How to Draw Skyscraper — Free Practice Sheets

ANSWER / CASE 1

skyscraper: Trace the reference outline, then practise the contour independently. Compare with the separate full reference sheet.

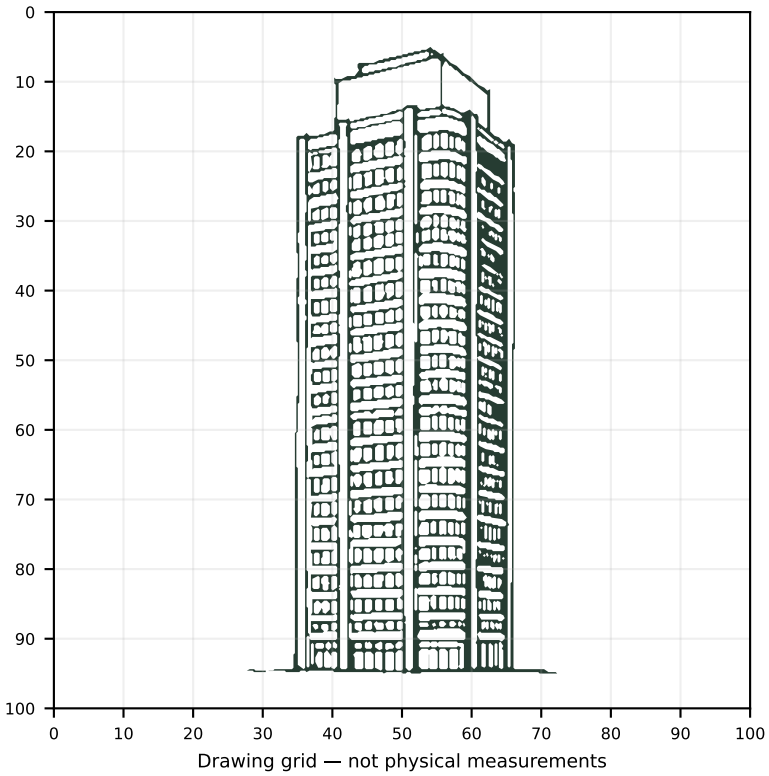

ANSWER: Example solution: preserve tall vertical form, repeated window rows, flat roof. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a tall vertical rectangular outline for the main tower body.
2. Add a smaller flat-roofed rectangular block on top to form the stepped roof.
3. Draw evenly spaced horizontal lines across the facade to create repeated window rows.
4. Add vertical lines to divide the window rows into individual panes and finish with a ground line.

How to Draw Skyscraper — Free Practice Sheets

ANSWER / CASE 2

skyscraper: Copy the reference onto the blank grid, using matching grid intersections. Compare with the separate full reference sheet.

