How to Draw Colosseum — Free Practice Sheets

ANSWER / CASE 1

colosseum: Trace the reference outline, then practise the contour independently. Compare with the separate full reference sheet.

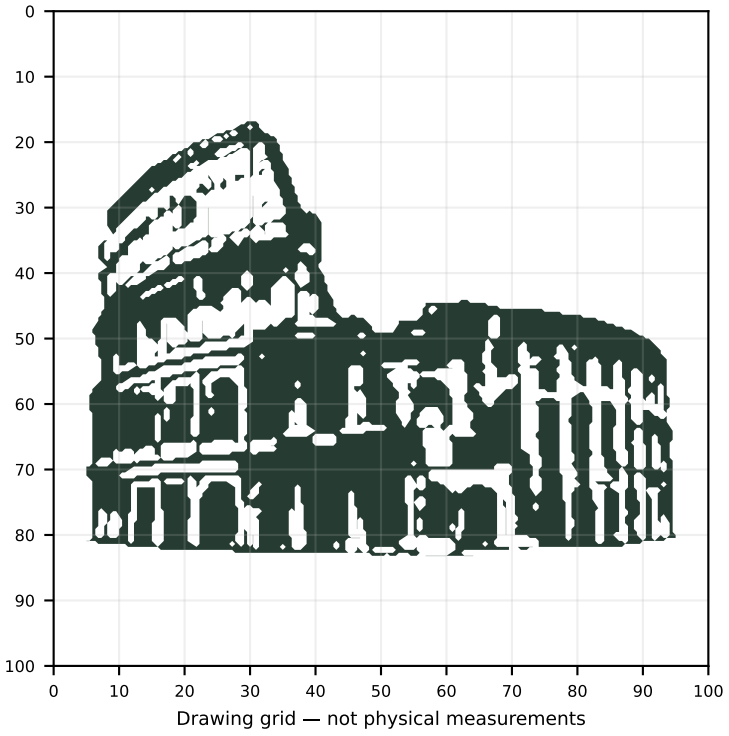

ANSWER: Example solution: preserve curved tiered facade with multiple horizontal bands, repeating arched openings on several levels, elliptical footprint with a taller outer wall and lower inner section. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw the elliptical base outline, wider than tall, with a slight tilt to show perspective.
2. Add three horizontal tier lines following the curve of the ellipse to define the facade levels.
3. Place evenly spaced arched openings along each tier, using simple U-shapes or rounded rectangles.
4. Draw the taller outer wall segment on the left and the lower ruined section on the right, then connect the tiers with vertical pilaster lines.

How to Draw Colosseum — Free Practice Sheets

ANSWER / CASE 2

colosseum: Copy the reference onto the blank grid, using matching grid intersections. Compare with the separate full reference sheet.

