How to Draw Plateau — Free Practice Sheets

ANSWER / CASE 1

plateau: Trace the reference outline, then practise the contour independently. Compare with the separate full reference sheet.

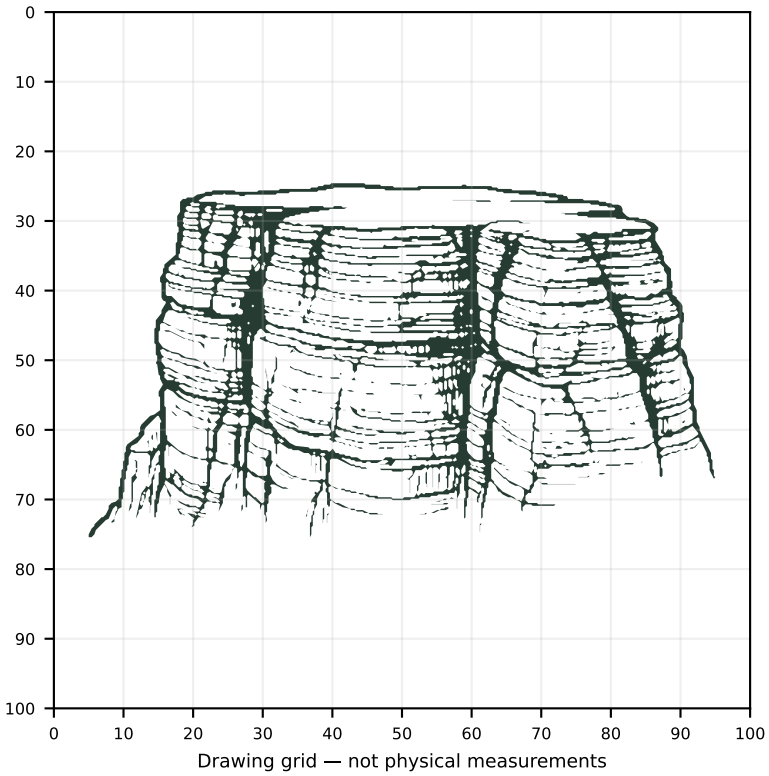

ANSWER: Example solution: preserve flat elevated top, steep cliff sides, horizontal layered rock. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a wide, slightly irregular horizontal top line to establish the flat plateau surface.
2. Sketch vertical cliff walls descending from the top edges, using slightly wavy lines to suggest rock faces.
3. Add multiple horizontal lines across the cliff faces to represent layered sedimentary rock strata.
4. Draw vertical cracks and column-like divisions down the cliff sides to show erosion and blocky rock structure.

How to Draw Plateau — Free Practice Sheets

ANSWER / CASE 2

plateau: Copy the reference onto the blank grid, using matching grid intersections. Compare with the separate full reference sheet.

