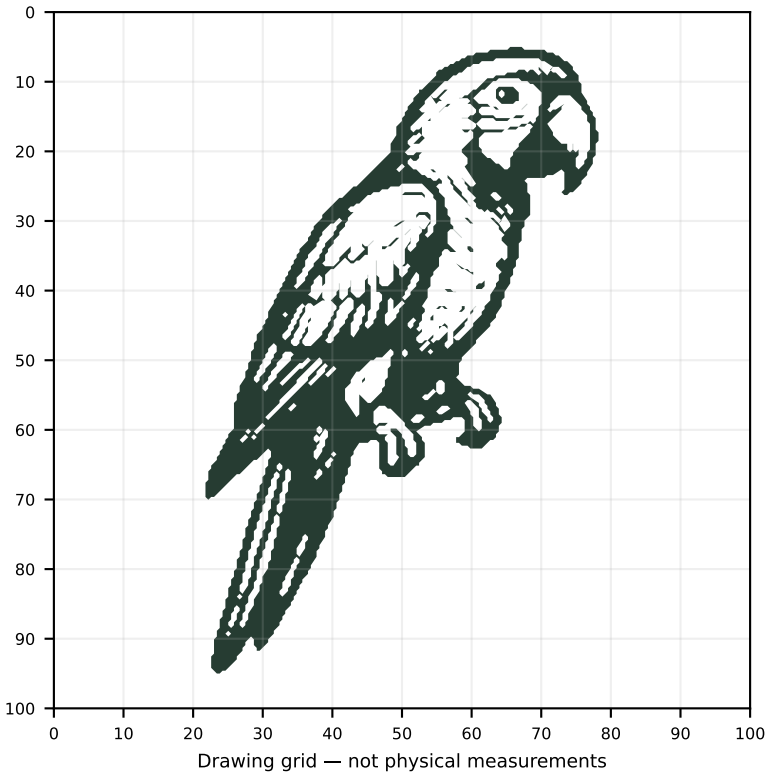

ANSWER: Example solution: preserve curved hooked beak, long tail feathers, perched grasping feet. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw the head as a rounded oval with a large circular eye and a thick, downward-curving hooked beak attached at the front.
2. Sketch the body as a teardrop shape angled downward, then add layered wing feathers along the side and back.
3. Extend two long, narrow tail feathers from the lower rear of the body, tapering to points.
4. Draw a short horizontal perch line and attach two visible feet with curled toes gripping it; add simple chest feather marks.

ANSWER / CASE 3

parrot: Use the bounding frame and center guide to place the silhouette, then add the identifying details. Compare with the separate full reference sheet.

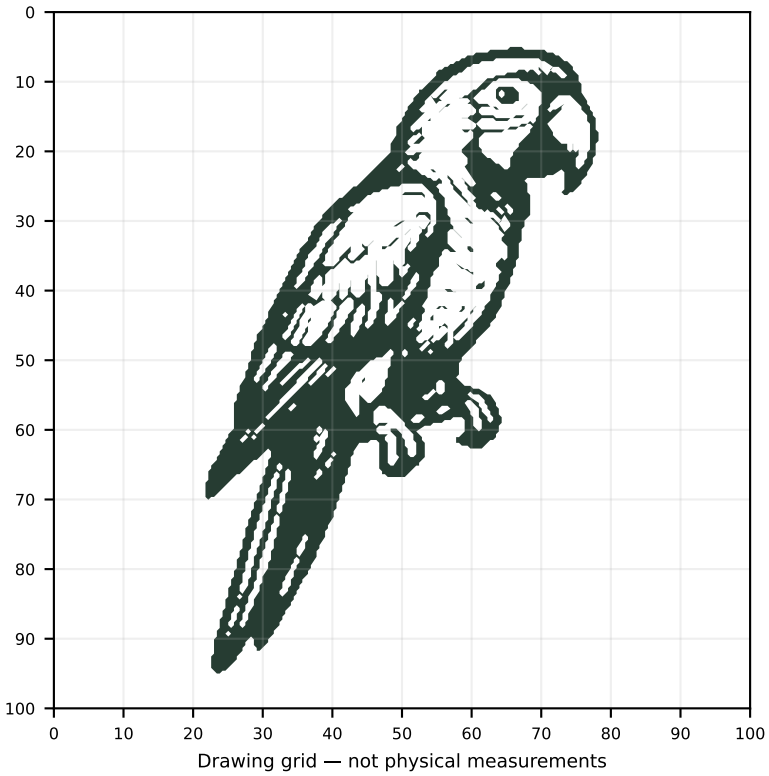

ANSWER: Example solution: preserve curved hooked beak, long tail feathers, perched grasping feet. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw the head as a rounded oval with a large circular eye and a thick, downward-curving hooked beak attached at the front.
2. Sketch the body as a teardrop shape angled downward, then add layered wing feathers along the side and back.
3. Extend two long, narrow tail feathers from the lower rear of the body, tapering to points.
4. Draw a short horizontal perch line and attach two visible feet with curled toes gripping it; add simple chest feather marks.

How to Draw Parrot — Free Practice Sheets

ANSWER / CASE 4

parrot: Complete the blank right-hand portion using the full reference. Compare with the separate full reference sheet.

ANSWER: Example solution: preserve curved hooked beak, long tail feathers, perched grasping feet. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw the head as a rounded oval with a large circular eye and a thick, downward-curving hooked beak attached at the front.
2. Sketch the body as a teardrop shape angled downward, then add layered wing feathers along the side and back.
3. Extend two long, narrow tail feathers from the lower rear of the body, tapering to points.
4. Draw a short horizontal perch line and attach two visible feet with curled toes gripping it; add simple chest feather marks.
