How to Draw Mountain — Free Practice Sheets

ANSWER / CASE 1

mountain: Trace the reference outline, then practise the contour independently. Compare with the separate full reference sheet.

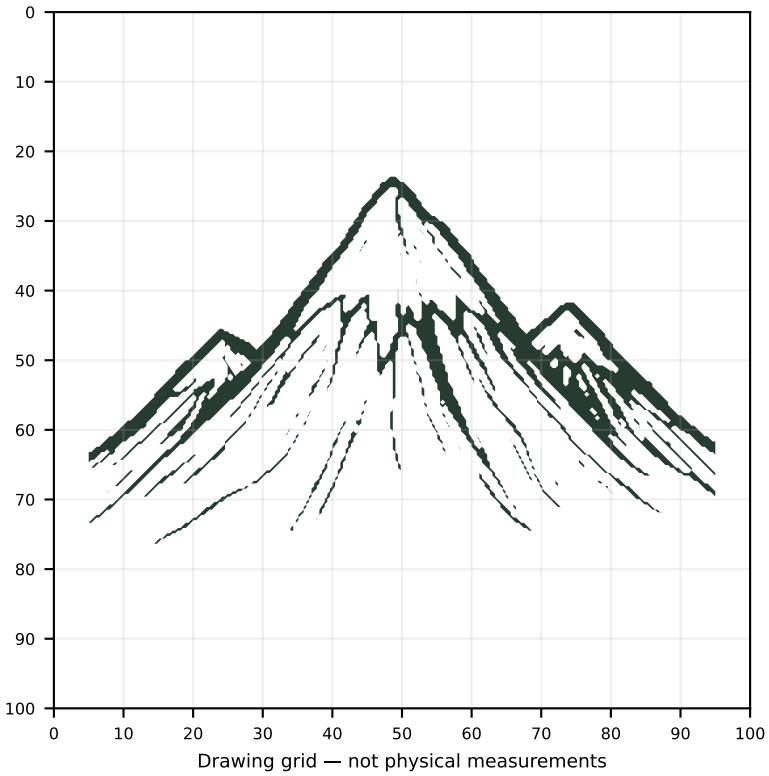

ANSWER: Example solution: preserve central triangular peak with a jagged snow cap outline, two smaller flanking peaks on left and right, long sloping ridge lines descending from the peaks. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a large central triangle for the main peak, then add two smaller triangles on either side for the flanking peaks.
2. Sketch a jagged, zigzag line across the upper portion of the central peak to define the snow cap.
3. Draw long, slightly curved lines from the peaks downward to form the sloping ridges and mountain sides.
4. Add shorter interior lines on the snow cap and ridges to suggest texture and rock faces.

How to Draw Mountain — Free Practice Sheets

ANSWER / CASE 2

mountain: Copy the reference onto the blank grid, using matching grid intersections. Compare with the separate full reference sheet.

