How to Draw Phoenix — Free Practice Sheets

ANSWER / CASE 1

phoenix: Trace the reference outline, then practise the contour independently. Compare with the separate full reference sheet.

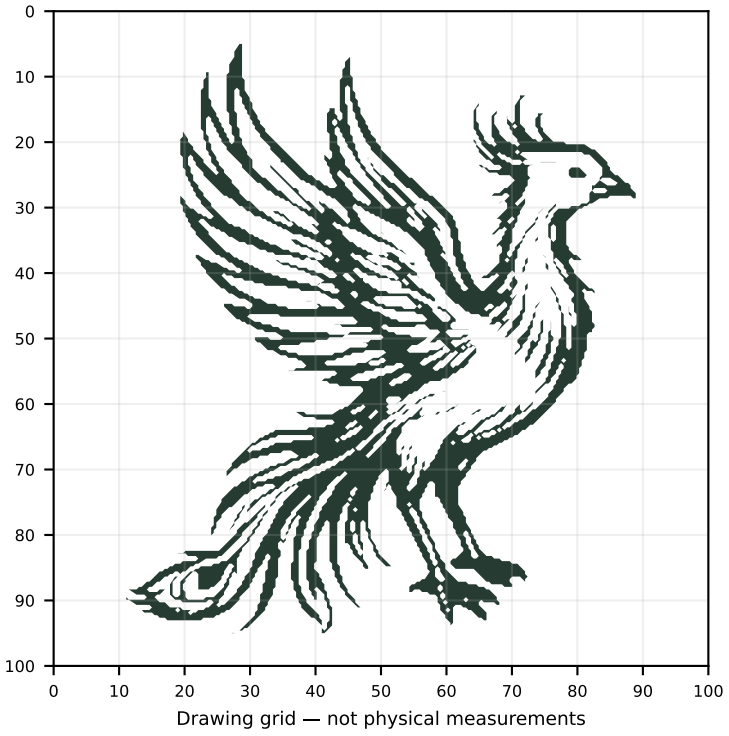

ANSWER: Example solution: preserve spread feathered wings with layered, flame-like feather strokes, long flowing tail feathers ending in an eye-like plume, crested head with a beak and small eye. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw the head and neck first, adding the crest, beak, and eye.
2. Sketch the body and the two spread wings, using long curved strokes for the feathers.
3. Add the long flowing tail feathers, including the eye-shaped plume at the end.
4. Draw the two visible legs with feet, then refine the feather outlines.

How to Draw Phoenix — Free Practice Sheets

ANSWER / CASE 2

phoenix: Copy the reference onto the blank grid, using matching grid intersections. Compare with the separate full reference sheet.

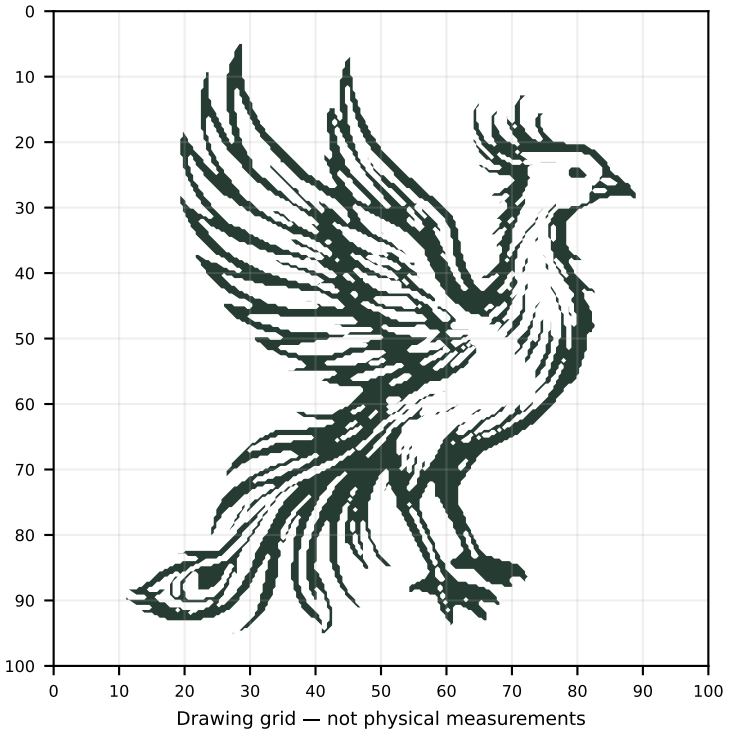

ANSWER: Example solution: preserve spread feathered wings with layered, flame-like feather strokes, long flowing tail feathers ending in an eye-like plume, crested head with a beak and small eye. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw the head and neck first, adding the crest, beak, and eye.
2. Sketch the body and the two spread wings, using long curved strokes for the feathers.
3. Add the long flowing tail feathers, including the eye-shaped plume at the end.
4. Draw the two visible legs with feet, then refine the feather outlines.
