How to Draw Feather — Free Practice Sheets

ANSWER / CASE 1

feather: Trace the reference outline, then practise the contour independently. Compare with the separate full reference sheet.

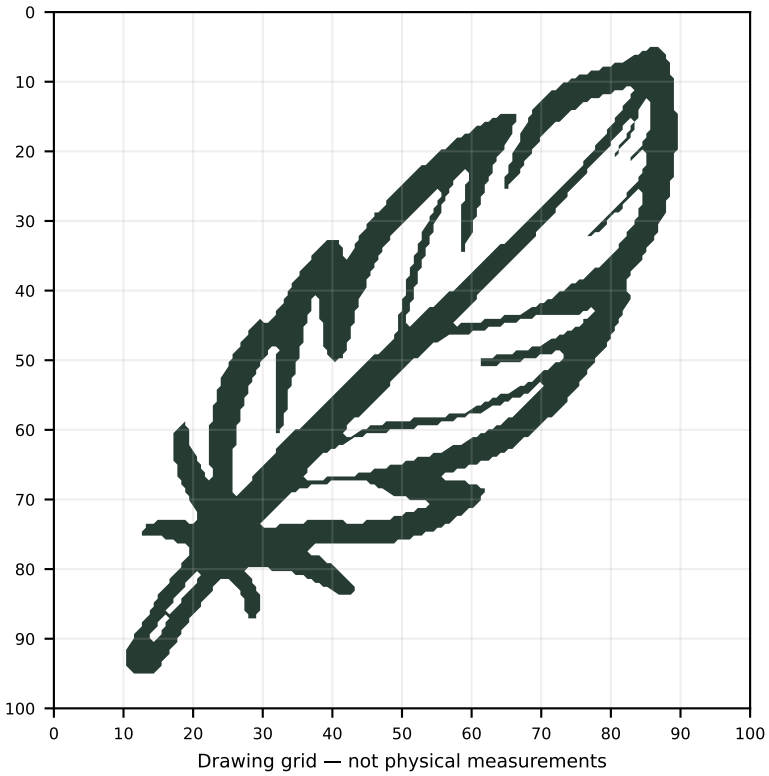

ANSWER: Example solution: preserve long central shaft running diagonally from lower-left to upper-right, barbed vane with jagged, separated barbs on both sides of the shaft, tapered tip at the upper-right end and a small bare quill base at the lower-left. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a long diagonal line for the central shaft, leaving a short bare quill at the lower-left.
2. Outline the vane on both sides of the shaft, starting narrow at the base and widening toward the middle.
3. Add jagged barb separations along the vane edges, angling them outward from the shaft.
4. Taper the vane to a point at the upper-right tip and add a few interior barb lines for texture.

ANSWER / CASE 2

feather: Copy the reference onto the blank grid, using matching grid intersections. Compare with the separate full reference sheet.

