How to Draw Geode — Free Practice Sheets

REFERENCE / CASE 1

geode: Trace the reference outline, then practise the contour independently. Compare with the separate full reference sheet.

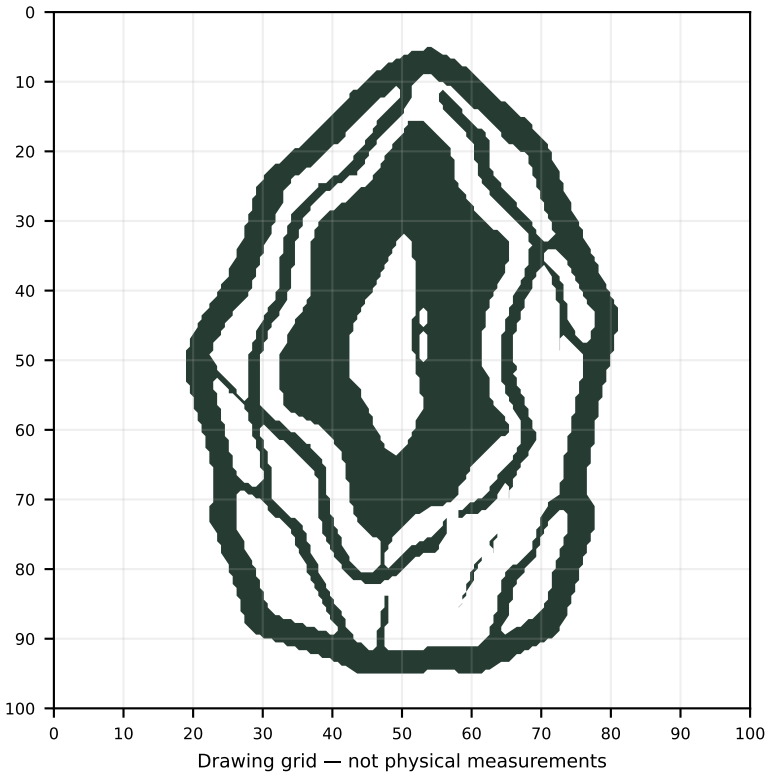

METHOD: Draw a tall, irregular oval outline for the rough outer shell, using slightly angular segments rather than a smooth curve. Inside the outer outline, draw a second smaller irregular oval to define the rim of the opening, keeping the gap between the two lines uneven. Add one or two more nested contour lines inside the opening to represent the layered crystal lining. Fill the innermost cavity with dark shading and leave a lighter, pointed shape in the center to suggest a crystal formation.
Use the separate practice sheet before checking the answer.

How to Draw Geode — Free Practice Sheets

REFERENCE / CASE 2

geode: Copy the reference onto the blank grid, using matching grid intersections.
Compare with the separate full reference sheet.

