How to Draw Eggplant — Free Practice Sheets

ANSWER / CASE 1

eggplant: Trace the reference outline, then practise the contour independently. Compare with the separate full reference sheet.

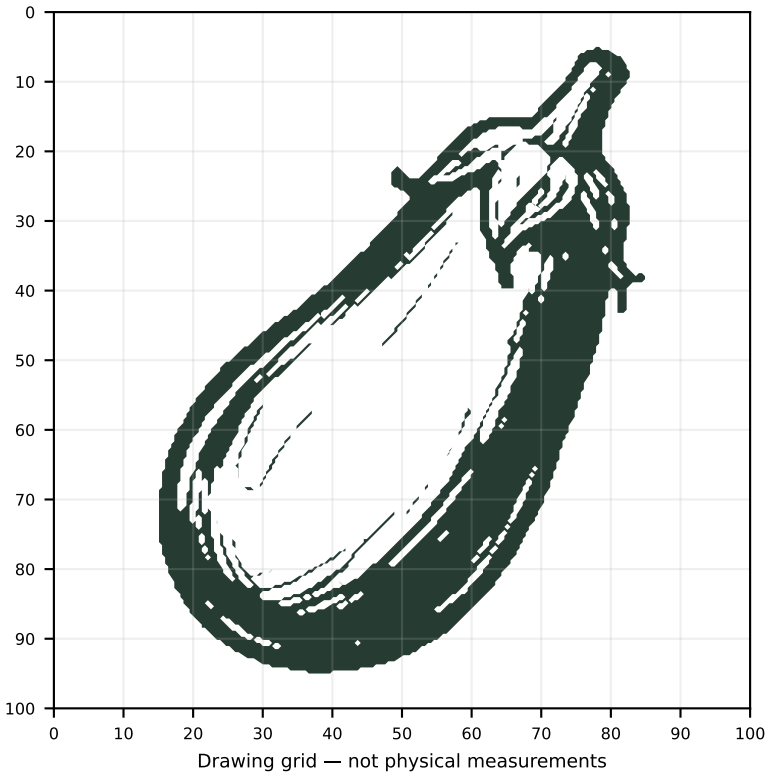

ANSWER: Example solution: preserve Elongated ovoid body tapering toward the top stem, Calyx with pointed lobes and a short thick stem at the top, Thick dark outline with interior contour lines suggesting a highlight along the left side. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw the main body as a long curved ovoid tilted diagonally from lower left to upper right
2. Add the calyx at the top with several pointed leaf-like lobes wrapping the upper body
3. Attach a short thick stem extending upward from the calyx
4. Outline the body with a thick dark contour and add interior curved lines to indicate surface curvature and highlight regions
