How to Draw Shooting Star — Free Practice Sheets

REFERENCE / CASE 1

shooting star: Trace the reference outline, then practise the contour independently. Compare with the separate full reference sheet.

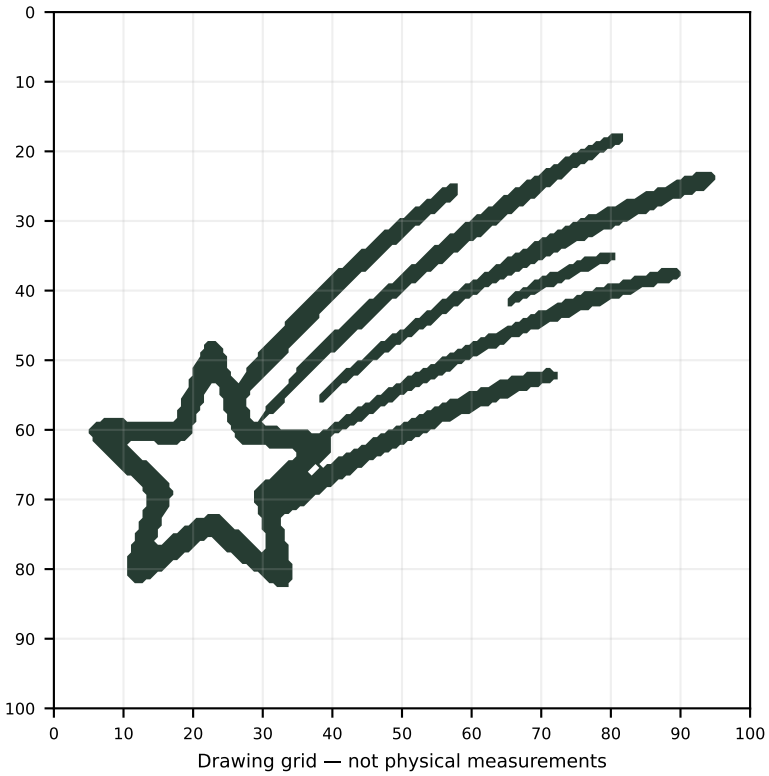

METHOD: Draw a five-pointed star outline for the bright head. From the upper-right point of the star, draw several long curved lines fanning outward. Taper the ends of the lines to form the trailing tail. Keep the lines separated and converging near the star to show motion.
Use the separate practice sheet before checking the answer.

How to Draw Shooting Star — Free Practice Sheets

REFERENCE / CASE 2

shooting star: Copy the reference onto the blank grid, using matching grid intersections. Compare with the separate full reference sheet.

