How to Draw Taco — Free Practice Sheets

ANSWER / CASE 1

taco: Trace the reference outline, then practise the contour independently. Compare with the separate full reference sheet.

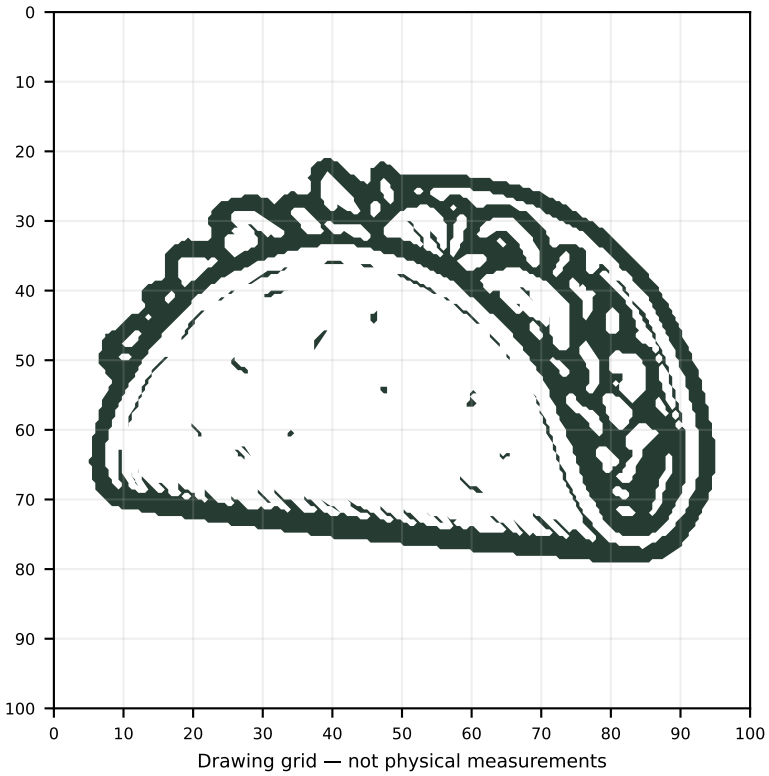

ANSWER: Example solution: preserve curved U-shaped folded tortilla shell, filling visible along the top opening, rounded semicircular silhouette with a flat bottom edge. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a wide U-shaped curve for the outer folded shell, with a flat base line.
2. Add an inner parallel curve along the top opening to show the shell's thickness.
3. Sketch filling shapes (lettuce/meat) protruding above the top edge.
4. Add small texture marks on the shell surface and outline the filling inside the opening.

How to Draw Taco — Free Practice Sheets

ANSWER / CASE 2

taco: Copy the reference onto the blank grid, using matching grid intersections. Compare with the separate full reference sheet.

