How to Draw Scissors — Free Practice Sheets

ANSWER / CASE 1

scissors: Trace the reference outline, then practise the contour independently. Compare with the separate full reference sheet.

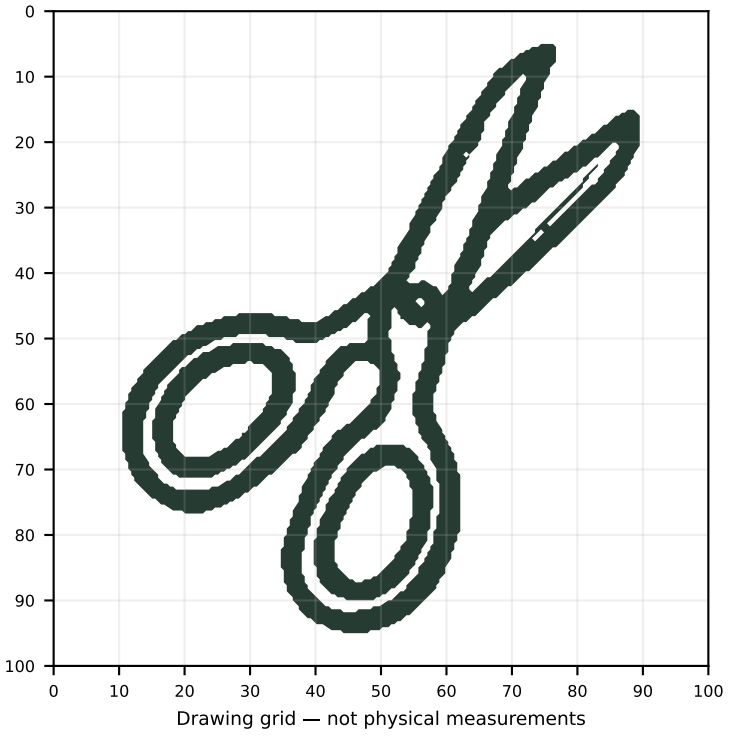

ANSWER: Example solution: preserve two crossed blades forming a V shape at the top, two finger loops at the bottom, small circular pivot screw at the crossing point. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw two elongated blade shapes crossing near the center to form a V.
2. Add a small circle at the crossing point for the pivot screw.
3. Draw two rounded finger loops below the pivot, one on each side.
4. Connect the loops to the blades with curved handle lines and outline the full silhouette.

How to Draw Scissors — Free Practice Sheets

ANSWER / CASE 2

scissors: Copy the reference onto the blank grid, using matching grid intersections. Compare with the separate full reference sheet.