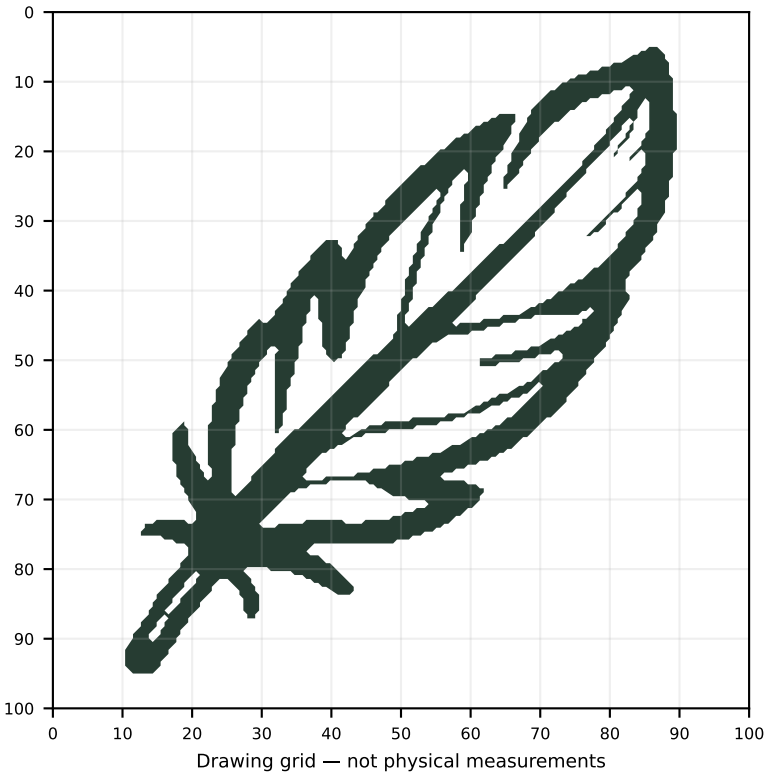

ANSWER: Example solution: preserve long central shaft running diagonally from lower-left to upper-right, barbed vane with jagged, separated barbs on both sides of the shaft, tapered tip at the upper-right end and a small bare quill base at the lower-left. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a long diagonal line for the central shaft, leaving a short bare quill at the lower-left.
2. Outline the vane on both sides of the shaft, starting narrow at the base and widening toward the middle.
3. Add jagged barb separations along the vane edges, angling them outward from the shaft.
4. Taper the vane to a point at the upper-right tip and add a few interior barb lines for texture.

How to Draw Feather — Free Practice Sheets

ANSWER / CASE 3

feather: Use the bounding frame and center guide to place the silhouette, then add the identifying details. Compare with the separate full reference sheet.

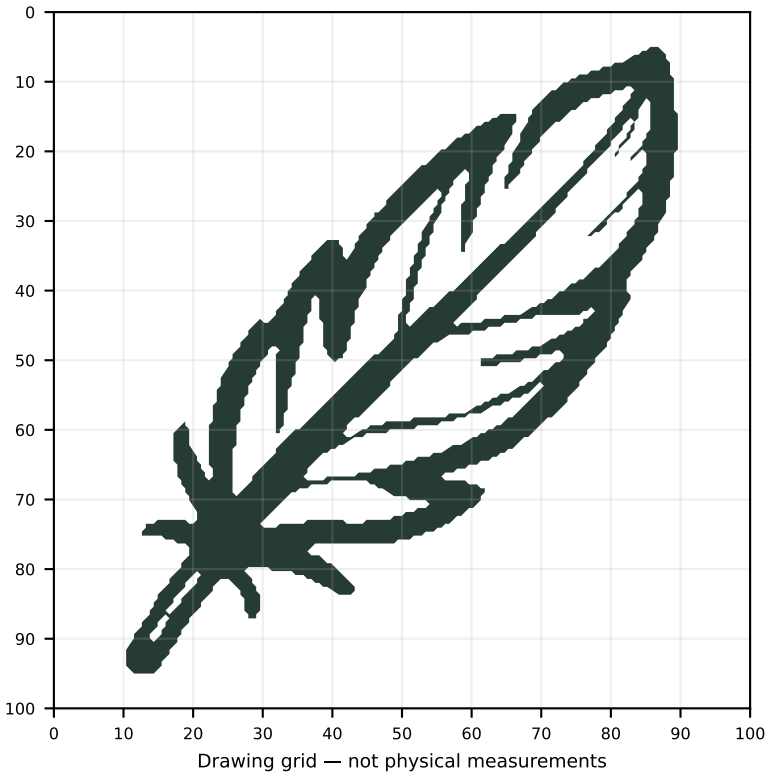

ANSWER: Example solution: preserve long central shaft running diagonally from lower-left to upper-right, barbed vane with jagged, separated barbs on both sides of the shaft, tapered tip at the upper-right end and a small bare quill base at the lower-left. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a long diagonal line for the central shaft, leaving a short bare quill at the lower-left.
2. Outline the vane on both sides of the shaft, starting narrow at the base and widening toward the middle.
3. Add jagged barb separations along the vane edges, angling them outward from the shaft.
4. Taper the vane to a point at the upper-right tip and add a few interior barb lines for texture.

How to Draw Feather — Free Practice Sheets

ANSWER / CASE 4

feather: Complete the blank right-hand portion using the full reference. Compare with the separate full reference sheet.

ANSWER: Example solution: preserve long central shaft running diagonally from lower-left to upper-right, barbed vane with jagged, separated barbs on both sides of the shaft, tapered tip at the upper-right end and a small bare quill base at the lower-left. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a long diagonal line for the central shaft, leaving a short bare quill at the lower-left.
2. Outline the vane on both sides of the shaft, starting narrow at the base and widening toward the middle.
3. Add jagged barb separations along the vane edges, angling them outward from the shaft.
4. Taper the vane to a point at the upper-right tip and add a few interior barb lines for texture.
