How to Draw Cashew — Free Practice Sheets

REFERENCE / CASE 1

cashew: Trace the reference outline, then practise the contour independently. Compare with the separate full reference sheet.

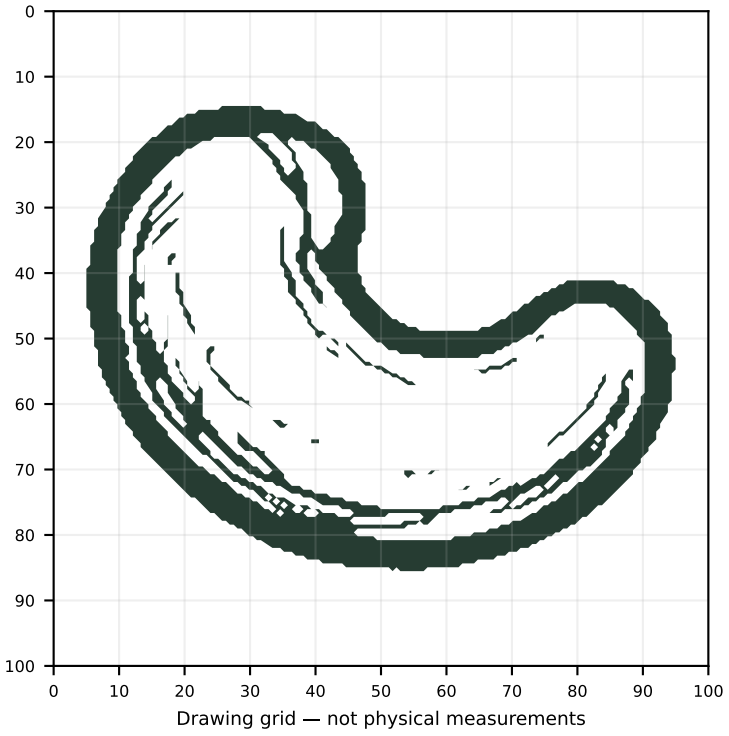

METHOD: Draw a thick curved C-shape or kidney outline with a deep notch at the top right. Round the lower left end into a bulbous lobe and taper the right end into a smaller rounded tip. Add interior curved lines following the outer contour to suggest the smooth, slightly ridged surface. Refine the outline thickness and add a few short hatch marks near the lower edge for depth.
Use the separate practice sheet before checking the answer.