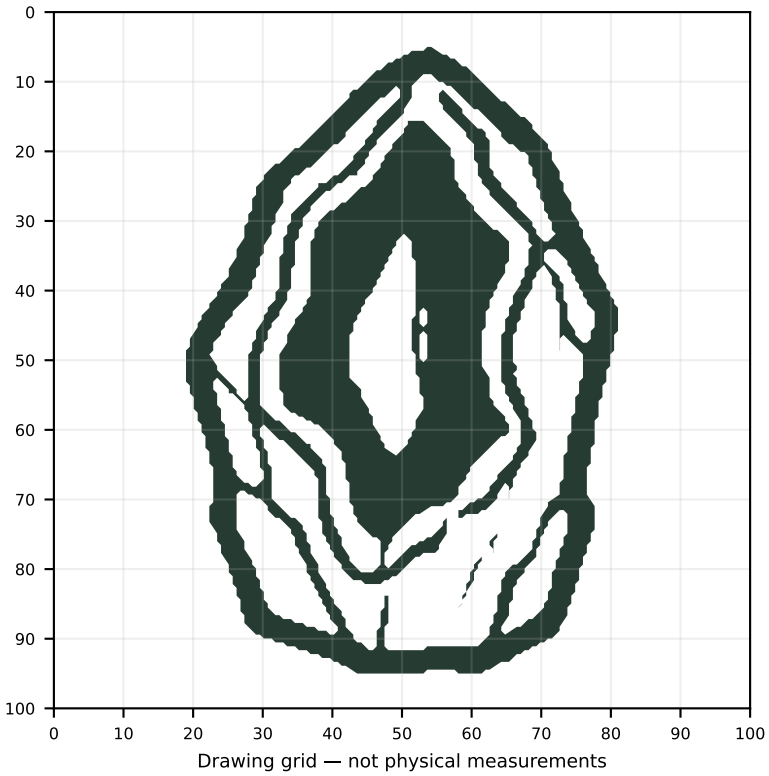

METHOD: Draw a tall, irregular oval outline for the rough outer shell, using slightly angular segments rather than a smooth curve. Inside the outer outline, draw a second smaller irregular oval to define the rim of the opening, keeping the gap between the two lines uneven. Add one or two more nested contour lines inside the opening to represent the layered crystal lining. Fill the innermost cavity with dark shading and leave a lighter, pointed shape in the center to suggest a crystal formation.
Use the separate practice sheet before checking the answer.

How to Draw Geode — Free Practice Sheets

REFERENCE / CASE 3

geode: Use the bounding frame and center guide to place the silhouette, then add the identifying details. Compare with the separate full reference sheet.

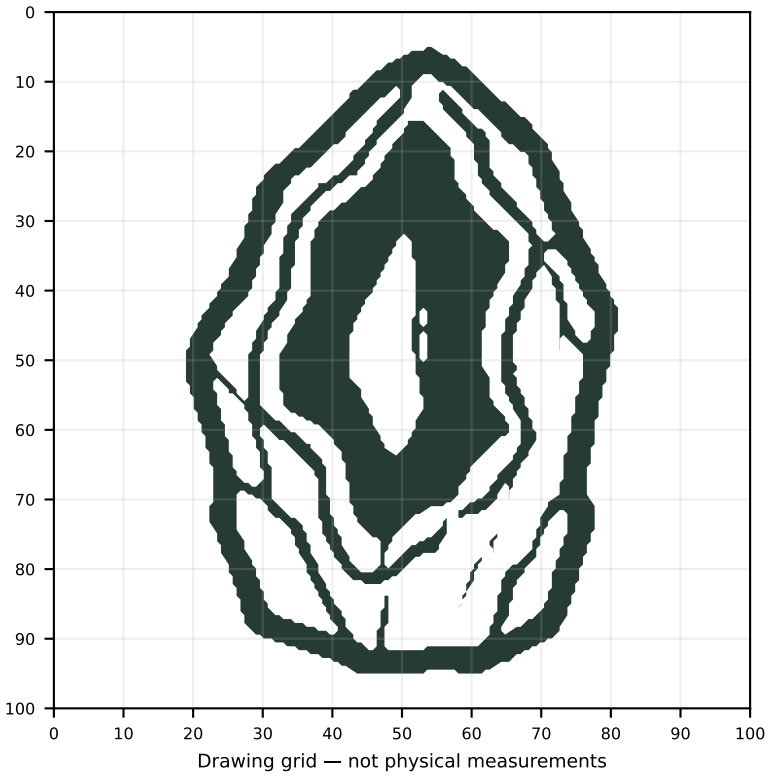

METHOD: Draw a tall, irregular oval outline for the rough outer shell, using slightly angular segments rather than a smooth curve. Inside the outer outline, draw a second smaller irregular oval to define the rim of the opening, keeping the gap between the two lines uneven. Add one or two more nested contour lines inside the opening to represent the layered crystal lining. Fill the innermost cavity with dark shading and leave a lighter, pointed shape in the center to suggest a crystal formation.
Use the separate practice sheet before checking the answer.

How to Draw Geode — Free Practice Sheets

REFERENCE / CASE 4

geode: Complete the blank right-hand portion using the full reference. Compare with the separate full reference sheet.

METHOD: Draw a tall, irregular oval outline for the rough outer shell, using slightly angular segments rather than a smooth curve. Inside the outer outline, draw a second smaller irregular oval to define the rim of the opening, keeping the gap between the two lines uneven. Add one or two more nested contour lines inside the opening to represent the layered crystal lining. Fill the innermost cavity with dark shading and leave a lighter, pointed shape in the center to suggest a crystal formation.
Use the separate practice sheet before checking the answer.