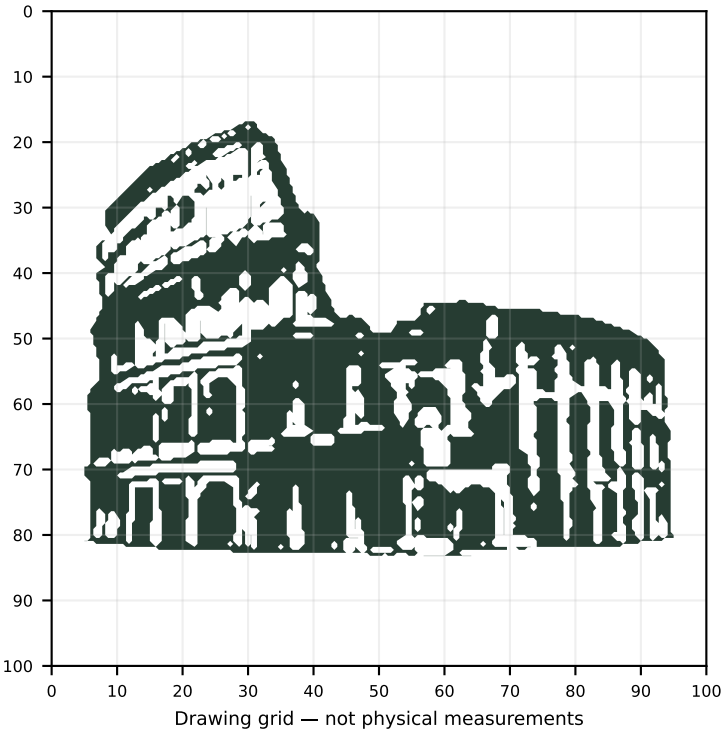

ANSWER: Example solution: preserve curved tiered facade with multiple horizontal bands, repeating arched openings on several levels, elliptical footprint with a taller outer wall and lower inner section. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw the elliptical base outline, wider than tall, with a slight tilt to show perspective.
2. Add three horizontal tier lines following the curve of the ellipse to define the facade levels.
3. Place evenly spaced arched openings along each tier, using simple U-shapes or rounded rectangles.
4. Draw the taller outer wall segment on the left and the lower ruined section on the right, then connect the tiers with vertical pilaster lines.

How to Draw Colosseum — Free Practice Sheets

ANSWER / CASE 3

colosseum: Use the bounding frame and center guide to place the silhouette, then add the identifying details. Compare with the separate full reference sheet.

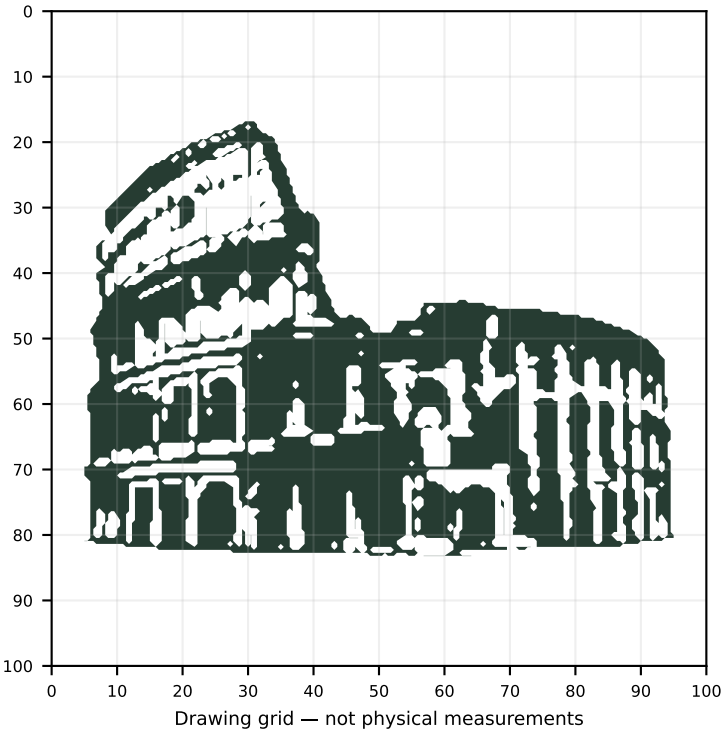

ANSWER: Example solution: preserve curved tiered facade with multiple horizontal bands, repeating arched openings on several levels, elliptical footprint with a taller outer wall and lower inner section. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw the elliptical base outline, wider than tall, with a slight tilt to show perspective.
2. Add three horizontal tier lines following the curve of the ellipse to define the facade levels.
3. Place evenly spaced arched openings along each tier, using simple U-shapes or rounded rectangles.
4. Draw the taller outer wall segment on the left and the lower ruined section on the right, then connect the tiers with vertical pilaster lines.

How to Draw Colosseum — Free Practice Sheets

ANSWER / CASE 4

colosseum: Complete the blank right-hand portion using the full reference. Compare with the separate full reference sheet.

ANSWER: Example solution: preserve curved tiered facade with multiple horizontal bands, repeating arched openings on several levels, elliptical footprint with a taller outer wall and lower inner section. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw the elliptical base outline, wider than tall, with a slight tilt to show perspective.
2. Add three horizontal tier lines following the curve of the ellipse to define the facade levels.
3. Place evenly spaced arched openings along each tier, using simple U-shapes or rounded rectangles.
4. Draw the taller outer wall segment on the left and the lower ruined section on the right, then connect the tiers with vertical pilaster lines.