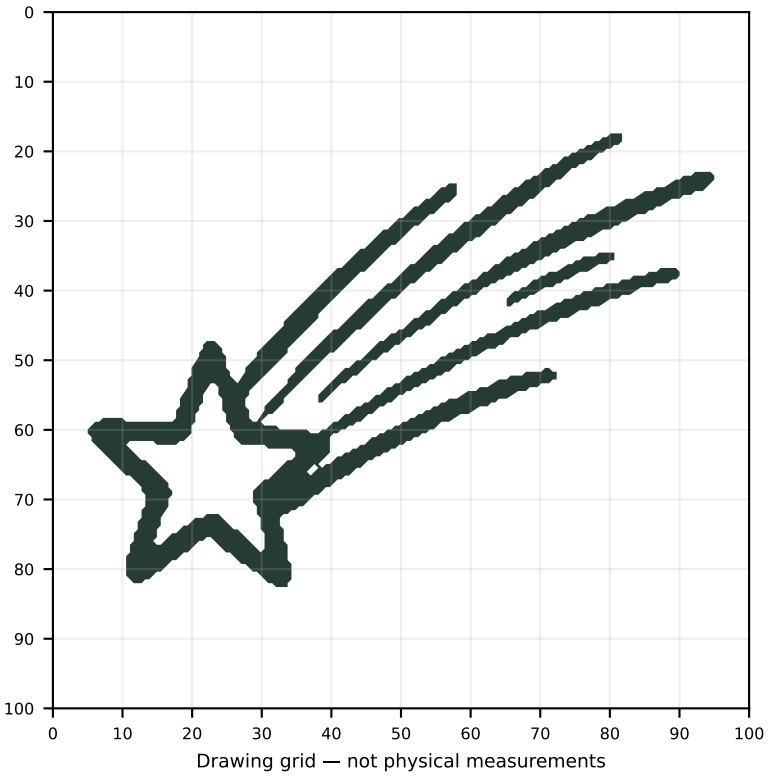

METHOD: Draw a five-pointed star outline for the bright head. From the upper-right point of the star, draw several long curved lines fanning outward. Taper the ends of the lines to form the trailing tail. Keep the lines separated and converging near the star to show motion.
Use the separate practice sheet before checking the answer.

How to Draw Shooting Star — Free Practice Sheets

REFERENCE / CASE 3

shooting star: Use the bounding frame and center guide to place the silhouette, then add the identifying details. Compare with the separate full reference sheet.

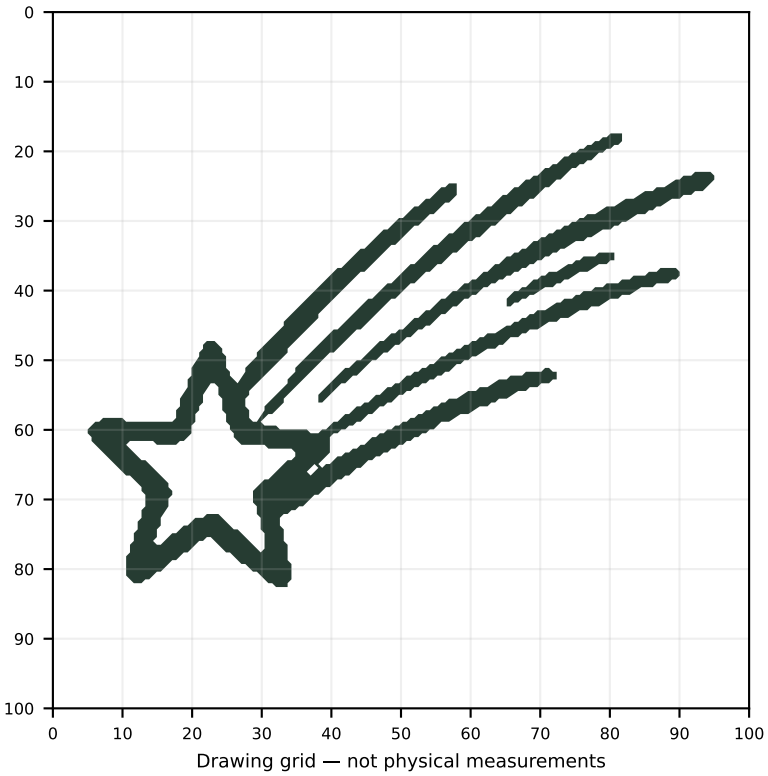

METHOD: Draw a five-pointed star outline for the bright head. From the upper-right point of the star, draw several long curved lines fanning outward. Taper the ends of the lines to form the trailing tail. Keep the lines separated and converging near the star to show motion.
Use the separate practice sheet before checking the answer.

How to Draw Shooting Star — Free Practice Sheets

REFERENCE / CASE 4

shooting star: Complete the blank right-hand portion using the full reference. Compare with the separate full reference sheet.

METHOD: Draw a five-pointed star outline for the bright head. From the upper-right point of the star, draw several long curved lines fanning outward. Taper the ends of the lines to form the trailing tail. Keep the lines separated and converging near the star to show motion.
Use the separate practice sheet before checking the answer.