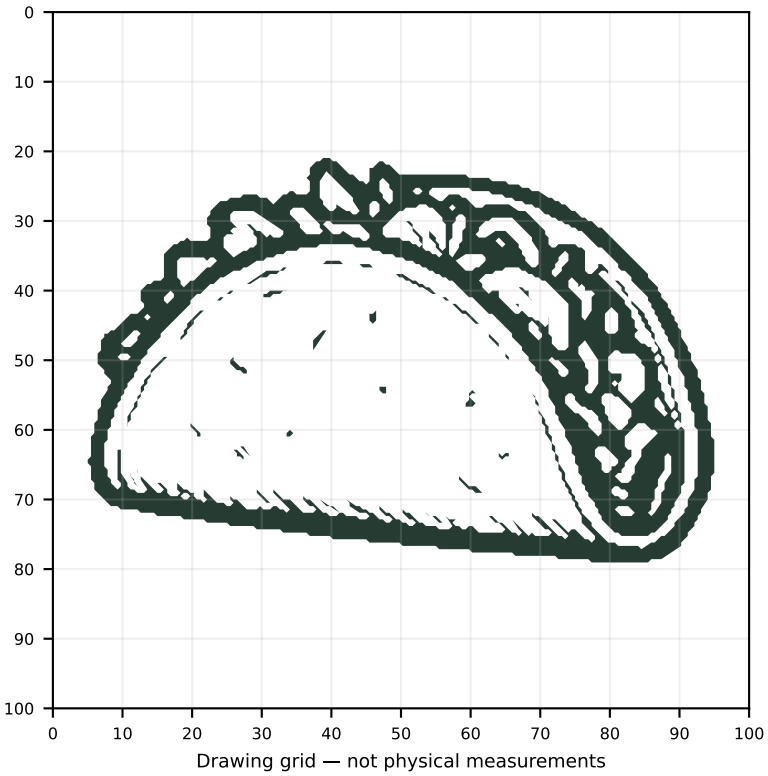

ANSWER: Example solution: preserve curved U-shaped folded tortilla shell, filling visible along the top opening, rounded semicircular silhouette with a flat bottom edge. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a wide U-shaped curve for the outer folded shell, with a flat base line.
2. Add an inner parallel curve along the top opening to show the shell's thickness.
3. Sketch filling shapes (lettuce/meat) protruding above the top edge.
4. Add small texture marks on the shell surface and outline the filling inside the opening.

How to Draw Taco — Free Practice Sheets

ANSWER / CASE 3

taco: Use the bounding frame and center guide to place the silhouette, then add the identifying details. Compare with the separate full reference sheet.

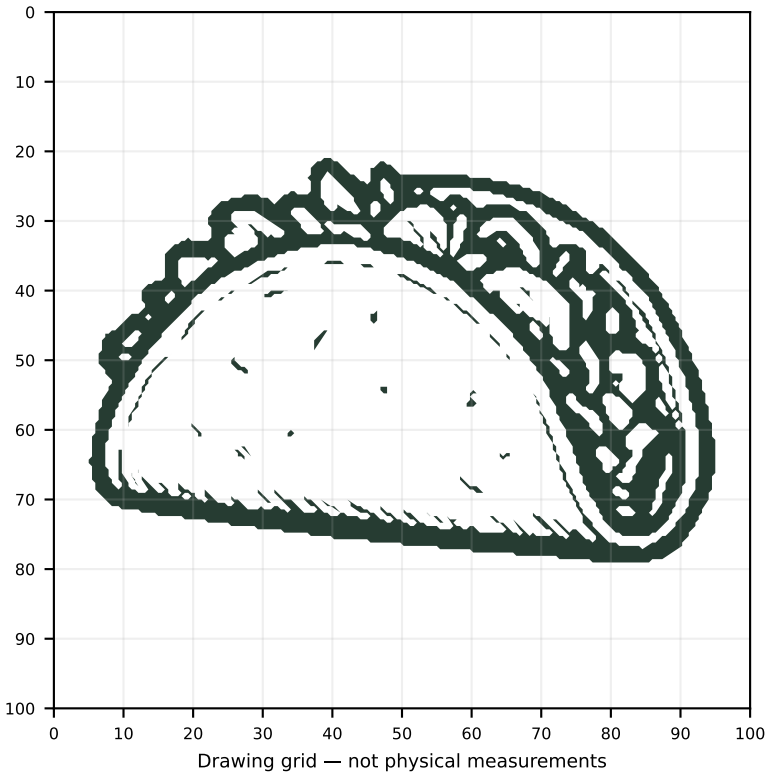

ANSWER: Example solution: preserve curved U-shaped folded tortilla shell, filling visible along the top opening, rounded semicircular silhouette with a flat bottom edge. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a wide U-shaped curve for the outer folded shell, with a flat base line.
2. Add an inner parallel curve along the top opening to show the shell's thickness.
3. Sketch filling shapes (lettuce/meat) protruding above the top edge.
4. Add small texture marks on the shell surface and outline the filling inside the opening.

How to Draw Taco — Free Practice Sheets

ANSWER / CASE 4

taco: Complete the blank right-hand portion using the full reference. Compare with the separate full reference sheet.

ANSWER: Example solution: preserve curved U-shaped folded tortilla shell, filling visible along the top opening, rounded semicircular silhouette with a flat bottom edge. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a wide U-shaped curve for the outer folded shell, with a flat base line.
2. Add an inner parallel curve along the top opening to show the shell's thickness.
3. Sketch filling shapes (lettuce/meat) protruding above the top edge.
4. Add small texture marks on the shell surface and outline the filling inside the opening.
