How to Draw Woodpecker — Free Practice Sheets

ANSWER / CASE 1

woodpecker: Trace the reference outline, then practise the contour independently. Compare with the separate full reference sheet.

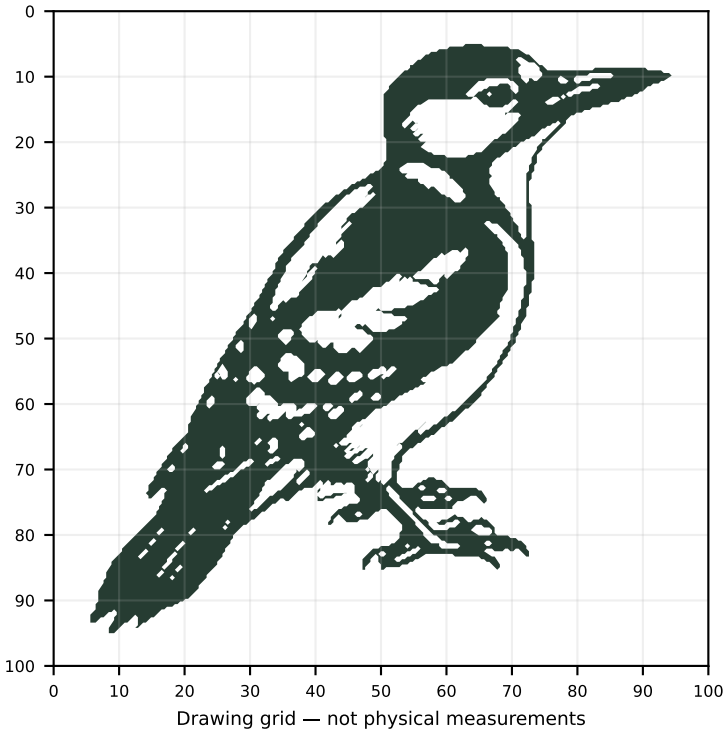

ANSWER: Example solution: preserve chisel-shaped pointed beak, black-and-white barred wing pattern, stiff pointed tail extending downward. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw the head as a rounded oval with a long, straight, chisel-shaped beak pointing to the right.
2. Add the body as an elongated oval angled downward, with the back curving along the left side.
3. Sketch the wing as a layered shape along the back, using rows of small white spots and dark bars to suggest feather patterning.
4. Extend a stiff, pointed tail downward from the rear and draw two visible legs with toes gripping an implied vertical surface.

How to Draw Woodpecker — Free Practice Sheets

ANSWER / CASE 2

woodpecker: Copy the reference onto the blank grid, using matching grid intersections. Compare with the separate full reference sheet.