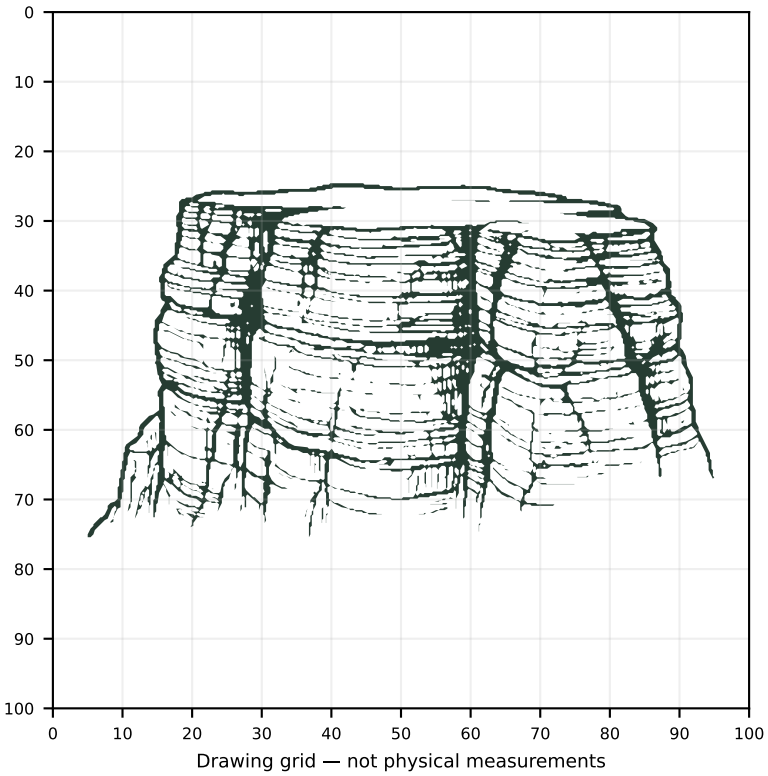

ANSWER: Example solution: preserve flat elevated top, steep cliff sides, horizontal layered rock. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a wide, slightly irregular horizontal top line to establish the flat plateau surface.
2. Sketch vertical cliff walls descending from the top edges, using slightly wavy lines to suggest rock faces.
3. Add multiple horizontal lines across the cliff faces to represent layered sedimentary rock strata.
4. Draw vertical cracks and column-like divisions down the cliff sides to show erosion and blocky rock structure.

How to Draw Plateau — Free Practice Sheets

ANSWER / CASE 3

plateau: Use the bounding frame and center guide to place the silhouette, then add the identifying details. Compare with the separate full reference sheet.

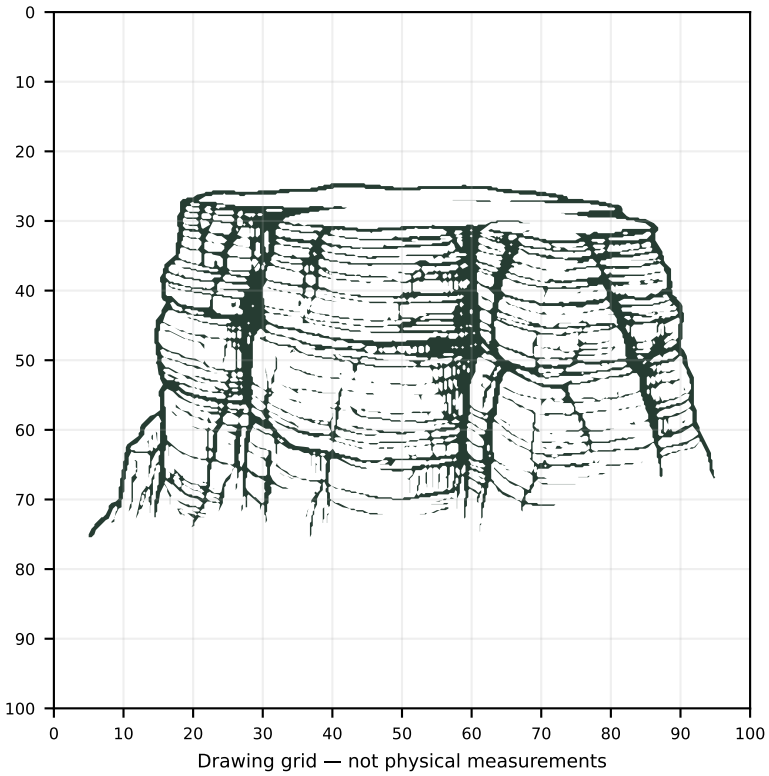

ANSWER: Example solution: preserve flat elevated top, steep cliff sides, horizontal layered rock. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a wide, slightly irregular horizontal top line to establish the flat plateau surface.
2. Sketch vertical cliff walls descending from the top edges, using slightly wavy lines to suggest rock faces.
3. Add multiple horizontal lines across the cliff faces to represent layered sedimentary rock strata.
4. Draw vertical cracks and column-like divisions down the cliff sides to show erosion and blocky rock structure.

How to Draw Plateau — Free Practice Sheets

ANSWER / CASE 4

plateau: Complete the blank right-hand portion using the full reference. Compare with the separate full reference sheet.

ANSWER: Example solution: preserve flat elevated top, steep cliff sides, horizontal layered rock. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a wide, slightly irregular horizontal top line to establish the flat plateau surface.
2. Sketch vertical cliff walls descending from the top edges, using slightly wavy lines to suggest rock faces.
3. Add multiple horizontal lines across the cliff faces to represent layered sedimentary rock strata.
4. Draw vertical cracks and column-like divisions down the cliff sides to show erosion and blocky rock structure.
