How to Draw Rock — Free Practice Sheets

REFERENCE / CASE 1

rock: Trace the reference outline, then practise the contour independently. Compare with the separate full reference sheet.

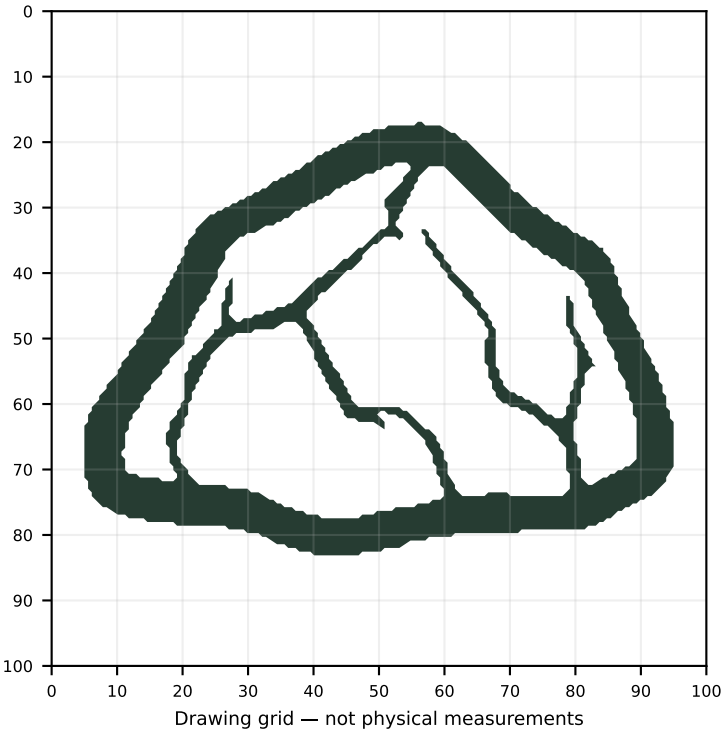

METHOD: Draw a wide irregular polygon with a flat bottom edge for the rock's base. Add angular corner points along the top and sides to create a faceted silhouette. Draw internal crack lines from the edges inward to divide the surface into planes. Connect the crack lines to form a few large facet shapes without overlapping the outer outline.
Use the separate practice sheet before checking the answer.

How to Draw Rock — Free Practice Sheets

REFERENCE / CASE 2

rock: Copy the reference onto the blank grid, using matching grid intersections. Compare with the separate full reference sheet.

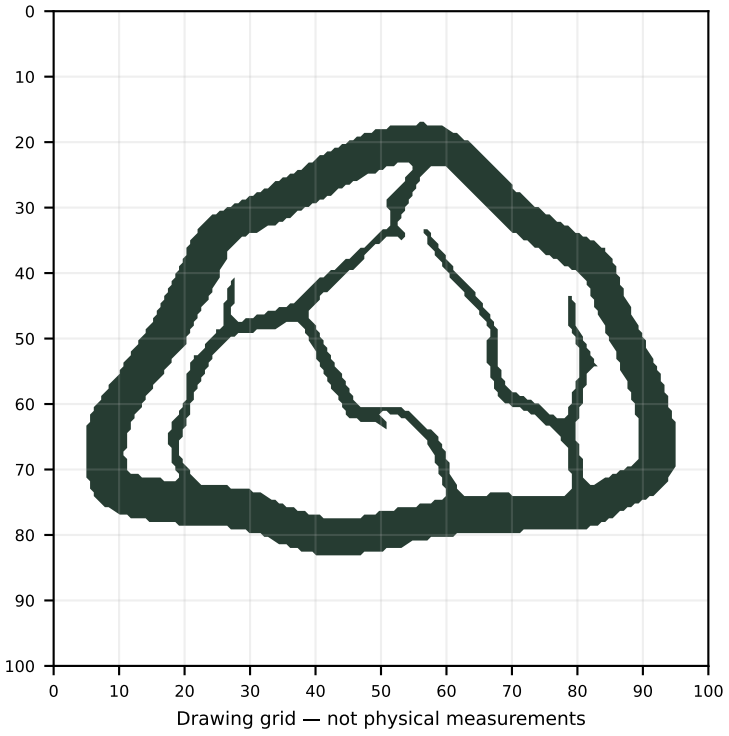

METHOD: Draw a wide irregular polygon with a flat bottom edge for the rock's base. Add angular corner points along the top and sides to create a faceted silhouette. Draw internal crack lines from the edges inward to divide the surface into planes. Connect the crack lines to form a few large facet shapes without overlapping the outer outline.
Use the separate practice sheet before checking the answer.

How to Draw Rock — Free Practice Sheets

REFERENCE / CASE 3

rock: Use the bounding frame and center guide to place the silhouette, then add the identifying details. Compare with the separate full reference sheet.

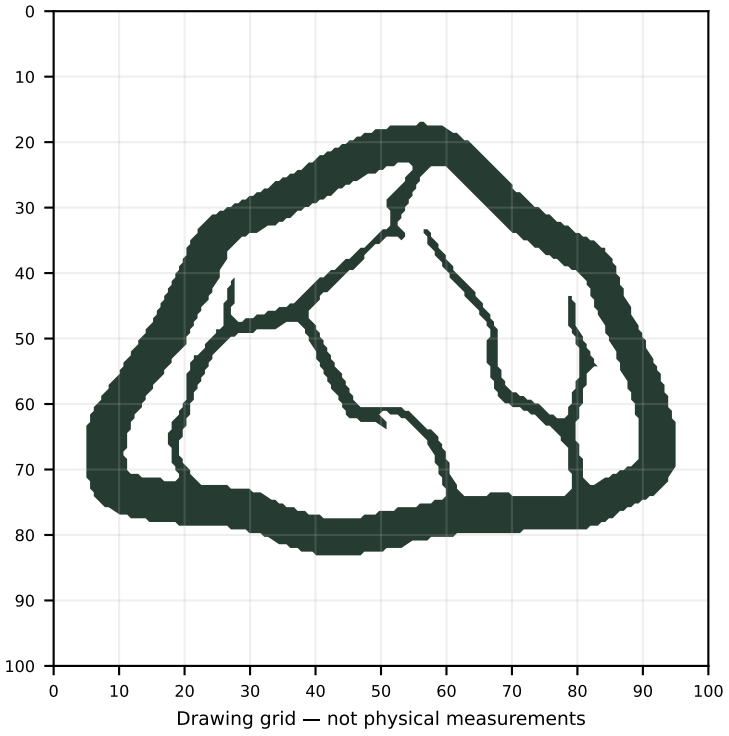

METHOD: Draw a wide irregular polygon with a flat bottom edge for the rock's base. Add angular corner points along the top and sides to create a faceted silhouette. Draw internal crack lines from the edges inward to divide the surface into planes. Connect the crack lines to form a few large facet shapes without overlapping the outer outline.
Use the separate practice sheet before checking the answer.

How to Draw Rock — Free Practice Sheets

REFERENCE / CASE 4

rock: Complete the blank right-hand portion using the full reference. Compare with the separate full reference sheet.

METHOD: Draw a wide irregular polygon with a flat bottom edge for the rock's base. Add angular corner points along the top and sides to create a faceted silhouette. Draw internal crack lines from the edges inward to divide the surface into planes. Connect the crack lines to form a few large facet shapes without overlapping the outer outline.
Use the separate practice sheet before checking the answer.