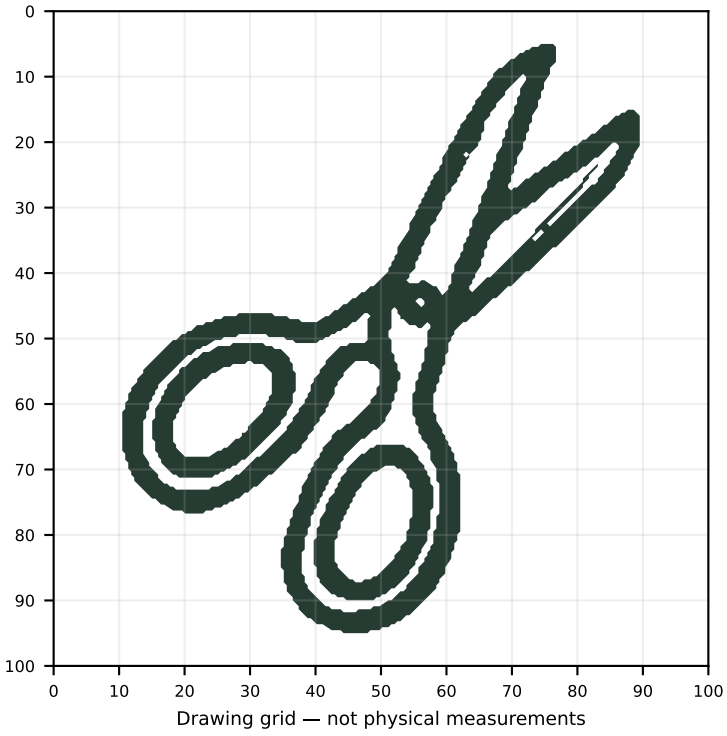

ANSWER: Example solution: preserve two crossed blades forming a V shape at the top, two finger loops at the bottom, small circular pivot screw at the crossing point. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw two elongated blade shapes crossing near the center to form a V.
2. Add a small circle at the crossing point for the pivot screw.
3. Draw two rounded finger loops below the pivot, one on each side.
4. Connect the loops to the blades with curved handle lines and outline the full silhouette.

How to Draw Scissors — Free Practice Sheets

ANSWER / CASE 3

scissors: Use the bounding frame and center guide to place the silhouette, then add the identifying details. Compare with the separate full reference sheet.

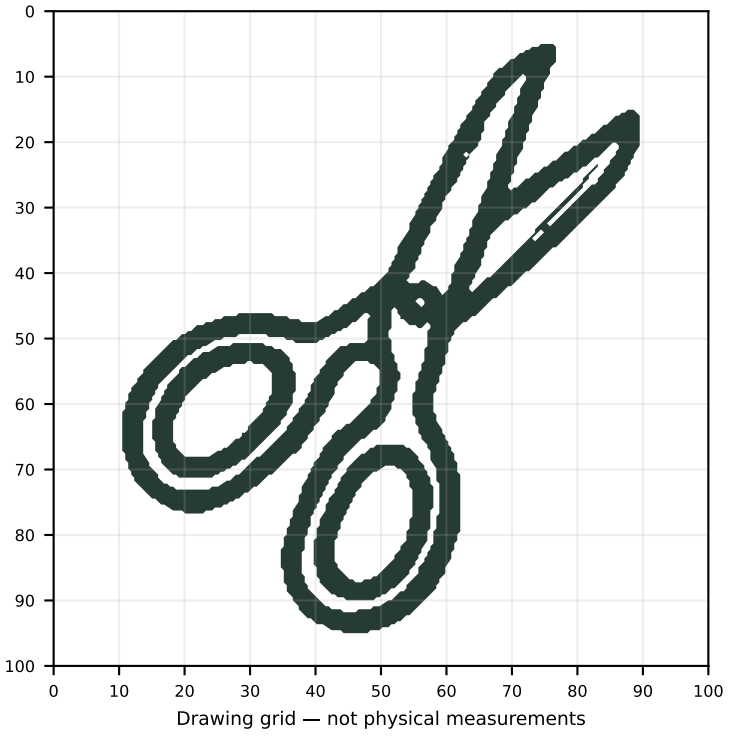

ANSWER: Example solution: preserve two crossed blades forming a V shape at the top, two finger loops at the bottom, small circular pivot screw at the crossing point. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw two elongated blade shapes crossing near the center to form a V.
2. Add a small circle at the crossing point for the pivot screw.
3. Draw two rounded finger loops below the pivot, one on each side.
4. Connect the loops to the blades with curved handle lines and outline the full silhouette.

How to Draw Scissors — Free Practice Sheets

ANSWER / CASE 4

scissors: Complete the blank right-hand portion using the full reference. Compare with the separate full reference sheet.

ANSWER: Example solution: preserve two crossed blades forming a V shape at the top, two finger loops at the bottom, small circular pivot screw at the crossing point. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw two elongated blade shapes crossing near the center to form a V.
2. Add a small circle at the crossing point for the pivot screw.
3. Draw two rounded finger loops below the pivot, one on each side.
4. Connect the loops to the blades with curved handle lines and outline the full silhouette.
