How to Draw Spiral Staircase — Free Practice Sheets

REFERENCE / CASE 1

spiral staircase: Trace the reference outline, then practise the contour independently. Compare with the separate full reference sheet.

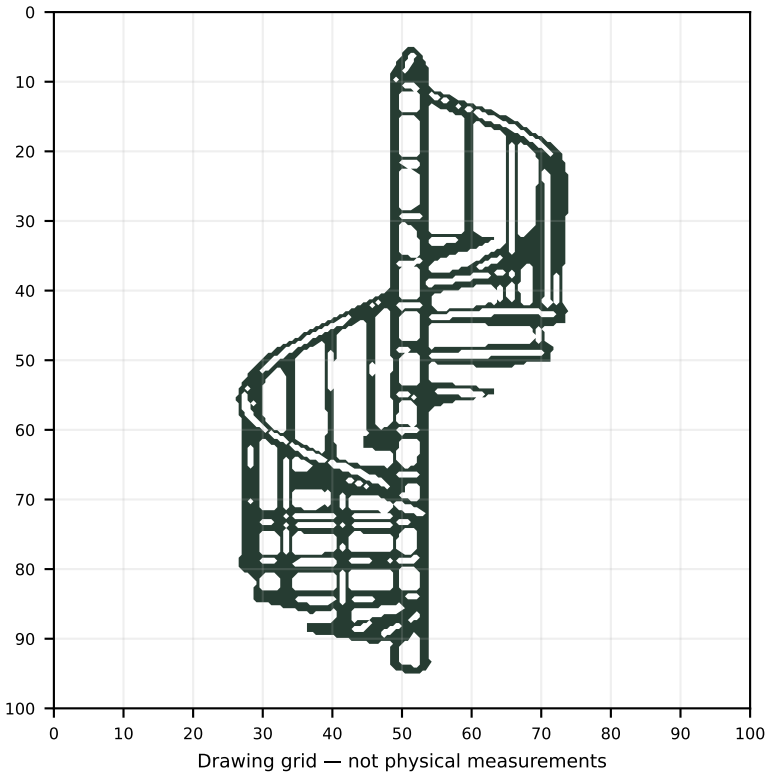

METHOD: Draw a tall vertical central column with evenly spaced horizontal segment lines. Sketch a curved outer railing arc that spirals around the column from bottom to top. Add wedge-shaped step treads projecting outward from the column at each level. Connect the outer railing to the steps with evenly spaced vertical balusters.
Use the separate practice sheet before checking the answer.

How to Draw Spiral Staircase — Free Practice Sheets

REFERENCE / CASE 2

spiral staircase: Copy the reference onto the blank grid, using matching grid intersections. Compare with the separate full reference sheet.