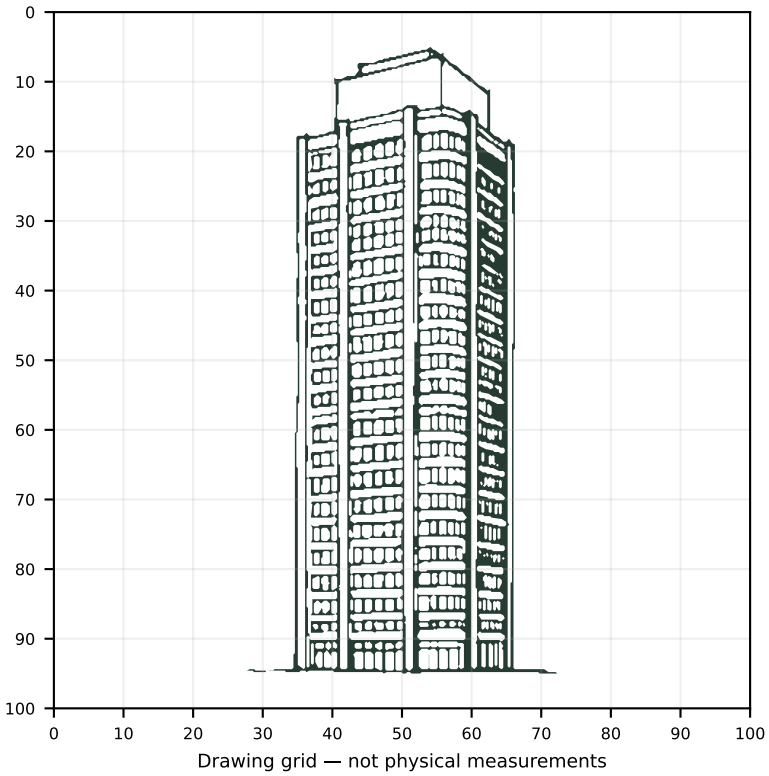

ANSWER: Example solution: preserve tall vertical form, repeated window rows, flat roof. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a tall vertical rectangular outline for the main tower body.
2. Add a smaller flat-roofed rectangular block on top to form the stepped roof.
3. Draw evenly spaced horizontal lines across the facade to create repeated window rows.
4. Add vertical lines to divide the window rows into individual panes and finish with a ground line.

How to Draw Skyscraper — Free Practice Sheets

ANSWER / CASE 3

skyscraper: Use the bounding frame and center guide to place the silhouette, then add the identifying details. Compare with the separate full reference sheet.

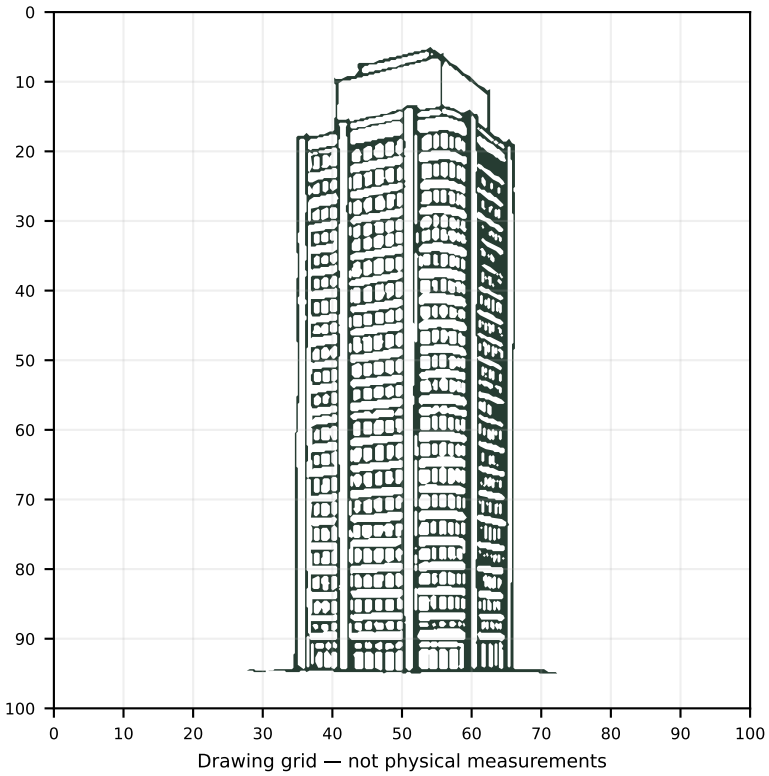

ANSWER: Example solution: preserve tall vertical form, repeated window rows, flat roof. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a tall vertical rectangular outline for the main tower body.
2. Add a smaller flat-roofed rectangular block on top to form the stepped roof.
3. Draw evenly spaced horizontal lines across the facade to create repeated window rows.
4. Add vertical lines to divide the window rows into individual panes and finish with a ground line.

How to Draw Skyscraper — Free Practice Sheets

ANSWER / CASE 4

skyscraper: Complete the blank right-hand portion using the full reference. Compare with the separate full reference sheet.

ANSWER: Example solution: preserve tall vertical form, repeated window rows, flat roof. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a tall vertical rectangular outline for the main tower body.
2. Add a smaller flat-roofed rectangular block on top to form the stepped roof.
3. Draw evenly spaced horizontal lines across the facade to create repeated window rows.
4. Add vertical lines to divide the window rows into individual panes and finish with a ground line.