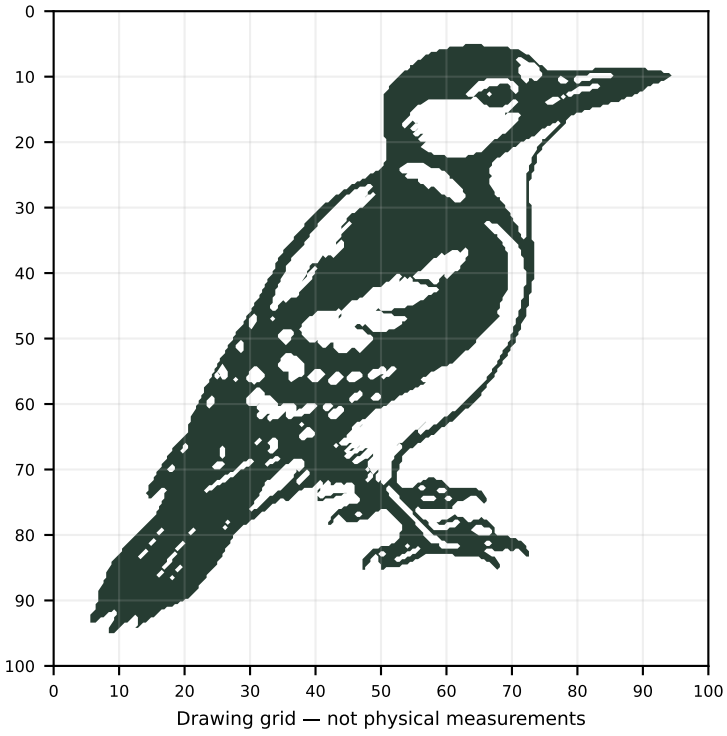

ANSWER: Example solution: preserve chisel-shaped pointed beak, black-and-white barred wing pattern, stiff pointed tail extending downward. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw the head as a rounded oval with a long, straight, chisel-shaped beak pointing to the right.
2. Add the body as an elongated oval angled downward, with the back curving along the left side.
3. Sketch the wing as a layered shape along the back, using rows of small white spots and dark bars to suggest feather patterning.
4. Extend a stiff, pointed tail downward from the rear and draw two visible legs with toes gripping an implied vertical surface.

How to Draw Woodpecker — Free Practice Sheets

ANSWER / CASE 3

woodpecker: Use the bounding frame and center guide to place the silhouette, then add the identifying details. Compare with the separate full reference sheet.

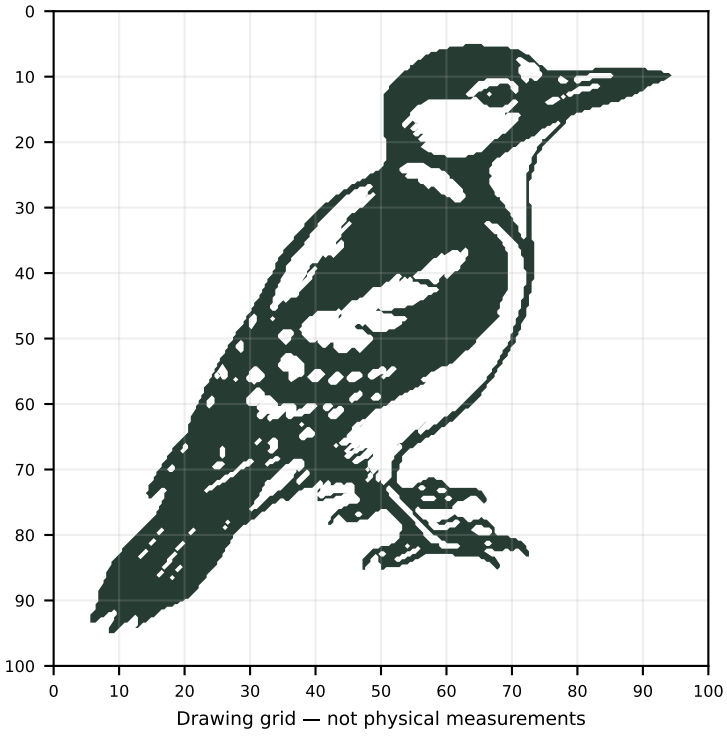

ANSWER: Example solution: preserve chisel-shaped pointed beak, black-and-white barred wing pattern, stiff pointed tail extending downward. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw the head as a rounded oval with a long, straight, chisel-shaped beak pointing to the right.
2. Add the body as an elongated oval angled downward, with the back curving along the left side.
3. Sketch the wing as a layered shape along the back, using rows of small white spots and dark bars to suggest feather patterning.
4. Extend a stiff, pointed tail downward from the rear and draw two visible legs with toes gripping an implied vertical surface.

How to Draw Woodpecker — Free Practice Sheets

ANSWER / CASE 4

woodpecker: Complete the blank right-hand portion using the full reference. Compare with the separate full reference sheet.

ANSWER: Example solution: preserve chisel-shaped pointed beak, black-and-white barred wing pattern, stiff pointed tail extending downward. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw the head as a rounded oval with a long, straight, chisel-shaped beak pointing to the right.
2. Add the body as an elongated oval angled downward, with the back curving along the left side.
3. Sketch the wing as a layered shape along the back, using rows of small white spots and dark bars to suggest feather patterning.
4. Extend a stiff, pointed tail downward from the rear and draw two visible legs with toes gripping an implied vertical surface.