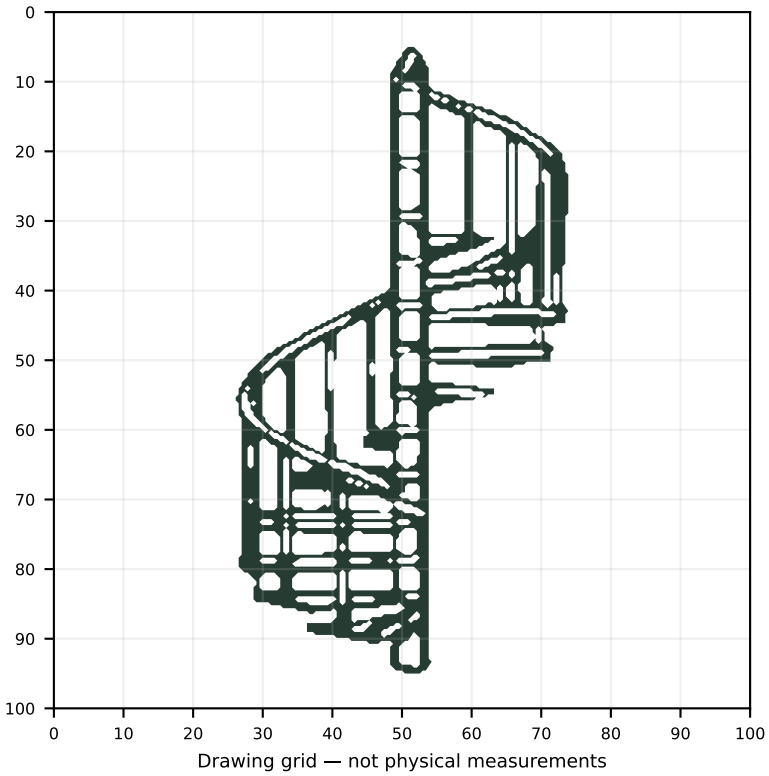

METHOD: Draw a tall vertical central column with evenly spaced horizontal segment lines. Sketch a curved outer railing arc that spirals around the column from bottom to top. Add wedge-shaped step treads projecting outward from the column at each level. Connect the outer railing to the steps with evenly spaced vertical balusters.
Use the separate practice sheet before checking the answer.

How to Draw Spiral Staircase — Free Practice Sheets

REFERENCE / CASE 3

spiral staircase: Use the bounding frame and center guide to place the silhouette, then add the identifying details. Compare with the separate full reference sheet.

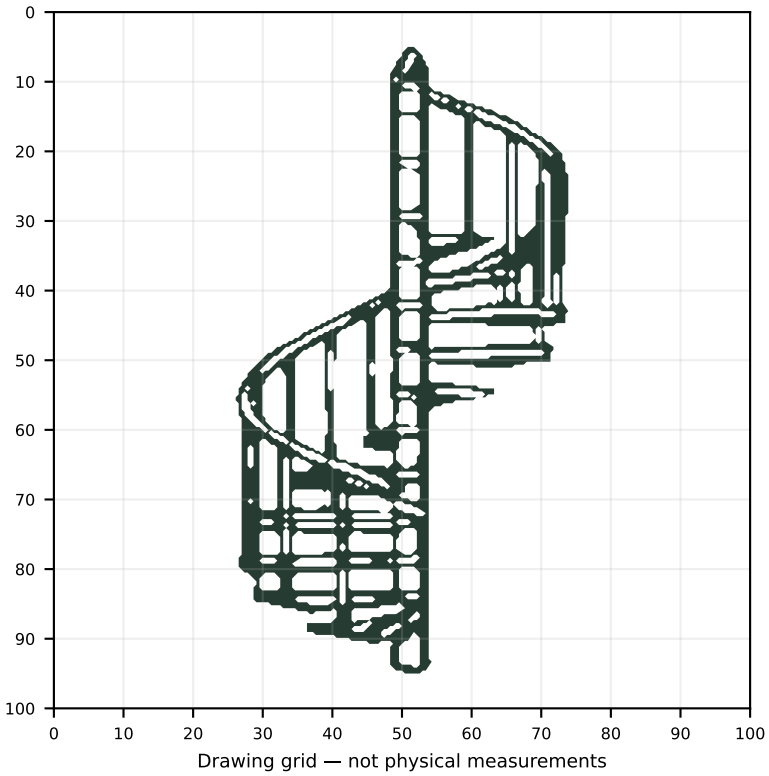

METHOD: Draw a tall vertical central column with evenly spaced horizontal segment lines. Sketch a curved outer railing arc that spirals around the column from bottom to top. Add wedge-shaped step treads projecting outward from the column at each level. Connect the outer railing to the steps with evenly spaced vertical balusters.
Use the separate practice sheet before checking the answer.

How to Draw Spiral Staircase — Free Practice Sheets

REFERENCE / CASE 4

spiral staircase: Complete the blank right-hand portion using the full reference.
Compare with the separate full reference sheet.

METHOD: Draw a tall vertical central column with evenly spaced horizontal segment lines. Sketch a curved outer railing arc that spirals around the column from bottom to top. Add wedge-shaped step treads projecting outward from the column at each level. Connect the outer railing to the steps with evenly spaced vertical balusters.
Use the separate practice sheet before checking the answer.