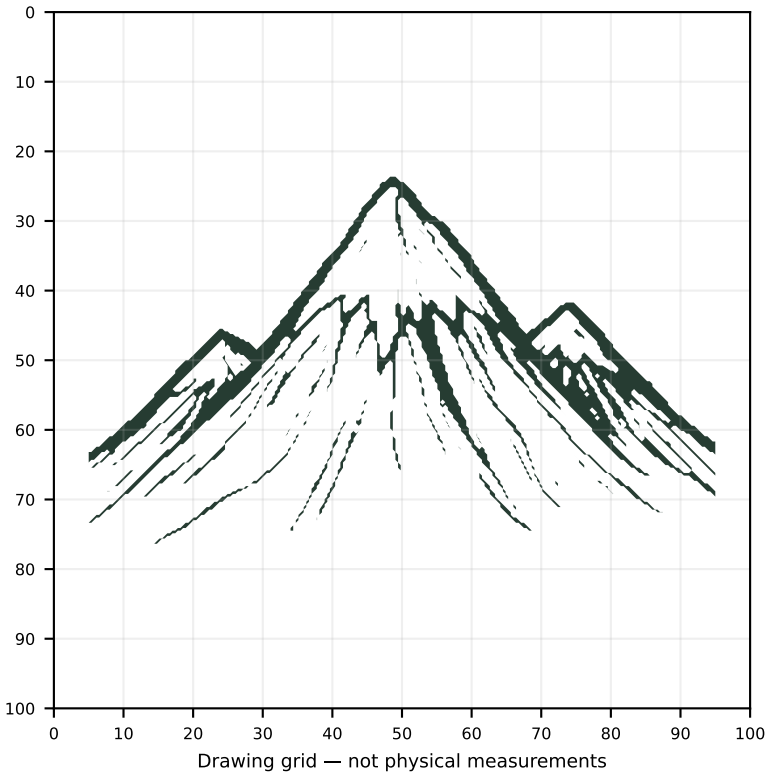

ANSWER: Example solution: preserve central triangular peak with a jagged snow cap outline, two smaller flanking peaks on left and right, long sloping ridge lines descending from the peaks. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a large central triangle for the main peak, then add two smaller triangles on either side for the flanking peaks.
2. Sketch a jagged, zigzag line across the upper portion of the central peak to define the snow cap.
3. Draw long, slightly curved lines from the peaks downward to form the sloping ridges and mountain sides.
4. Add shorter interior lines on the snow cap and ridges to suggest texture and rock faces.

ANSWER / CASE 3

mountain: Use the bounding frame and center guide to place the silhouette, then add the identifying details. Compare with the separate full reference sheet.

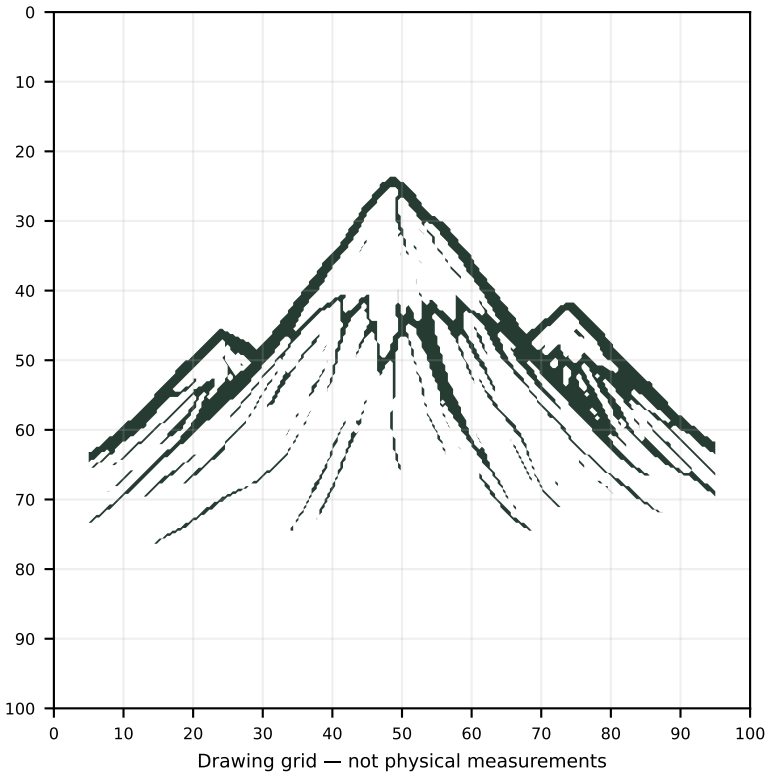

ANSWER: Example solution: preserve central triangular peak with a jagged snow cap outline, two smaller flanking peaks on left and right, long sloping ridge lines descending from the peaks. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a large central triangle for the main peak, then add two smaller triangles on either side for the flanking peaks.
2. Sketch a jagged, zigzag line across the upper portion of the central peak to define the snow cap.
3. Draw long, slightly curved lines from the peaks downward to form the sloping ridges and mountain sides.
4. Add shorter interior lines on the snow cap and ridges to suggest texture and rock faces.

How to Draw Mountain — Free Practice Sheets

ANSWER / CASE 4

mountain: Complete the blank right-hand portion using the full reference. Compare with the separate full reference sheet.

ANSWER: Example solution: preserve central triangular peak with a jagged snow cap outline, two smaller flanking peaks on left and right, long sloping ridge lines descending from the peaks. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a large central triangle for the main peak, then add two smaller triangles on either side for the flanking peaks.
2. Sketch a jagged, zigzag line across the upper portion of the central peak to define the snow cap.
3. Draw long, slightly curved lines from the peaks downward to form the sloping ridges and mountain sides.
4. Add shorter interior lines on the snow cap and ridges to suggest texture and rock faces.
